Secret Spaces of Childhood Elizabeth N. Goodenough, 2010-03-23 Whether it's real or imaginary every child has a secret space and this remarkable book explores them all For some it's a treehouse or a hidden spot beneath a bush for others it's a private psychic refuge a favorite book or a dollhouse that becomes a stage for a young imagination As the more than four dozen pieces collected here reveal such spaces play a key role in a child's development and retain a symbolic power that resonates throughout our adult lives No reader will put this book down without experiencing a rush of familiar memories and new insights into that bygone world Poet Diane Ackerman evokes that parallel universe behind the eyes which no one shared or dare discover Paul Brodeur recalls the fort where he and his brother defended Cape Cod against invaders in World War II Nobelist Wole Soyinka offers a poignant verse portrait of Africa's lost children and Paul West remembers youthful encounters with his eccentric neighbors Edith and Osbert Sitwell Elsewhere Robert Coles summons up memories of his first years as a doctor and a wise young patient who taught him a lesson he has never forgotten and Mary Galbraith shows how childhood loss is transformed into art in Ludwig Bemelmans's classic *Madeline* And these are just a few of the gems in a treasury that includes Anne Frank the controversial photographs of Sally Mann and the crudely eloquent drawings of young South African refugees clinical case studies and profoundly personal imagery A perceptive thought provoking work for general readers *Secret Spaces of Childhood* opens a wonderful window on the world of the young Elizabeth Goodenough is Lecturer in Comparative Literature the Residential College University of Michigan

Nahmad-Williams, 2011-01-13 *Qualitative Research in Clinical Psychology and Psychotherapy in Latin America* Alemka Tomicic, Javiera Duarte Soto, 2025-08-11 This book presents a comprehensive overview of a distinctive tradition of qualitative research in clinical psychology and psychotherapy developed in Latin America Originating mainly from Chile Argentina and Peru this tradition has developed innovative qualitative methods to study indicators of change in psychotherapy mechanisms of change in the psychotherapeutic process and complex phenomena in clinical psychology and psychotherapy These three

lines of research are richly illustrated by the chapters brought together in this volume that showcase the work of psychotherapist researchers who developed a research approach that mirrors the qualitative nature of the psychotherapeutic work. Qualitative research in psychotherapy has shown significant developments in the context of the Global South. Much of this, in contrast to the strong quantitative tradition based on Randomized Clinical Trials (RCTs) developed in North America and Europe, is due to the fact that psychotherapy research societies in Latin America were organized by psychotherapists. This has created the identity of the psychotherapist researcher, a dual identity that entails the notion that psychotherapy research requires a qualitative dimension to make research a part of clinical practice and clinician identity regardless of their theoretical/technical orientations. This contributed volume aims to provide the reader an overview of the main qualitative methods developed by these psychotherapist researchers. **Qualitative Research in Clinical Psychology and Psychotherapy in Latin America: Creativity for Studying Complex Objects in Context** will be of interest to both researchers and practitioners in the fields of clinical psychology and psychotherapy interested in methodologies that can contribute to the organic incorporation of research into clinical practice and to the study of complex objects in context. Some chapters in this book were originally written in Spanish and translated into English with the help of artificial intelligence. A subsequent human revision was done primarily in terms of content.

The Oxford Handbook of the Development of Imagination Marjorie Taylor, 2013-04-02. Children are widely celebrated for their imaginations, but developmental research on this topic has often been fragmented or narrowly focused on fantasy. However, there is growing appreciation for the role that imagination plays in cognitive and emotional development as well as its link with children's understanding of the real world. With their imaginations, children mentally transcend time, place, and/or circumstance to think about what might have been, plan and anticipate the future, create fictional relationships and worlds, and consider alternatives to the actual experiences of their lives. **The Oxford Handbook of the Development of Imagination** provides a comprehensive overview of this broad new perspective by bringing together leading researchers whose findings are moving the study of imagination from the margins of mainstream psychology to a central role in current efforts to understand human thought. The topics covered include fantasy/reality distinctions, pretend play, magical thinking, narrative, anthropomorphism, counterfactual reasoning, mental time travel, creativity, paracosms, imaginary companions, imagination in non-human animals, the evolution of imagination, autism, dissociation, and the capacity to derive real-life resilience from imaginative experiences. Many of the chapters include discussions of the educational, clinical, and legal implications of the research findings, and special attention is given to suggestions for future research.

Storytelling across the Primary Curriculum Alastair K. Daniel, 2013-06-17. Starting from the question 'what is a story?' **Storytelling Across the Primary Curriculum** leads the reader through the theory and practice of storytelling as an educational method, a method taught by the author over the last ten years through Primary English teaching programmes. This practical book gives teachers the skills and confidence to use storytelling and the spoken

word in new and exciting ways in the classroom It will also give teachers the confidence to put down the book and trust themselves to tell rather than read a story It provides a wealth of examples of cross curricular teaching opportunities including a section on the ways in which the teaching of phonics can be embedded in the real language of story Storytelling Across the Primary Curriculum is ideal for trainee and practicing primary school teachers who want to develop their classroom practice within the field of storytelling Students on BA Primary BEd and PGCE courses particularly those specialising in English will also benefit from this book s stimulating and intuitive approach to teaching English language and literacy

Family Narratives and the Development of an Autobiographical Self Robyn Fivush, 2019-02-07 Stories are central to our world We form our families our communities and our nations through stories It is through stories of our everyday experiences that each of us constructs an autobiographical self a narrative identity that confers a sense of coherence and meaning to our individual lives In this volume Robyn Fivush describes how this deeply personal autobiographical self is socially and culturally constructed Family Narratives and the Development of an Autobiographical Self demonstrates that through participating in family reminiscing in which adults help children learn the forms and functions of talking about the past young children come to understand and evaluate their experiences and create a sense of self defined through individual and family stories that provide an anchor for understanding self others and the world Fivush draws on three decades of research from her own lab and from others to demonstrate the critical role that family stories and family storytelling play in child development and outcome This volume is essential reading for students and researchers interested in psychology human development and family studies

Beginning Writers in the Zone of Proximal Development Elizabeth Petrick-Steward, 2012-10-12 How do young children bridge the gap between writing a story with pictures and writing with words How children learn to use written words to tell a story is a topic important to both cognitive development and early literacy instruction Using the theoretical framework developed by Vygotsky the behavior of a group of prekindergarten children as they author two consecutive pieces of writing is analyzed The children tell their stories at first with spoken words and pictures As they discuss their work in progress in public conferences they discover how to build on and combine existing skills to produce a new skill telling stories with written words Current descriptive and theoretical perspectives on beginning writing are presented in this volume with a particular focus on Vygotsky's concept of the zone of proximal development a period of sensitivity in which learning advances The proposed mechanism of change is verbal mediation talk among peers and teachers as they discuss work in progress which moves the children through the zone of proximal development An open whole language approach to literacy instruction makes the classroom in this book an ideal arena in which to observe verbal mediation in operation Children are free to question criticize and argue and in the process

they collectively advance their developing ability to use written language The work is unique in that the rich and comprehensive data record is reproduced in its entirety More than 400 illustrations of the children's products two books apiece pictured before and after the children's revisions are included along with transcripts of the conferences about each of the pages permitting direct observation of the effects of verbal mediation This dynamic study documents change during a period of time when specific learning is occurring and provides strong support for the value and power of Vygotsky's theoretical framework
