Storm Over A Mountain Island:

Storm Over a Mountain Island Conrad A. Istock, Robert S. Hoffmann, 1995 Violent storms may occasionally sweep over southeastern Arizona's mountain islands but no natural storm was ever as fierce as the opposition to Mt Graham International Observatory The proposed telescope installation in the Pinaleño mountains roused little interest when it was first proposed in the early 1980s but the controversy eventually spread across the country and through the halls of government The observatory was a joint project between the University of Arizona and other U S universities the Vatican Observatory the Smithsonian Institution and the Max Planck Institute for Radio Astronomy in Germany and to astronomers it marked the beginning of a new generation of ground based astronomical instruments To many environmentalists however it represented a threat to a fragile mountain island ecosystem and to some Apaches it meant the desecration of sacred land As planning quietly progressed what had been merely rumblings of objection exploded in 1988 into a storm of unyielding protest led by Earth First local Audubon Society chapters the Sierra Club and others In *Storm over a Mountain Island* scientists from across the country show that the Mt Graham controversy was far more than a local issue Contributors in the fields of conservation biology astronomy botany biogeography and genetics examine the purpose and promise of ground based observatories the forest structure and history of the Pinaleños the biogeographical basis for the conservation of the Pinaleños and the biology and vulnerability of isolated species such as the Mt Graham Red Squirrel In addition several contributors explore the political and legal ramifications of the controversy and the unfolding of one of the most fascinating stories in the annals of environmental conflict The Mt Graham affair which continues to provoke debate will not be the last time that the interests of science and the desire for enduring preservation collide *Storm over a Mountain Island* offers a comprehensive case study for scientists land managers policymakers and environmentalists who will face future ecological controversies

Huggard, Arthur R. Gómez, 2016-12-15 The devastating fire that swept through Los Alamos New Mexico in the spring of 2000 may have been caused by one controlled burn gone wild but it was far from an isolated event All through the twentieth century our national forests have been under assault from all sides first ranchers and loggers laid their claims to our national forests then recreationists and environmentalists spoke up for their interests Who are our national forests really for In this book leading environmental historians show us what has been happening to these fragile woodlands Taking us from lumber towns to Indian reservations to grazing lands *Forests under Fire* reveals the interaction of Anglos Hispanics and Native Americans with the forests of the American Southwest It examines recent controversies ranging from red squirrel conservation on Mt Graham to increased tourism in our national forests These case studies offer insights into human forest relationships in places such as the Coconino National Forest the Vallecitos Sustained Yield Unit and the Gila Wilderness Area while also drawing on issues and

concerns about similar biospheres in other parts of the West Over the past century forest management has evolved from a field dominated by the conservationist perspective with humans exploiting natural resources to one that emphasizes biocentrism in which forests are seen as dynamic ecosystems Yet despite this progressive shift the assault on our forests continues through overgrazing of rangelands lumbering eroding mountainsides fire suppression and threats to the habitats of endangered species Forests under Fire takes a closer look at the people calling the shots in our national forests from advocates of timber harvesting to champions of ecosystem management and calls for a reassessment of our priorities before our forests are gone Contents Introduction Toward a Twenty First Century Forest Ecosystem Management Strategy Christopher J Huggard Industry and Indian Self Determination Northern Arizona s Apache Lumbering Empire 1870 1970 Arthur R G mez A Social History of McPhee Colorado s Largest Lumber Town Duane A Smith The Vallecitos Federal Sustained Yield Unit The All Too Human Dimension of Forest Management in Northern New Mexico 1945 1998 Suzanne S Forrest Grazing the Southwest Borderlands The Peloncillo Animas District of the Coronado National Forest in Arizona and New Mexico 1906 1996 Diana Hadley America s First Wilderness Area Aldo Leopold the Forest Service and the Gila of New Mexico 1924 1980 Christopher J Huggard Where There s Smoke Wildfire Policy and Suppression in the American Southwest John Herron Struggle in an Endangered Empire The Search for Total Ecosystem Management in the Forests of Southern Utah 1976 1999 Thomas G Alexander Biopolitics A Case Study of Political Influence on Forest Management Decisions Coronado National Forest Arizona 1980s 1990s Paul W Hirt Epilogue Seeing the Forest Not for the Trees The Future of Southwestern Forests in Retrospect Hal K Rothman Squirrels Richard W. American Southwest is one of the most hauntingly beautiful regions on earth Yet staggering population growth combined with the intensifying effects of climate change is driving the oasis based society close to the brink of a Dust Bowl scale catastrophe In A Great Aridness William deBuys paints a compelling picture of what the Southwest might look like when the heat turns up and the water runs out This semi arid land vulnerable to water shortages rising temperatures wildfires and a host of other environmental challenges is poised to bear the heaviest consequences of global environmental change in the United States Examining interrelated factors such as vanishing wildlife forest die backs and the over allocation of the already stressed Colorado River upon which nearly 30 million people depend the author narrates the landscape s history and future He tells the inspiring stories of the climatologists and others who are helping untangle the complex interlocking causes and effects of global warming And while the fate of this region may seem at first blush to be of merely local interest what happens in the Southwest deBuys suggests will provide a glimpse of what other mid latitude arid lands worldwide the Mediterranean Basin southern Africa and the Middle East will experience in the coming years Written with an elegance that recalls the prose of John McPhee and Wallace Stegner A Great Aridness offers an unflinching look at the dramatic effects of climate change occurring right now in our own backyard Mammalogy , **The Defiant** Dawson Barrett,2018-05-08 The history of the United States is a history of oppression and inequality as well as raucous opposition to the status quo It is a history of slavery and child labor but also the protest movements that helped end those institutions In this book Dawson Barrett calls our attention to the post 1960s period in which he posits that US economic cultural and political elites turned the tide against the protest movement gains of the previous forty years and reshaped the ability of activists to influence the political process Amazon com "The Land of the Sky;" Or, Adventures in Mountain By-ways Christian Reid,1876 Christian Reid Mrs Frances
