COMMON SENSE PHYSICS & COSMOLOGY

ALL PHENOMENA HAVE PHYSICAL ORIGINS!

All universal phenomena such as gravity and light are logically explained by the classical (Galilean) physics, taught in high schools!

The universe has both gravity and antigravity matters in 3-dimensional space!

The Hubble Image of a small region of the observable universe.

Since there can be only one consistent and coherent interpretation of the universe and all universal phenomena, Galilean physics is now proven to be the only correct physics!

Common Sense Cosmology Lenard Metzger, 2010-07-30 This is a personal alternative view of how the universe came into being where it is going and its place in the cosmos Presented are new concepts about black holes the big bang gravity and time With my apology to Albert Einstein Also included are ideas about photons and atomic structure **The Epic Trickster in American Literature** Gregory E. Rutledge, 2013-04-26 Just as Africa and the West have traditionally fit into binaries of Darkness Enlightenment Savage Modern Ugly Beautiful and Ritual Art among others much of Western cultural production rests upon the archetypal binary of Trickster Epic with trickster aesthetics and commensurate cultural forms characterizing Africa Challenging this binary and the exceptionalism that underlies anti hegemonic efforts even today this book begins with the scholarly foundations that mapped out African trickster continuities in the United States and excavated the aesthetics of traditional African epic performances Rutledge locates trickster like capacities within the epic hero archetype the epic trickster paradigm and constructs an Homeric Diaspora which is to say that the modern Homeric performance foundation lies at an absolute time and distance away from the ancient storytelling performance needed to understand the cautionary aesthetic inseparable from epic potential As traditional epic performances demonstrate unchecked epic trickster dynamism anticipates not only brutal imperialism and creative diversity but the greatest threat to everyone an eco apocalypse Relying upon the preeminent scholarship on African American trickster heroes traditional African heroic performances and cultural studies approaches to Greco Roman epics Rutledge traces the epic trickster aesthetic through three seminal African American novels keenly attuned to the American Homeric Diaspora Charles Chesnutt s *The Marrow of Tradition* Richard Wright s *Native Son* and Toni Morrison s *Beloved* **How Shall the Rich Escape?** Frank Seaver Billings, 1894 *Cosmic Constitutional Theory* J. Harvie Wilkinson, 2012-03-12 What underlies this development In this concise and highly engaging work Federal Appeals Court Judge and noted author From Brown to Bakke J Harvie Wilkinson argues that America s most brilliant legal minds have launched a set of cosmic constitutional theories that for all their value are undermining self governance **Black Holes, Wormholes and Time Machines** Jim Al-Khalili, 2002-01-01 Do you know What might happen if you fall into a black hole That the Universe does not have an edge That the reason it gets dark at night is proof of the Big Bang That cosmic particles time travel through the atmosphere defying death That our past present and future might all coexist out there With two remarkable ideas Albert Einstein revolutionized our view of the Universe His first was that nothing can travel faster than light the ultimate speed limit This simple fact leads to the unavoidable conclusion that space and time must be linked together forever as Spacetime With his second monumental insight Einstein showed how Spacetime is warped and stretched by the gravity of all objects in the Universe and even punctured by black holes But such possible twisting of Spacetime allowed a magic not even Einstein could have imagined time travel Theoretical physicist Jim Al Khalili finally lays science fiction to rest as he opens up Einstein s Universe Leading us gently and light heartedly through the

dizzying world of our space and time he even gives us the recipe for a time machine capable of taking us Back to the Future to Alice s Wonderland or on a trip with the Terminator The Cosmic Time of Empire Adam Barrows,2011 Combining original historical research with literary analysis Adam Barrows takes a provocative look at the creation of world standard time in 1884 and rethinks the significance of this remarkable moment in modernism for both the processes of imperialism and for modern literature As representatives from twenty four nations argued over adopting the Prime Meridian and thereby measuring time in relation to Greenwich England writers began experimenting with new ways of representing human temporality Barrows finds this experimentation in works as varied as Victorian adventure novels high modernist texts and South Asian novels including the work of James Joyce Virginia Woolf H Rider Haggard Bram Stoker Rudyard Kipling and Joseph Conrad Demonstrating the investment of modernist writing in the problems of geopolitics and in the public discourse of time Barrows argues that it is possible and productive to rethink the politics of modernism through the politics of time

Cosmology Edward Harrison, 2000-03-16 *Cosmology* The Science of the Universe is an introduction to past and present cosmological theory For much of the world's history cosmological thought was formulated in religious or philosophical language and was thus theological or metaphysical in nature However cosmological speculation and theory has now become a science in which the empirical discoveries of the astronomer theoretical physicist and biologist are woven into intricate models that attempt to account for the universe as a whole Professor Harrison draws on the discoveries and speculations of these scientists to provide a comprehensive survey of man's current understanding of the universe and its history Tracing the rise of the scientific method the major aim of this book is to provide an elementary understanding of the physical universe of modern times Thoroughly revised and updated this second edition extends the much acclaimed first edition taking into account the many developments that have occurred
