

A scenic view of a mountain peak, likely El Capitan in Yosemite National Park, with a quote overlay. The image shows a steep, rocky cliff face on the left, with a valley and distant mountains visible in the background under a hazy sky.

Smart Enough To Know:

Are We Smart Enough to Know How Smart Animals Are? Frans de Waal, 2016-04-25 A New York Times bestseller A passionate and convincing case for the sophistication of nonhuman minds Alison Gopnik *The Atlantic* Hailed as a classic *Are We Smart Enough to Know How Smart Animals Are* explores the oddities and complexities of animal cognition in crows dolphins parrots sheep wasps bats chimpanzees and bonobos to reveal how smart animals really are and how we've underestimated their abilities for too long Did you know that octopuses use coconut shells as tools that elephants classify humans by gender and language and that there is a young male chimpanzee at Kyoto University whose flash memory puts that of humans to shame Fascinating entertaining and deeply informed de Waal's landmark work will convince you to rethink everything you thought you knew about animal and human intelligence

Are We Smart Enough to Know How Smart Animals Are? Frans de Waal, 2016-09 What separates your mind from that of an animal Is it the ability to design tools a sense of self or the grasp of past and future In recent decades these claims have eroded or even been disproven outright by a revolution in the study of animal cognition Waal explores both the scope and the depth of animal intelligence offering a firsthand account of how science has stood traditional behaviorism on its head by revealing how smart animals really are and how we've underestimated their abilities for too long
