Stonehenge People:

The Stonehenge People Rodney Castleden, 2002-01-31 First published in 1990 Of all the monuments left by the past Stonehenge is the most evocative the most memorable and the most mysterious Whilst the monuments of other cultures have gradually surrendered their mysteries Stonehenge alone seems to stimulate endless conjecture Rodney Castleden's vivid presentation of the world of the megaliths answers many of the most baffling questions about Stonehenge There are he stresses few absolute certainties but from the vast body of evidence assembled during the last hundred years it is now possible to get much closer to the truth than ever before Who built the monuments and for what purpose How were the bluestones moved from the sacred mountains of the west to Salisbury Plain Who were the people responsible for this amazing undertaking and what did they think and believe *Stonehenge* Mike Parker Pearson, 2012-06-07 Our knowledge about Stonehenge has changed dramatically as a result of the Stonehenge Riverside Project 2003-2009 led by Mike Parker Pearson and included not only Stonehenge itself but also the nearby great henge enclosure of Durrington Walls This book is about the people who built Stonehenge and its relationship to the surrounding landscape The book explores the theory that the people of Durrington Walls built both Stonehenge and Durrington Walls and that the choice of stone for constructing Stonehenge has a significance so far undiscovered namely that stone was used for monuments to the dead Through years of thorough and extensive work at the site Parker Pearson and his team unearthed evidence of the Neolithic inhabitants and builders which connected the settlement at Durrington Walls with the henge and contextualised Stonehenge within the larger site complex linked by the River Avon as well as in terms of its relationship with the rest of the British Isles Parker Pearson's book changes the way that we think about Stonehenge correcting previously erroneous chronology and dating filling in gaps in our knowledge about its people and how they lived identifying a previously unknown type of Neolithic building discovering Bluestonehenge a circle of 25 blue stones from western Wales and confirming what started as a hypothesis that Stonehenge was a place of the dead through more than 64 cremation burials unearthed there which span the monument's use during the third millennium BC In lively and engaging prose Parker Pearson brings to life the imposing ancient monument that continues to hold a fascination for everyone **A History of Western Society, Volume 1** John P. McKay, Bennett D. Hill, John Buckler, Clare Haru Crowston, Merry E. Wiesner-Hanks, Joe Perry, 2011-01-31 Now from Bedford St Martin's A History of Western Society is one of the most successful textbooks available because it captures students' interest in the everyday life of the past and ties social history to the broad sweep of politics and culture The tenth edition has been thoroughly revised to strengthen the text's readability heighten its attention to daily life and incorporate the insights of new scholarship including an enhanced treatment of European exploration and a thoroughly revised post 1945 section With a dynamic new design new special features and a completely revised and robust companion reader this major revision makes the past memorable and accessible for a new generation of students and instructors *The Stonehenge People* Aubrey

Who We Are and How We Got Here David Reich,2019-02-05 A groundbreaking book about how ancient DNA has profoundly changed our understanding of human history Geneticists like David Reich have made astounding advances in the field of genomics which is proving to be as important as archeology linguistics and written records as a means to understand our ancestry In Who We Are and How We Got Here Reich allows readers to discover how the human genome provides not only all the information a human embryo needs to develop but also the hidden story of our species Reich delves into how the genomic revolution is transforming our understanding of modern humans and how DNA studies reveal deep inequalities among different populations between the sexes and among individuals Provocatively Reich s book suggests that there might very well be biological differences among human populations but that these differences are unlikely to conform to common stereotypes Drawing upon revolutionary findings and unparalleled scientific studies Who We Are and How We Got Here is a captivating glimpse into humankind where we came from and what that says about our lives today

Stonehenge Clive Ruggles,Amanda Chadburn,2024-04-03 Stonehenge is one of the most famous ancient monuments in the world and its solar alignment is one of its most important features Yet although archaeologists have learned a huge amount about this iconic monument and its development a sense of mystery continues about its purpose This helps fuel numerous theories and common misconceptions particularly concerning its relationship to the sky and the heavenly bodies A

desire to cut through this confusion was the inspiration for this book and it fills a gaping hole in the existing literature The book provides both an introduction to Stonehenge and its landscape and an introduction to archaeoastronomy the study of how ancient peoples understood phenomena in the sky and what role the sky played in their cultures Archaeoastronomy is a specialism critical to explaining the relationship of Stonehenge and nearby monuments to the heavens but interpreting archaeoastronomical evidence has often proved highly controversial in the past Stonehenge Sighting the Sun explains why It makes clear which ideas about Stonehenge are generally accepted and which are not with clear graphics to explain complicated concepts This beautifully illustrated book shines new light on this most famous of ancient monuments and is the first in depth study of this fascinating topic suitable both for specialists and for anyone with a general interest The volume includes a Foreword by British archaeologist and academic Professor Sir Barry Cunliffe
