The Case Against Suicide:

The Case Against Suicide William V. Rauscher,1981-01-01 **Assisted Suicide: The Liberal, Humanist Case Against Legalization** K. Yuill,2013-03-05 This book presents an atheistic case against the legalization of assisted suicide Critical of both sides of the argument it questions the assumptions behind the discussion Yuill shows that our attitudes towards suicide not euthanasia are most important to our attitudes towards assisted suicide **On Suicide** William Wynn Westcott,2022-01-04 In every age of the world and in the history of almost every country we find instances more or less numerous of men and women who preferring the dim uncertainty of the future to the painful realities of the present have sought relief from all their troubles by suddenly terminating their own existence Misery and pain have been the lot of the human race ever since the dawn of history and these causes have from the earliest times induced persons to destroy themselves and even the fear of eternal punishment has not sufficed to deter them This book examines the history causation and jurisprudence of suicide Particularly valuable are the author s professional insights As a Deputy Coroner the author shares many personal experiences from his career where he dealt directly with suicide victims On Suicide Emile Durkheim,2006-09-28 Emile Durkheim s *On Suicide* 1897 was a groundbreaking book in the field of sociology Traditionally suicide was thought to be a matter of purely individual despair but Durkheim recognized that the phenomenon had a social dimension He believed that if anything can explain how individuals relate to society then it is suicide Why does it happen What goes wrong Why do certain social religious or racial groups have higher incidences of suicide than others As Durkheim explored these questions he became convinced that abnormally high or low levels of social integration lead to an increased likelihood of suicide *On Suicide* was the result of his extensive research Divided into three parts individual reasons for suicide social forms of suicide and the relation of suicide to society as a whole Durkheim s revelations have fascinated challenged and informed readers for over a century *The Weekly Underwriter and the Insurance Press* ,1928 A Study on Suicide Jianjun Li,2019-11-26 This book systematically presents and classifies the latest advances in suicide research in contemporary China examines the status quo of suicides in China and analyzes the reasons for suicides among three high risk groups namely rural females teenagers and the elderly It reveals the deep seated influence of traditional Chinese values and socio cultural customs on suicide and puts forward a way to prevent suicide This book argues that high suicide rates stem from flaws in the social fabric Effectively reducing suicide rates and mitigating the damage done by suicide as a social disease is not only the responsibility of the state government but also that of social educational and medical professionals *The Insurance Law Journal* ,1900 **Creative Morality** Don MacNiven,2002-09-11 *Creative Morality* is a philosophical study of moral dilemmas Western moral thought has relied on two basic ethical perspectives Utilitarianism and Kantianism to resolve dilemmas MacNiven argues that no real progress can be made with modern moral problems unless these traditions are coherently synthesised The book deals with diverse topics such as academic honesty medical confidentiality terrorism

and euthanasia and the hypothetical dilemmas used are based on real life situations so that theory might be tested against reality Yet the solutions are not definitive because as MacNiven demonstrates creativity is an intrinsic characteristic of moral thought **American law reports annotated** ,1920 Suicide Explained Federico Sanchez,2007-12-14 Finally a book that explains suicide a must read for the survivors of suicide who want to understand why suicide happens and it also should prove extremely helpful for anyone suffering mental disorders The material in this book should be incorporated into the curriculum of psychology and psychiatry because suicide is such a vital topic hardly covered in medical schools It is an important book for all professionals who deal with mental disorders in general and suicide in particular It is the authors fourth book where suicide is explained not as a mysterious process but as a natural consequence of the reactions of the brain under certain conditions when suffering mental disorders In this book on suicide the author begins with a brief summary of the statistics of the whos the hows and the wheres of suicide This gives us a clear idea of the magnitude of the problem of suicide of the cost not only in lives but of the emotional toll of the survivors as well as the financial burdens on society as a whole Then as an important first step to understanding the medical communitys standard approaches to mental disease he reviews briefly the current psychiatric terminology and the diagnostic tools concerning mental disorders He presents the most accepted current theories and models of suicide He explains what a psychiatric emergency is and what to expect if one ever encounters such a situation And he explains how suicide risk assessment is currently done along with other important considerations He proceeds to explain in every day language where possible his theory of how the brain works beginning with a simple explanation of how neurons communicate with each other Later he explains how the brain controls the body and how we see with the back of our heads how memory systems become a logical extension or expansion of our sensory and motor systems Awareness and attention are introduced first as an evolutionary tool that aids the senses gather more information from the environment and ultimately as tools that aid in thinking reasoning and constructing our past our lives and our identities But all this would mean nothing without the introduction of emotions and how the brain constructs contexts He explains how emotions are an integral part of memories and how these are related to contexts how basically the brain has created a very concise and compact filing memory system A clear explanation of how emotions are triggered regulated and dissipated is next These leads to a learned discussion of how these various systems can go haywire leading to mental disorders A brief but perhaps new and revolutionary approach to these mental disorders is presented next including Obsessive Compulsive Disorder Delirium Dementia and Other Amnestic Disorders Manic Depression and Depression and Schizophrenia Ultimately it becomes clear how under certain conditions these disorders can lead to suicide He then presents a suicide autopsy as an exercise to show how varied the opinions of experts in the field of suicidology are and compares it to his own theories and lets the reader decide for himself who is closer to the truth Finally he gives a few words of advice on various therapies and the rationality of their approaches and cautions against their limitations He closes with some important

suggestions of how to lessen suicide rates particularly among the young *Clinical Interviewing, with Video Resource*
Center John Sommers-Flanagan, Rita Sommers-Flanagan, 2015-06-29 Clinical Interviewing Fifth Edition blends a personal and easy to read style with a unique emphasis on both the scientific basis and interpersonal aspects of mental health interviewing It guides clinicians through elementary listening and counseling skills onward to more advanced complex clinical assessment processes such as intake interviewing mental status examination and suicide assessment Fully revised the fifth edition shines a brighter spotlight on the development of a multicultural orientation the three principles of multicultural competency collaborative goal setting the nature and process of working in crisis situations and other key topics that will prepare you to enter your field with confidence competence and sensitivity **Bibliography on Suicide and Suicide Prevention, 1897-1957, 1958-1967** National Institutes of Health (U.S.), 1969 **Bibliography on Suicide and Suicide Prevention, 1897-1957, 1958-1967** Norman L. Farberow, 1969 3469 numbered references that are intended as a single reference source to professional personnel concerned with suicide Generally does not include literature about medical physiological and surgical aspects of the subject Foreign literature included Arranged into 2 parts i e 1897 1957 and 1958 1967 Each part includes alphabetical listing by authors as well as author and subject indexes **Bibliography on Suicide and Suicide Prevention, 1897-1957, 1958-1970** Norman L. Farberow, 1972 On Suicide Jean Amery, 1999-07-22 On Suicide is neither a defense of suicide nor an invitation to assisted suicide but an analysis of the state of mind of those who are suicidal and who actually do commit suicide It is also a strident defense of the freedom of the individual and a plea for the recognition of the fact that we belong to ourselves before belonging to another person or an institution nation or religion and that our right to choose to end our life can have priority over social entanglements and biological destiny Book jacket **The Right to Be Protected from Committing Suicide** Jonathan Herring, 2022-06-16 This book argues that suicidal people have the right to receive treatment and for reasonable steps to be taken that they are protected from killing themselves Those suffering threats to life from mental health issues deserve the same protection as those who face threats to life from ill health or violence from others The book explores the ethical and legal case for giving those beset with suicidal thoughts the treatment they need and for reasonable steps to be taken to prevent them attempting suicide Debates around suicide tend to be dominated by cases involving those with terminal medical conditions seeking assisted dying But of those wishing to die it is far more common to find middle aged men and young people oppressed by mental health and personal problems Too often the woeful failure in the funding of mental health services in the UK means that suicidal people are denied the support and help they desperately need This ground breaking book makes the legal and ethical case for recognising that the state and public authorities have a duty to provide and implement an effective suicide prevention strategy *Reports of Cases Determined by the Supreme Court of the State of Missouri* Missouri. Supreme Court, 1918 Undeserved Death: A Study on Suicide of Farmers in Andhra Pradesh (2000 - 2005) K.S. Bhat, S. Vijaya Kumar, 2006-07-12 The multi dimensional nature of

farmers distress in several states of India is pushing farmers to commit suicides. The deficiencies in institutional factors those related to credit insurance supply of inputs such as seeds fertilizers pesticides and marketing are becoming serious. Social factors such as the non empowerment of elected local bodies the exploitative attitude of moneylenders and merchants and gender discrimination are aggravating the deprivation of small and marginal farmers and landless agricultural labourers. Compounding the crumbling institutional and social support systems are the other factors such as disconnection between research education and extension organizations and rural realities land degradation unsustainable exploitation of groundwater and consecutive droughts. All these resulted in the agrarian crisis more particularly in Andhra Pradesh Karnataka Kerala Tamilnadu Maharashtra Madhya Pradesh Orissa Gujarat and Punjab. Analyzing some of these factors pertaining to agrarian crisis and farmer s suicides a pilot study and other articles in this book analytically bring out the prevailing situation in Andhra Pradesh. A few articles in the book also highlight the situation in Karnataka Maharashtra and Punjab. Some of the implications discussed by the academicians activists researchers and others will definitely help the policy makers in their future programme to safeguard and strengthen the livelihood security of the families of resource poor small and marginal farmers. The book will be of immense use both for the scholars and the government authorities.

Suicide - The Ultimate Rejection? Pritchard, 1995-10-01 This book looks at suicide in a cross cultural context showing how it is differently understood in different ethnic groups reflecting various degrees of stigma. It argues for greater recognition of these key differences between cultures and ethnic groups and shows how important they can be to our understanding and intervention as well as considering the practical and moral issues raised by euthanasia.

Essential Papers on Suicide

John T. Malsberger, Mark Goldblatt, 1996-08 An exploration of the motivations characteristics and psychology of suicide. Why do people take their own lives? How can clinicians best plan and carry out intelligent treatment of desperate patients who are giving up on themselves?
