Zerden,1972 **Stock Market Primer** Hugh L. Sowards,1946 **Contractual Savings Or Stock Market Development, which Leads?** Mario Catalan,Gregorio Impavido,Alberto R. Musalem,2000 This paper argues that contractual savings assets of pension funds and life insurance companies contribute to stock market development **The London and New York Stock Exchanges 1850-1914 (Routledge Revivals)** Ranald Michie,2012-08-06 First published in 1987 this is a reissue of the first book to offer a detailed comparison of two of the foremost stock exchanges in world before 1914 It is not only an exercise in comparative economic history but it also relates these institutions to wider world markets thereby clarifying their functions and how they related to the general financial and economic framework Students and researchers in economic and social history will welcome the reissue of this groundbreaking account of two historically important institutions in a crucial period of their development Financial practitioners and others will also find much of interest here in terms of both fascinating history and of insights into an era when a global market was rapidly evolving largely free of the twentieth century distortions and hindrances introduced by wars interventionist governments and exchange controls **The Stock Market** George Leland Leffler,1951 This is a study of the stock market as it operates and functions today It is written for the serious observer and student of the market whether he be an investor or trader a staff member of a brokerage firm or a college student College instructors in courses in the stock market or the securities markets will find that the book is organized for use as a text for a one semester course Both practice and theory are combined in such a way as to find maximum usefulness for college teaching The college student will find in the book a complete description of the entire securities market Particular attention has been given to the economic functions performed by such markets and their place in the economic life of which we are a part The college student is shortly to become a business or professional man he will then become a potential investor or trader in stocks and bonds It is therefore of the highest practical importance that he know the essential relationships between customers and brokers and the way trading and investing in stocks are carried on He should know how the securities business operates if for no other reason than to avoid the pitfalls which ensnare so many unwary followers of the market The author attempted to cover in as exhaustive a manner as possible all aspects of the stock market Although highly technical operations of the market are included in the book the author at all times has sought to reduce them to clear non technical descriptions understandable to readers not directly employed in the securities business *Catalog of Copyright Entries.
