

Stonehenge of the Kings

A PEOPLE APPEAR

*Based on new evidence, this exciting reconstruction of
Stonehenge as the headquarters of a warrior society —
not an ancient cathedral or a prehistoric computer —
places the mysterious site in the context of
Bronze Age culture and sea trade*

Stonehenge Of The Kings A People Appear:

Stonehenge of the Kings Patrick Crampton, 1969 Temporary Palaces Richard Bradley, 2021-05-31 The Great Houses of the prehistoric and early medieval periods were enormous structures whose forms were modelled on those of domestic dwellings Most were built of wood rather than stone they were used over comparatively short periods they were frequently replaced in the same positions and some were associated with exceptional groups of artefacts Their construction made considerable demands on human labour and approached the limits of what was possible at the time They seem to have played specialised roles in ancient society but they have been difficult to interpret Were they public buildings or the dwellings of important people Were they temples or military bases and why were they erected during times of crisis or change How were their sites selected and how were they related to the remains of a more ancient past Although their currency extended from the time of the first farmers to the Viking Age the similarities between the Great Houses are as striking as the differences This study focuses on the monumental buildings of northern and northwestern Europe but draws on structures over a wide area extending from Anatolia as far as Brittany and Norway It employs ethnography as a source of ideas and discusses the concept of the House Society and its usefulness in archaeology The main examples are taken from the Neolithic and Iron Age periods but this account also draws on the archaeology of the first millennium AD The book emphasises the importance of comparing archaeological sequences with one another rather than identifying ideal social types In doing so it features a range of famous and less famous sites from Stonehenge to the Hill of Tara and from Old Uppsala to Yeavinger *The New York Times Book Review* ,1979 Presents extended reviews of noteworthy books short reviews essays and articles on topics and trends in publishing literature culture and the arts Includes lists of best sellers hardcover and paperback UFOs and the Extraterrestrial Contact Movement: The extraterrestrial contact movement George M. Eberhart, 1986 The Publishers' Trade List Annual ,1973 Catalogue of the Library of the Peabody Museum of Archaeology and Ethnology Peabody Museum of Archaeology and Ethnology. Fagan, Nadia Durrani, 2015-08-26 Understand major developments of human prehistory People of the Earth An Introduction to World Prehistory 14 e provides an exciting journey through the 7 million year old panorama of humankind's past This internationally renowned text provides the only truly global account of human prehistory from the earliest times through the earliest civilizations Written in an accessible way for beginning students People of the Earth shows how today's diverse humanity developed biologically and culturally over millions of years against a background of constant climatic change *The Dawn of Everything* David Graeber, David Wengrow, 2021-11-09 INSTANT NEW YORK TIMES BESTSELLER A dramatically new understanding of human history challenging our most fundamental assumptions about social evolution from the development of agriculture

and cities to the origins of the state democracy and inequality and revealing new possibilities for human emancipation For generations our remote ancestors have been cast as primitive and childlike either free and equal innocents or thuggish and warlike Civilization we are told could be achieved only by sacrificing those original freedoms or alternatively by taming our baser instincts David Graeber and David Wengrow show how such theories first emerged in the eighteenth century as a conservative reaction to powerful critiques of European society posed by Indigenous observers and intellectuals Revisiting this encounter has startling implications for how we make sense of human history today including the origins of farming property cities democracy slavery and civilization itself Drawing on pathbreaking research in archaeology and anthropology the authors show how history becomes a far more interesting place once we learn to throw off our conceptual shackles and perceive what's really there If humans did not spend 95 percent of their evolutionary past in tiny bands of hunter gatherers what were they doing all that time If agriculture and cities did not mean a plunge into hierarchy and domination then what kinds of social and economic organization did they lead to The answers are often unexpected and suggest that the course of human history may be less set in stone and more full of playful hopeful possibilities than we tend to assume The Dawn of Everything fundamentally transforms our understanding of the human past and offers a path toward imagining new forms of freedom new ways of organizing society This is a monumental book of formidable intellectual range animated by curiosity moral vision and a faith in the power of direct action Includes Black and White Illustrations *Choice* Richard K.

Rule Kevin Sharpe, 2013-06-30 In the climactic part of his three book series exploring the importance of public image in the Tudor and Stuart monarchies Kevin Sharpe employs a remarkable interdisciplinary approach that draws on literary studies and art history as well as political cultural and social history to show how this preoccupation with public representation met the challenge of dealing with the aftermath of Cromwell's interregnum and Charles II's restoration and how the irrevocably changed cultural landscape was navigated by the sometimes astute yet equally fallible Stuart monarchs and their successors
