**The Amazing Cat Family** Susan Fadler, 2015-06-13 The Amazing Cat Family is an Animal Based Curriculum of the RUFF Program The book is 133 pages and takes a comprehensive look at the entire cat family with emphasis on cultural use science biology history genetics and geography Each species is noted with Navajo names R U F F is an acronym that stands for Reservations Unwanted Four Footed Friends organized for establishing homes for the unwanted and neglected animals on the Navajo Reservation Rescued animals went into classrooms to help teach the children about animal behavior care and health but the animals ended up helping the kids by extrapolating expressions of emotions which would otherwise be harbored or unexpressed by the child It incorporated self esteem where all else had failed Using a natural catalyst puppies and kittens to teach responsible behavior proved to be extremely effective Teacher nominated this curriculum won 1st place Golden Bell Award from the ASBA as the best new innovative curriculum in 1996 [www.ruffprogram.com](http://www.ruffprogram.com)

**Introducing the Cat Family**, 19??

**Meet the Cat Family!** B J Deming, 2020-02-21 Have you ever wondered whether house cats are descended from big cats How bobcats and lynxes are related If cheetahs and mountain lions are big cats What are all these little cats running around in the wild Experts are still studying family Felidae and trying to work out how cats evolved Unfortunately there isn't much evidence to work with The boffins have been able to model the cat family's history with fossils and molecular DNA markers But as of this writing there is still no consensus on the details of cat evolution or how each species got to where it is found today Computer modeling also can't explain why some lineages like the bay cat stayed in one place Asia for the bay cat while other lineages those we will meet in this book wandered far and wide But what's a lineage anyway It's basically a way to herd cats to organize what we know about these mysterious and complex creatures so we can better understand them Think of the cat family as a tree with eight branches Call each branch a lineage Each branch or lineage has several different cat species sitting on it these all belong to the same lineage This book is about the four lineages that spread across several continents big cats the puma lineage lynxes and wildcats okay technically this one is only part of the Felis domestic cat lineage To answer the questions up above Fluffy and the big cats sit on completely different branches Bobcats and lynxes sit have their own branch Mountain lions and cheetahs are on their own branch and it's not the one owned by big cats There are a LOT of little cats out there but only the wildcats and the house cat have a transcontinental range In this volume you're going to get an easy to understand overview of 17 different cats including house cats That's almost half of the cat family There also are plenty of images thanks to many skilled photographers around the world who have

shared their work online through Creative Commons I tried to include as many different sources as possible This book also contains URLs to interesting videos and conservation sites the Cat Specialist Group and the International Union for the Conservation of Nature IUCN the red list agency It s written in simple English without jargon but at the end there is an in depth reference section so you can fact check the text and also get a start your own investigations into these fascinating felines Buy this book today and find answers to questions about family Felidae that you never even knew you had

**Introducing the Cat Family** ,195? **The Cat Family** Florence Dorothy Wood,1968 A detailed description of the characteristics and behavior of the mountain lion introduces a discussion of the ecology similarities and differences of seven other members of the cat family *Wild Cats of the World* Mel Sunquist,Fiona Sunquist,2017-05-15 Did you know that European royalty once used cheetahs to hunt deer or that caracals can capture birds by leaping six and a half feet straight up into the air from a standing start Have you ever wondered whether domestic cats really do land on their feet when they fall or how Canada lynx can stalk their prey in the winter without falling through the deep snow *Wild Cats of the World* is a treasure trove of answers to questions like these and many others for anyone who s interested in learning more about the world s felids including the ones with whom we share our homes Mel and Fiona Sunquist have spent more than a decade gathering information about cats from every available source many of them quite difficult to find including scientific papers descriptions of hunts archeological findings observations by naturalists and travelers reports from government agencies and newsletters from a wide variety of organizations Weaving information from these sources together with their own experiences observing wild cats around the world the Sunquists have created the most comprehensive reference on felids available Each of their accounts of the 36 species of cat contains a description of the cat including human interactions with it as well as detailed data on its distribution ecology and behavior status in the wild and efforts to conserve it Numerous photographs including more than 40 in full color illustrate these accounts Ranging from the two pound black footed cat to the five hundred pound tiger and from the African serval with its satellite dish ears to the web footed fishing cat of Asia *Wild Cats of the World* will fascinate and educate felid fans of any stripe or spot [The Cat](#) St. George Jackson Mivart,1881
