Africa's Infrastructure World Bank,2009-12-01 Sustainable infrastructure development is vital for Africa's prosperity And now is the time to begin the transformation This volume is the culmination of an unprecedented effort to document analyze and interpret the full extent of the challenge in developing Sub Saharan Africa's infrastructure sectors As a result it represents the most comprehensive reference currently available on infrastructure in the region The book covers the five main economic infrastructure sectors information and communication technology irrigation power transport and water and sanitation Africa's Infrastructure A Time for Transformation reflects the collaboration of a wide array of African regional institutions and development partners under the auspices of the Infrastructure Consortium for Africa It presents the findings of the Africa Infrastructure Country Diagnostic AICD a project launched following a commitment in 2005 by the international community after the G8 summit at Gleneagles Scotland to scale up financial support for infrastructure development in Africa The lack of

reliable information in this area made it difficult to evaluate the success of past interventions prioritize current allocations and provide benchmarks for measuring future progress hence the need for the AICD Africa s infrastructure sectors lag well behind those of the rest of the world and the gap is widening Some of the main policy relevant findings highlighted in the book include the following infrastructure in the region is exceptionally expensive with tariffs being many times higher than those found elsewhere Inadequate and expensive infrastructure is retarding growth by 2 percentage points each year Solving the problem will cost over US 90 billion per year which is more than twice what is being spent in Africa today However money alone is not the answer Prudent policies wise management and sound maintenance can improve efficiency thereby stretching the infrastructure dollar There is the potential to recover an additional US 17 billion a year from within the existing infrastructure resource envelope simply by improving efficiency For example improved revenue collection and utility management could generate US 3.3 billion per year Regional power trade could reduce annual costs by US 2 billion And deregulating the trucking industry could reduce freight costs by one half So raising more funds without also tackling inefficiencies would be like pouring water into a leaking bucket Finally the power sector and fragile states represent particular challenges Even if every efficiency in every infrastructure sector could be captured a substantial funding gap of 31 billion a year would remain Nevertheless the African people and economies cannot wait any longer Now is the time to begin the transformation to sustainable development

Design and Optimization of Irrigation Distribution Networks Y.

Labye,1988-01-01 *Irrigation Systems* Adrian Laycock,2011 Of all the confrontations man has engineered with nature irrigation systems have had the most widespread and far reaching impact on the natural environment Over a quarter of a billion hectares of the planet are irrigated and entire countries depend on irrigation for their survival and existence Considering the importance of irrigation schemes it is unfortunate that until recently the technology and principles of design applied to their construction has hardly changed in 4 000 years Modern thinking on irrigation engineering has benefited from a cross fertilization of ideas from many other fields including social sciences control theory political economics and agriculture However these influences have been largely ignored by irrigation engineers Drawing on almost 40 years of experience of irrigation in the developing world Laycock introduces new ideas on the design of irrigation systems and combines important issues from the disciplines of social conflict management and political thinking Hydraulic Structure,Equipment and Water Data Acquisition Systems - Volume II Jan Malan Jordaan,Alexander Bell,2009-11-25 Hydraulic Structure Equipment and Water Data Acquisition Systems is a component of Encyclopedia of Water Sciences Engineering and Technology Resources in the global Encyclopedia of Life Support Systems EOLSS which is an integrated compendium of twenty one Encyclopedias Hydraulic structures occupied a vital role in the development of civilization from the earliest recorded history up to the present and undoubtedly will do so in the future Humanity in ancient times settled mostly near perennial rivers nomadic people frequented oases and springs and to augment these natural ephemeral supplies established societies built primitive dams and dug wells This 4 volume set contains several chapters each of size 5000 30000 words with perspectives applications and extensive illustrations It carries state of the art knowledge in the fields of Hydraulic Structure Equipment and Water Data Acquisition Systems In these volumes the historical origins modern developments and future perspectives in the field of water supply engineering are discussed Various types of hydraulic structures their associated equipment and the various systems for collecting data are described These four volumes are aimed at the following five major target audiences University and College Students Educators Professional Practitioners Research Personnel and Policy Analysts Managers and Decision Makers NGOs and GOs *Egypt's Strategy to Meet the Sustainable Development Goals and Agenda 2030: Researchers' Contributions* El-Sayed E. Omran,Abdelazim M. Negm,2023-02-01 This book focuses on Egypt as a representative example of emerging economies struggling to achieve their sustainable development goals SDGs The Egyptian government has launched Egypt s Vision 2030 in line with the 2030 Agenda also known as the Sustainable Development Strategy SDS which encompasses the economic social and environmental dimensions of development It is under the SDS that all development plans in Egypt are incorporated while at the same time being strongly guided by the SDGs Aware of the principle of shared but differentiated responsibility Egypt also recognizes that fundamental challenges remain despite a strong willingness to achieve the SDGs High birth rates brain drain phenomena water scarcity migration discrimination against women and girls a growing informal sector and instability in neighboring

states especially Libya and Syria are only some of the many hindrances to sustainable development In order to address these challenges Egypt relies heavily on the SDGs which are aimed at transforming our world Although there is an urgent need for a drastic change in the way we use the Earth the question arises as to whether the SDGs are sufficient to facilitate such a transformation This book explores the key environmentally related Sustainable Development Goals SDGs and offers a cutting edge assessment of current progress with a view to reaching these objectives by 2030 The book highlights some of the key findings and ideas for how research may help achieve the 17 Sustainable Development Goals in enterprises The book provides a useful framework that can help and aid the Egyptian government to assess the many goals and targets outlined in the 2030 Agenda The analysis of Egypt can be used as a blueprint for other developing nations and globally in order to guide policy toward achieving the SDGs Covering food security water resilience climate change agronomics rural life environmental impact assessment as a tool for measuring the achievement of the goals Egyptian education the COVID 19 pandemic cultural and societal dimensions this book will be of great interest to students and scholars of sustainable development and climate change as well as practitioners and policymakers involved in sustainable development and disaster management
