Monuments in all countries; their age and uses ... With ... illustrations James FERGUSON (Architect),1872      Power in  
Stone Geoffrey Parker,2014-04-15 From ancient Persia to the Third Reich imperial powers have built cities in their image  
seeking to reflect their power and influence through a show of magnificence and a reflection of their values Statues pictures  
temples palaces all combine to produce the necessary justification for the wielding of power while intimidating opponents In  
Power in Stone Geoffrey Parker traces the very nature of power through history by exploring the structural symbolism of  
these cities Traveling from Persepolis to Constantinople Saint Petersburg to Beijing and Delhi Parker considers how these  
structures and monuments were brought together to make the most powerful statement and how that power was wielded to  
the greatest advantage He examines imperial leaders their architects and their engineers to create a new understanding of  
the relationship among buildings design and power He concludes with a look at the changing nature of power in the late  
twentieth and twenty first centuries and the way this is reflected symbolically in contemporary buildings and urban plans  
With illuminating images Power in Stone is a fascinating history of some of the world s most intriguing cities past and  
present      Guide Stone Monuments in All Countries James Fergusson,2023-03-24 Reprint of the original first published in

Fergusson,1872      **"A Dream of Stone"** Michael D. Garval,2004 With democratization of fame in the wake of the French  
Revolution writers enjoyed ever greater celebrity status But in nineteenth century France the availability and perceived  
impermanence of such renown cheapened it and prompted longing for enduring fame exemplified by monuments  
commemorative sculptural or architectural works helping a nation in flux define itself its past and anticipated future Within  
this cultural climate there evolved an ideal of great writers and their work as immortal that envisioned literary greatness  
through the metaphor of monuments and monumentality study draws upon wide ranging evidence from journalism to poetry  
caricature to statuary Focusing on the lives work and fame of Honore de Balzac George Sand and Victor Hugo it uncovers the  
salient features and traces the rise and fall of this monumentalizing vision of literary greatness largely forgotten today yet so

on Stone presents the full story of the men who built the cathedrals of the medieval era who they were how they lived and

how with the simplest of hand tools they created the astonishing buildings that hundreds of years later still stand as monuments to their ingenuity and skill Topics covered include the context for building such huge places of worship the men who built who they were and the challenges they had to face finding the materials construction techniques building control and finally who paid for it all      **Set in Stone?** Emma Login,2016-02-28 This book provides a holistic and longitudinal study of war memorialisation in the UK France and the USA from 1860 to 2014      Stones of England James Wimsett Boulding,1878      The White Stone Anatole France,1910      **Evangelical Christendom** ,1875      **Hearings** United States.
