The Case Of The Hijacked Moon:

The Case of the Hijacked Moon Thomas Brace Haughey, 1981-05-01 **The case of Hijacked moon** Thomas Brace Haughey, **The Alternative Sherlock Holmes** Peter Ridgway Watt, Joseph Green, 2017-03-02 Between 1887 and 1927 Sir Arthur Conan Doyle wrote sixty Sherlock Holmes stories and his great Canon has become the most praised most studied and best known chapter in the history of detective fiction Over twenty thousand publications pertaining to the Sherlock Holmes phenomenon are known to have been published most of them historical and critical studies In addition however almost since the first stories appeared such was their uniqueness and extraordinary attraction that other authors began writing stories based on or derived from them A new genre had appeared pastiches parodies burlesques and stories that attempted to copy or rival the great detective himself As the field widened there was hardly a year in the twentieth century in which new short stories or novels did not appear Many hundreds are now known to have been published some of them written by authors well known for their work in other literary fields The non canonical Sherlock Holmes literature not only constitutes a literary field of considerable historical interest but includes many stories that are both enjoyable and fascinating in their own right Although a large bibliography on these stories exists and a few limited anthologies have been published no attempt has previously been made to collect them all and discuss them comprehensively The Alternative Sherlock Holmes does so it provides a new and valuable approach to the Sherlock Holmes literature as well as making available many works that have for years remained forgotten Presented as an entertaining narrative of interest to both the aficionado and the scholar it provides full bibliographic data on virtually all the known stories in the field The Secret Influence of the Moon Louis Proud, 2013-12-01 The Moon is not a cold dead rock but a rich fascinating world just as alive as Earth Investigates the Moon as the home of an alien intelligence who controls humanity Examines several of NASA's Apollo missions and the findings they concealed Reveals the many holes in the Giant Impact theory about the Moon's origins and the evidence for a hollow artificial Moon Explores the deep influence of the Moon on the collective mind of humanity and occult teachings about the Moon from the Qabbalah tarot and other sources Despite being the most prominent celestial body after the Sun the Moon has many qualities that science has yet to explain Lunar rock samples reveal the Moon once had a magnetic field like the Earth and seismic experiments by NASA suggest the Moon is at least partially hollow For centuries people have observed lights moving clouds and shadows and even the disappearance of entire craters via telescope Apollo astronauts repeatedly felt the presence of a non human intelligence during their Moon visits and many indigenous traditions speak of malevolent visitors from the Moon A growing body of astrophysical and geological evidence shows the Moon is not an entirely natural world that someone or something altered it long ago Louis Proud explores the phases and movements of the Moon along with its ancient and mysterious features its craters maria rilles tunnels and domes He examines several of NASA's Apollo missions showing not that NASA faked the Moon expeditions but that they concealed what the astronauts found there He explains the many holes

in the commonly accepted Giant Impact theory of the Moon's origins and reveals the evidence for a hollow artificial Moon placed in orbit eons ago to observe Earth Examining the deep influence of the Moon on the collective mind of humanity Proud looks at what the Qabalah the tarot and other occult traditions say about the Moon and interprets G I Gurdjieff's teachings that we are food for the Moon He investigates the Moon as a gateway to another realm as the Purgatory of Christianity and as the home of an alien intelligence who controls and exploits humanity Examining the Moon from both scientific and esoteric perspectives Proud shows the Moon is not a cold dead rock but a rich fascinating world just as alive as Earth **The Subject is Murder** Albert J. Menendez, 1986 **Synod of Sleuths** Jon L. Breen, Martin Harry

Greenberg, 1990 In this collection of original essays several prominent writers and critics of the genre examine the interface of theology and detection Edward D Hoch discusses Roman Catholic sleuths James Yaffe discusses Jews in detective fiction Marvin Lachman discusses the use of religious cults as mystery story backgrounds co editor Breen writes of Protestant religious mysteries and on Mormonism in the mystery and four authors of mysteries about religious detectives William X Kienzle Ellis Peters Harry Kemelman and Sister Carol Anne O Marie respond to a series of questions about their work

Review , 1988 The Bootlegger John E. Hallwas, 1998 So begins this captivating and rich tale of a struggling British immigrant mining town and a controversial criminal who arose there early in the century Racing to a Cure Neil Ruzic, 2024-04-22 Racing to a Cure is not a cancer memoir It is a cancer cure memoir In 1998 Neil Ruzic was diagnosed with mantle cell lymphoma the deadliest cancer of the lymph system whose spread is reaching epidemic levels in the U S and Europe Instead of following recommended courses of chemotherapy and radiation he took control of his treatment by

investigating cures being developed in the nation's cancer research laboratories. Although chemotherapy harms the immune system and is increasingly demonstrated to be an ineffective long-term cure for the vast majority of cancers, it remains the standard treatment for most cancer patients. Ruzic, a former scientific magazine publisher and originator of a science center, refused to accept this status quo and instead plunged into the world of cutting-edge treatments, exploring the frontiers of cancer science with revolutionary results. Ruzic went on the offensive, visiting scores of laboratories, gathering information, talking to researchers, and effectively becoming his own patient care advocate. This book presents his findings: A scathing critique of the chemotherapy culture as well as unscientific alternative therapies, the book endorses state-of-the-art molecularly based technologies, making it an illuminating and necessary read for anyone interested in cancer research, especially patients and their families and physicians. Neil Ruzic was expected to die within two years of his initial diagnosis. Five years later, he has been declared cancer-free and considers himself cured.

He was left alone to trust his conscience with a pledge to continue serving his country, not knowing whom to trust anymore. He must unearth a conspiracy threatening the existence of this world, and most notably, the safety of his own family. From a Taller Tower Seamus McGraw, 2021-04-13 We, as a nation, have become desensitized to the shock and pain in the wake of mass shootings. In the bottomless silence between gunshots, as political stalemate ensures inaction, the killing continues, the dying continues. *From a Taller Tower* attends to the silence that has left us empty in the aftermath of these atrocities. Veteran journalist Seamus McGraw chronicles the rise of the mass shooter to dismantle the myths we have constructed around the murderers and ourselves. In 1966, America's first mass shooter from atop the University of Texas tower unleashed a new reality: the fear that any of us may be targeted by a killer and the complicity we bear in granting these murderers the fame or infamy they crave. Addressing individual cases in the epidemic that began in Austin, *From a Taller Tower* bluntly confronts our obsession with the shooters and explores the isolation, narcissism, and sense of victimhood that fan their obsessions. Drawing on the experiences of survivors and first responders as well as the knowledge of mental health

experts McGraw challenges the notion of the good guy with a gun the idolization of guns including his own and the reliability of traumatized memory Yet in this terrible history McGraw reminds us of the humanity that can stop the killing and the dying
