**Body and the City in Western Civilization** Richard Sennett, 1996-03-17 This vivid history of the city in Western civilization tells the story of urban life through bodily experience Flesh and Stone is the story of the deepest parts of life how women and men moved in public and private spaces what they saw and heard the smells that assailed them where they ate how they dressed the mores of bathing and of making love all in the architecture of stone and space from ancient Athens to modern New York Early in Flesh and Stone Richard Sennett probes the ways in which the ancient Athenians experienced nakedness and the relation of nakedness to the shape of the ancient city its troubled politics and the inequalities between men and women The story then moves to Rome in the time of the Emperor Hadrian exploring Roman beliefs in the geometrical perfection of the body The second part of the book examines how Christian beliefs about the body related to the Christian city the Venetian ghetto cloisters and markets in Paris The final part of Flesh and Stone deals with what happened to urban space as modern scientific understanding of the body cut free from pagan and Christian beliefs Flesh and Stone makes sense of our constantly evolving urban living spaces helping us to build a common home for the increased diversity of bodies that make up the modern city *The Empty Place* Teresa Hoskyns, 2014-07-17 In The Empty Place Democracy and Public Space

Teresa Hoskyns explores the relationship of public space to democracy by relating different theories of democracy in political philosophy to spatial theory and spatial and political practice Establishing the theoretical basis for the study of public space Hoskyns examines the rise of representative democracy and investigates contemporary theories for the future of democracy focusing on the Chantal Mouffe's agonistic model and the civil society model of Jürgen Habermas She argues that these models of participatory democracy can co exist and are necessarily spatial The book then provides diverse perspectives on how the role of physical public space is articulated through three modes of participatory spatial practice The first focuses on issues of participation in architectural practice through a set of projects exploring the open spaces of a postwar housing estate in Euston The second examines the role of space in the construction of democratic identity through a feminist

architecture art collective producing space through writing performance and events The third explores participatory political democratic practice through social forums at global European and city levels Hoskyns concludes that participatory democracy requires a conception of public space as the empty place allowing different models and practices of democracy to co exist *The Building Stones of Kentucky* Charles Henry Richardson,1923 **The Parthenon Marbles and**

**International Law** Catharine Titi,2023-05-24 The Parthenon marbles case is the most famous international cultural heritage dispute concerning repatriation of looted antiquities the Parthenon marbles in the British Museum s Elgin Collection The case has polarised observers ever since Elgin had the marbles hacked out of the ancient temple at the turn of the 19th century in Ottoman occupied Athens In 1816 a debt stricken Elgin sold the marbles to the British government which subsequently entrusted them to the British Museum where they have remained since then Much ink has been spilled on the Parthenon marbles The ethical and cultural merits of their repatriation have been fiercely debated for years But what has generally not been considered are the legal merits of their return in light of contemporary international law This book is the first in legal scholarship to provide an international law perspective of the cause c l bre of international cultural heritage disputes and in doing so to clarify the new customary international law on the return of cultural property unlawfully removed from its original context The book which includes a foreword by Andrew Wallace Hadrill is a unique reference work on the legal case for the return of the Parthenon marbles and the new normative framework for the protection of cultural heritage

Partida,Barbara Schmidt-Dounas,2019-08-08 This book presents a range of topics conveying the broad scope of Richard Tomlinson s archaeological quests and echoing his own research methodologies it is a token of appreciation for a British professor of archaeology who spread knowledge of the Greek civilization manifesting the brilliant spirit of the versatile ancient Greek builders *Stones, Bones, and the Sacred* Alan H. Cadwallader,2016-12-16 A crucial text for any university course on the interaction of archaeology and the Bible The world of early Christians was not a world lived in texts it was a world saturated with material reality and concerns what where and when to eat or drink how to present oneself in the space of bodily life and that of death how to move from one place to another what impacted status or the adjudication of legal charges All these and more controlled so much of life in the ancient world The Christians were not immune from the impact of these realities Sometimes they absorbed their surrounds sometimes they quite explicitly rejected the material practices bearing in on them frequently they modified the practice and the rationale to create a significant Christian alternative The collection of essays in this volume come from a range of international scholars who for all their different interests and critical commitments are yet united in treasuring research into the Greek and Roman worlds in which Christians sought to make their way They offer these essays in honor of one who has made a lifetime s work in mining ancient material culture to extract nuggets of insight into early Christian dining practices Dennis E Smith Features Rich
