The Cartographer And The Literati Herman Moll And His Intellectual Circle:

The Cartographer and the Literati Dennis Reinhartz,1997 **Britain and Colonial Maritime War in the Early Eighteenth Century** Shinsuke Satsuma,2013 In early modern Britain there was an argument that war at sea especially war in Spanish America was an ideal means of warfare offering the prospect of rich gains at relatively little cost whilst inflicting considerable damage on enemy financial resources In early modern Britain there was an argument that war at sea especially war in Spanish America was an ideal means of warfare offering the prospect of rich gains at relatively little cost whilst inflicting considerable damage on enemy financial resources This book examines that argument tracing its origin to the glorious memory of Elizabethan maritime war discussing its supposed economic advantages and investigating its influence on British politics and naval policy during the War of the Spanish Succession 1702-13 and after The book reveals that the alleged economic advantages of war at sea were crucial in attracting the support of politicians of different political stances It shows how supporters of war at sea both in the government as well as in the opposition tried to implement pro maritime war policy by naval operations colonial expeditions and by legislation and how their attempts were often frustrated by diplomatic considerations the incapacity of naval administration and by conflicting interests between different groups connected to the West Indian colonies and Spanish American trade It demonstrates how after the War of the Spanish Succession arguments for active colonial maritime war continued to be central to political conflict notably in the opposition propaganda campaigns against the Walpole ministry culminating in the War of Jenkins's Ear against Spain in 1739 The book also includes material on the South Sea Company showing how the foundation of this company later the subject of the notorious Bubble was a logical part of British strategy Shinsuke Satsuma completed his doctorate in maritime history at the University of Exeter

Representations of the Moon in Literature and Art Gabriela Gândara Terenas,2024-10-19 This book brings together a collection of essays on the occasion of the fiftieth anniversary of the arrival of the first man on the moon a time when tourist journeys to the moon now a real possibility were no more than a fantasy Divided into four sections illustrating different perceptions of the moon the common aim of the essays in this book is to examine how mankind's interest in the moon has been represented in Literature and the Arts an objective underpinned by the desire to exploit the relationship between the so called two cultures the Humanities and Science as C P Snow perceived them in his pioneering work 1959 The plethora of ways in which our companion satellite has been portrayed has led the authors of the essays to draw upon research from the history of science as well as from literary cultural and artistic studies In addition to analysing the impact on literature and music of our arrival on the moon whether real or imaginary these studies also examine how writers along the centuries have appropriated the moon as a metaphor in order to project latent conflict criticise the society or politics of their day reflect upon scientific or technological discoveries or fantasise about journeys encounters or imaginary realities **When France was King of Cartography** Christine Marie Petto,2007-01-01 When France Was King of Cartography investigates over a

thousand maps and nearly two dozen map producers analyzes the map as a cultural artifact map producers as a group and the array of map viewers over the course of two centuries in France The book focuses on situated knowledge or localized interests reflected in these geographical productions Through the lens of mapmaking it examines the relationship between power and the practice of patronage geography and commerce in early modern France *The History of Cartography, Volume 4* Matthew H. Edney, Mary Sponberg Pedley, 2020-05-15 Since its launch in 1987 the History of Cartography series has garnered critical acclaim and sparked a new generation of interdisciplinary scholarship Cartography in the European Enlightenment the highly anticipated fourth volume offers a comprehensive overview of the cartographic practices of Europeans Russians and the Ottomans both at home and in overseas territories from 1650 to 1800 The social and intellectual changes that swept Enlightenment Europe also transformed many of its mapmaking practices A new emphasis on geometric principles gave rise to improved tools for measuring and mapping the world even as large scale cartographic projects became possible under the aegis of powerful states Yet older mapping practices persisted Enlightenment cartography encompassed a wide variety of processes for making circulating and using maps of different types The volume's more than four hundred encyclopedic articles explore the era's mapping covering topics both detailed such as geodetic surveying thematic mapping and map collecting and broad such as women and cartography cartography and the economy and the art and design of maps Copious bibliographical references and nearly one thousand full color illustrations complement the detailed entries *Mapping and Charting in Early Modern England and France* Christine Petto, 2015-03-26 Mapping and Charting for the Lion and the Lily Map and Atlas Production in Early Modern England and France is a comparative study of the production and role of maps charts and atlases in early modern England and France with a particular focus on Paris the cartographic center of production from the late seventeenth century to the late eighteenth century and London which began to emerge in the late eighteenth century to eclipse the once favored Bourbon center The themes that carry through the work address the role of government in map and chart making In France in particular it is the importance of the centralized government and its support for geographic works and their makers through a broad and deep institutional infrastructure Prior to the late eighteenth century in England there was no central controlling agency or institution for map chart or atlas production and any official power was imposed through the market rather than through the establishment of institutions There was no centralized support for the cartographic enterprise and any effort by the crown was often challenged by the power of Parliament which saw little value in fostering or supporting scholar geographers or a national survey This book begins with an investigation of the imagery of power on map and atlas frontispieces from the late sixteenth century to the seventeenth century In the succeeding chapters the focus moves from county and regional mapping efforts in England and France to the paper wars over encroachment in their respective colonial interests The final study looks at charting efforts and highlights the role of government support and the commercial trade in the development of maritime charts not only for

the home waters of the English Channel but the distant and dangerous seas of the East Indies *The Cartographic State* Jordan Branch,2014 This book describes the emergence of the territorial state and examines the role that cartography has played in shaping its linear boundaries **Colonial and Global Interfacings** Gary Backhaus,2009-03-26 How space is owned through practices of domination that emerged through colonialism and have been sustained through capitalist social relations in a post colonial context How Imperial power created in Foucault s words a boomerang effect whereby the techniques developed to control and subjugate colonial subjects worked with such efficiency that they were imported back into Western societies to create new orders of control How while new social movements such as the Zapatistas have remapped the rural and developed new ways to challenge and transform politics Western societies have sought to reconstruct the world order through economic processes and military strategy How the self image of the West is shaped by its relationship with the Rest but also how the rest has found new ways of constructing identity that are now transforming the West as people images commodities and meanings flow through the global economy The cases considered cover every continent contrast the West with the East as well as the global North with the global South and prompt us to take history seriously in the construction of the present Addressing the current buzzwords that have spread from geography across the social sciences and the humanities this book will appeal to researchers and practitioners fascinated by the connections between cultural representation power spatiality and how the ways we have been thinking about the world are open to question *MapForum* ,2004 **British Discovery Literature and the Rise of Global Commerce** A. Neill,2002-05-10 British Discovery Literature and the Rise of Global Commerce examines how between 1680 and 1800 British maritime travellers became both friends and foes of the commercial state These nomadic characters report on remote parts of the globe in the twin contexts of an increasingly powerful imperial state and an emerging world economy Examining voyage narratives by William Dampier Daniel Defoe Jonathan Swift Tobias Smollett Samuel Johnson James Cook and William Bligh Neill demonstrates how the transformation of travellers from nomadic outlaws into civil subjects and vice versa takes place against the political economic backdrop of commercial expansion *China and the Writing of English Literary Modernity, 1690-1770* Eun Kyung Min,2018-04-19 Argues that eighteenth century literature defined itself as English and modern by engaging with debates about Chinese history and culture Mapping And Imagination In The Great Basin Richard V. Francaviglia,2005-03-07 The Great Basin was the last region of continental North America to be explored and mapped and it remained largely a mystery to Euro Americans until well into the nineteenth century In Mapping and Imagination in the Great Basin geographer historian Richard Francaviglia shows how the Great Basin gradually emerged from its cartographic silence as terra incognita and how this fascinating process both paralleled the development of the sciences of surveying geology hydrology and cartography and reflected the changing geopolitical aspirations of the European colonial powers and the United States Francaviglia s interdisciplinary account of the mapping of the Great Basin combines a chronicle of the

exploration of the region with a history of the art and science of cartography and of the political economic and cultural contexts in which maps are created It also offers a compelling wide ranging discussion that combines a description of the daunting physical realities of the Great Basin with a cogent examination of the ways humans from early Native Americans to nineteenth century surveyors to twentieth century highway and air travelers have understood defined and organized this space psychologically and through the medium of maps Mapping and Imagination in the Great Basin continues Francaviglia's insightful richly nuanced meditation on the Great Basin landscape that began in *Believing in Place*

The Social Life of Maps in America, 1750-1860 Martin Brückner, 2017-10-26 In the age of MapQuest and GPS we take cartographic literacy for granted We should not the ability to find meaning in maps is the fruit of a long process of exposure and instruction A carto coded America a nation in which maps are pervasive and meaningful had to be created The Social Life of Maps tracks American cartography's spectacular rise to its unprecedented cultural influence Between 1750 and 1860 maps did more than communicate geographic information and political pretensions They became affordable and intelligible to ordinary American men and women looking for their place in the world School maps quickly entered classrooms where they shaped reading and other cognitive exercises giant maps drew attention in public spaces miniature maps helped Americans chart personal experiences In short maps were uniquely social objects whose visual and material expressions affected commercial practices and graphic arts theatrical performances and the communication of emotions This lavishly illustrated study follows popular maps from their points of creation to shops and galleries schoolrooms and coat pockets parlors and bookbindings Between the decades leading up to the Revolutionary War and the Civil War early Americans bonded with maps Martin Brückner's comprehensive history of quotidian cartographic encounters is the first to show us how

Negotiating Waters: Seas, Oceans, and Passageways in the Colonial and Postcolonial Anglophone World André Dodeman, Nancy Pedri, 2020-01-31 This book examines how seas oceans and passageways have shaped and reshaped cultural identities spurred stories of reunion and separation and redefined entire nations It explores how entire communities have crossed seas and oceans voluntarily or not to settle in foreign lands and undergone identity cultural and literary transformations It also explores how these crossings are represented The book thus contributes to oceanic studies a field of study that asks how the seas and oceans have and continue to affect political narratives of exploration cartography international maritime law identity insularity and literary issues survival narratives fishing stories Divided into three sections Negotiating Waters explores the management the crossings and the re imaginings of the seas and oceans that played such an important role in the configuration of the colonial and postcolonial world and imagination In their careful considerations of how water figures prominently in maps travel journals diaries letters and literary narratives from the 17th century onwards the three thematic sections come together to shed light on how water in all of its shapes and forms has marked lands nations and identities They thus offer readers from different disciplines and with different colonial and postcolonial interests the possibility to investigate

and discover new approaches to maritime spaces By advancing views on how seas and oceans exert power through representation *Negotiating Waters* engages in important critical work in an age of rising concern about maritime environments

Mapping and Empire Dennis Reinhartz, Gerald D. Saxon, 2010-01-01 From the sixteenth through the mid nineteenth centuries Spain then Mexico and finally the United States took ownership of the land from the Gulf Coast of Texas and Mexico to the Pacific Coast of Alta and Baja California today s American Southwest Each country faced the challenge of holding on to territory that was poorly known and sparsely settled and each responded by sending out military mapping expeditions to set boundaries and chart topographical features All three countries recognized that turning terra incognita into clearly delineated political units was a key step in empire building as vital to their national interest as the activities of the missionaries civilian officials settlers and adventurers who followed in the footsteps of the soldier engineers With essays by eight leading historians this book offers the most current and comprehensive overview of the processes by which Spanish Mexican and U S soldier engineers mapped the southwestern frontier as well as the local and even geopolitical consequences of their mapping Three essays focus on Spanish efforts to map the Gulf and Pacific Coasts to chart the inland Southwest and to define and defend its boundaries against English French Russian and American incursions Subsequent essays investigate the role that mapping played both in Mexico s attempts to maintain control of its northern territory and in the United States push to expand its political boundary to the Pacific Ocean The concluding essay draws connections between mapping in the Southwest and the geopolitical history of the Americas and Europe

Cultural Economies of the Atlantic World Victoria Barnett-Woods, 2020-04-08 *Cultural Economies* explores the dynamic intersection of material culture and transatlantic formations of capital in the long eighteenth century It brings together two cutting edge fields of inquiry Material Studies and Atlantic Studies into a generative collection of essays that investigate nuanced ways that capital material culture and differing transatlantic ideologies intersected This ambitious provocative work provides new interpretive critiques and methodological approaches to understanding both the material and the abstract relationships between humans and objects including the objectification of humans in the larger current conversation about capitalism and inevitably power in the Atlantic world Chronologically bracketed by events in the long eighteenth century circum Atlantic these essays employ material case studies from littoral African states to abolitionist North America to Caribbean slavery to medicinal practice in South America providing both broad coverage and nuanced interpretation Holistically *Cultural Economies* demonstrates that the eighteenth century Atlantic world of capital and materiality was intimately connected to both large and small networks that inform the hemispheric and transatlantic geopolitics of capital and nation of the present day

The Geographic Revolution in Early America Martin Brückner, 2012-12-01 The rapid rise in popularity of maps and geography handbooks in the eighteenth century ushered in a new geographic literacy among nonelite Americans In a pathbreaking and richly illustrated examination of this transformation Martin Brückner argues that geographic literacy as it was played out in popular

literary genres written for example by William Byrd George Washington Thomas Jefferson Royall Tyler Charles Brockden Brown Meriwether Lewis and William Clark significantly influenced the formation of identity in America from the 1680s to the 1820s Drawing on historical geography cartography literary history and material culture Br ckner recovers a vibrant culture of geography consisting of property plats and surveying manuals decorative wall maps and school geographies the nation s first atlases and sentimental objects such as needlework samplers By showing how this geographic revolution affected the production of literature Br ckner demonstrates that the internalization of geography as a kind of language helped shape the literary construction of the modern American subject Empirically rich and provocative in its readings *The Geographic Revolution in Early America* proposes a new geographical basis for Anglo Americans understanding of their character and its expression in pedagogical and literary terms

The Commerce of Cartography Mary Sponberg

Pedley,2022-06-30 Though the political and intellectual history of mapmaking in the eighteenth century is well established the details of its commercial revolution have until now been widely scattered In *The Commerce of Cartography* Mary Pedley presents a vivid picture of the costs and profits of the mapmaking industry in England and France and reveals how the economics of map trade affected the content and appearance of the maps themselves Conceptualizing the relationship between economics and cartography Pedley traces the process of mapmaking from compilation production and marketing to consumption reception and criticism In detailing the rise of commercial cartography Pedley explores qualitative issues of mapmaking as well Why for instance did eighteenth century ideals of aesthetics override the modern values of accuracy and detail And what to an eighteenth century mind and eye qualified as a good map A thorough and engaging study of the business of cartography during the Enlightenment *The Commerce of Cartography* charts a new cartographic landscape and will prove invaluable to scholars of economic history historical geography and the history of publishing

Geographies of an Imperial Power Jeremy Black,2018-01-06 From explorers tracing rivers to navigators hunting for longitude spatial awareness and the need for empirical understanding were linked to British strategy in the 1700s This strategy in turn aided in the assertion of British power and authority on a global scale In this sweeping consideration of Britain in the 18th century Jeremy Black explores the interconnected roles of power and geography in the creation of a global empire Geography was at the heart of Britain s expansion into India its response to uprisings in Scotland and America and its revolutionary development of railways Geographical dominance was reinforced as newspapers stoked the fires of xenophobia and defined the limits of cosmopolitan Europe as compared to the barbarism beyond Geography provided a system of analysis and classification which gave Britain political cultural and scientific sovereignty Black considers geographical knowledge not just as a tool for creating a shared cultural identity but also as a key mechanism in the formation of one of the most powerful and far reaching empires the world has ever known
