Eberhart,1986 Lost Cities of China, Central Asia and India David Hatcher Childress,1991 Explores some of the world s oldest and most remote countries in search of lost cities and ancient mysteries Written on Stone Joanne Parker,2009-10-02 This collection of essays is not interested in the unresolved questions about the origin original use and authentic meaning of the prehistoric monuments of the British Isles It is not concerned with their prehistory Rather it deals with the history of barrows standing stones and stone circles with the ways in which they have been viewed the meanings that have been attributed to them and the significant impact that they have had over the centuries on British life and culture from motivating artists authors musicians and film makers to inspiring New Age religions It is thus as interested in stones commonly believed to be megaliths like the foundation stones of the chapel in the Dartmoor village of South Zeal as in real remains In her recent study of Stonehenge the historian Rosemary Hill asserted Stonehenge does not belong to archaeology or not to archaeology alone Likewise this book is not written primarily for archaeologists or not for the interest of archaeologists alone It will also be of interest to social and cultural historians to those interested in fine art literature or film and to anyone fascinated by the construction of national local or counter cultural identities It should also intrigue anybody who lives near one of the thousands of prehistoric remains that add beauty and mystery to Britain s countryside The book surveys over eight hundred years of rediscovery study superstition inspiration fear restoration and destruction investigating how different generations saw their own anxieties beliefs and concerns reflected in the mysterious lives of the prehistoric builders By discussing the many different ways in which prehistoric remains have been treated in different periods the book interrogates any notion of objective approaches to archaeology Instead it asserts that what we think of as the past is in fact multiple and man made Thus if we are to effectively interpret and fully understand the prehistoric remains of the past a variety of disciplines and a range of approaches both traditional and unconventional will need to work together For this reason this book has been produced as a jointly authored text a collaboration between archaeologists folklorists
