status in some important areas of applied probability and mathematical biology Some papers have educational intentions
regarding the mathematical modelling of special biological situations The workshop was the third one in Heidelberg dealing

University during the week of July 8-12 1985 was to enable biologists and probabilists from Japan and the U S to discuss the
latest developments in their respective fields and to exchange ideas on the applicability of the more recent developments in
stochastic process theory to problems in biology Eighteen papers were presented at the Workshop and have been grouped
under the following headings I Population genetics five papers II Measure valued diffusion processes related to population
