The Categories Of Grammar French Lui And Le:

The Categories of Grammar Alan Huffman, 1997-01-01 This book offers an analysis of the French clitic object pronouns lui and le in the radically functional Columbia school framework contrasting this framework with sentence based treatments of case selection It suggests that features of the sentence such as subject and object relations normally taken as pretheoretical categories of observation about language are in fact part of a theory of language which does not withstand empirical testing It shows that the correct categories are neither those of structural case nor those of lexical case but rather semantic ones Traditionally anomalies in the selection of dative and accusative case in French such as case government use of the dative for possession and disadvantaging its use in the faire causative construction and other puzzling distributional irregularities have been used to support the idea of an autonomous non functional central core of syntactic phenomena in language The present analysis proposes semantic constants for lui and le which render all their occurrences explicable in a straightforward way The same functional perspective informs issues of cliticity and pronominalization as well The solution offered here emerges from an innovative instrumental view of linguistic meaning an acknowledgment that communicative output is determined only partially and indirectly by purely linguistic input with extralinguistic knowledge and human inference bridging the gap This approach entails identification of the pragmatic factors influencing case selection and a reevaluation of thematic role theory and reveals the crucial impact of discourse on the structure as well as the functioning of grammar One remarkable feature of the study is its extensive and varied data base The hypothesis is buttressed by hundreds of fully contextualized examples and large scale counts drawn from modern French texts

Investigations of the Syntax-Semantics-Pragmatics Interface

Robert D. Van Valin, Jr., 2008-11-21 *Investigations of the Syntax Semantics Pragmatics Interface* presents on going research in Role and Reference Grammar in a number of critical areas of linguistic theory verb semantics and argument structure the nature of syntactic categories and syntactic representation prosody and syntax information structure and syntax and the syntax and semantics of complex sentences In each of these areas there are important results which not only advance the development of the theory but also contribute to the broader theoretical discussion In particular there are analyses of grammatical phenomena such as transitivity in Kabardian the verb less numeral quantifier construction in Japanese and an unusual kind of complex sentence in Wari Chapakuran Brazil which not only illustrate the descriptive and explanatory power of the theory but also present interesting challenges to other approaches In addition there are papers looking at the implications and applications of Role and Reference Grammar for neurolinguistic research parsing and automated text analysis

Pathways of Change Olga

Fischer, Anette Rosenbach, Dieter Stein, 2000-11-13 There is a continual growth of interest among linguists of all theoretical denominations in grammaticalization a concept central to many linguistic change theories However the discussion of grammaticalization processes has often suffered from a shortage of concrete empirical studies from one of the best documented languages in the world English *Pathways of Change* contains discussion of new data and provides theoretical lead articles based on these data that will help sharpen the theoretical aspects involved such as the definition and the logical connection of the component processes of grammaticalization The volume is concentrated around a number of themes that are important or controversial in grammaticalization studies such as the principle of unidirectionality the relation between lexicalization and grammaticalization and connected with these two factors the possibility of degrammaticalization the way iconicity interweaves with grammaticalization processes and with the phenomenon of grammaticalization on a synchronic or discourse level also often termed subjectification

The Prominence of Tense, Aspect, and Mood D. N. Shankara Bhat, 1999-01-01 In this monograph the

author argues that natural languages exemplify the language type by assigning prominence to just one of the three verbal categories of tense aspect and mood

relationship between gender age and role in Japanese television interviews It covers a wide range of topics on Japanese communication cultural and gender variables are interwoven in the interpretation of the findings The study shows how participants interact through language and how they project their identities in the context of the interview Based on a qualitative analysis speech in mixed and same gender interactions is analysed turntaking terms of address and aizuchi listener s responses are examined The findings reveal interesting characteristics of all female interactions such as the influence of age that appears to be more important than gender an observation that has repercussions in the study of gender and language differences in modern Japan This book is an interdisciplinary study that integrates notions of politeness and theories of gender and language and will be of interest to people researching Japanese culture and communication gender studies and institutional language

Lexical Template Morphology B. Roger Maylor, 2002-01-01 While there have been many attempts in the literature to account for the semantics and syntax of individual Germanic prefixes this is the first time that the prefixes have been analysed in a unified way and a framework established that is capable of relating the prefixes to each other and to other areas of the grammar The templates provide the means whereby a State Change of State feature interacts with Figure and Ground arguments to generate prefixed verbs noun and adjective incorporating verbs and oblique case marking on the complements of simplex verbs and adjectives This book presents a new and potentially powerful theory of lexical morphology that will be of interest not only to morphologists and those working on the grammar of German but also syntacticians working on the Locative and Dative Alternations and linguists whose prime concern is the organization of the lexicon and the realization of the semantics of change of state predicates

The Circum-Baltic Languages Östen Dahl, Maria Koptjevskaja-Tamm, 2001-01-01 The area around the Baltic Sea has for millennia been a meeting place for people of different origins Among the circum Baltic languages we find three major branches of Indo European Baltic Germanic and Slavic the Baltic Finnic languages from the Uralic phylum and several others The circum Baltic area is an ideal place to study areal and contact phenomena in languages The present set of two volumes look at the circum Baltic languages from a typological areal and historical perspective trying to relate the intricate patterns of similarities and dissimilarities to the societal background In Volume II selected phenomena in the grammars of the circum Baltic languages are studied in a cross linguistic perspective

Grammatical Relations in Change Jan Terje Faarlund, 2001-07-13 The eleven selected contributions making up this volume deal with grammatical relations their coding and behavioral properties and the change that these properties have undergone in different languages The focus of this collection is on the changing properties of subjects and objects although the scope of the volume goes beyond the central problems pertaining to case marking and word order The diachrony of syntactic and morphosyntactic phenomena are approached from different theoretical perspectives generative grammar valency grammar and functionalism The languages dealt with include Old English Mainland Scandinavian Icelandic German and other Germanic languages Latin French and other Romance languages

Northeast Caucasian Eskimo and Popolocan This book provides an opportunity to compare different theoretical approaches to similar phenomena in different languages and language families

Linguistic Borrowing in Bilingual Contexts

Fredric Field, 2002-12-13 A number of previous approaches to linguistic borrowing and contact phenomena in general have concluded that there are no formal boundaries whatsoever to the kinds of material that can pass from one language into another At the same time various hierarchies illustrate that some things are indeed more likely to be borrowed than others Linguistic Borrowing in Bilingual Contexts addresses both by examining claims of no absolute limits and synthesizing various hierarchies It observes that all contact phenomena are systematic and borrowing is no exception Regarding forms the determining factors lie in the nature of the morphological systems in contact and how they relate to one another Two principles are proposed to determine the nature of the systematicity and interaction the Principle of System Compatibility PSC and its corollary the Principle of System Incompatibility PSI Together these principles provide a consistent account of the possibilities and limits to borrowing

Functionalism and Formalism in Linguistics

Michael Darnell, Edith A. Moravcsik, Michael Noonan, Frederick J. Communicative Organization in

Natural Language Igor A. Mel'uk, 2001-10-30 The book defines the concept of Semantic Communicative Structure Sem CommS a formal object that is imposed on the starting Semantic Structure SemS of a sentence under text synthesis in order to turn the selected meaning into a linguistic message The Sem CommS is a system of eight logically independent oppositions 1 Thematicity Rheme vs Theme 2 Givenness Given vs Old 3 Focalization Focalized vs Non Focalized 4 Perspective Foregrounded vs Backgrounded 5 Emphasis Emphasized vs Non Emphasized 6 Presupposedness Presupposed vs Non Presupposed 7 Unitariness Unitary vs Articulated 8 Locutionality Communicated vs Signaled The values of these oppositions mark particular subnetworks of the starting SemS and thus allow for the distinction between sentences such as a A man

killed a dog vs The dog was killed by a man b John washed the window vs It was John who washed the window or c It hurts vs Ouch The proposed Sem Comm oppositions are conceived as an attempt at sharpening the well known notions of Topic Comment Focus etc Possible linguistic strategies for expressing the values of the Sem Comm oppositions in different languages are discussed at some length with linguistic illustrations *Hypothetical Modality* Debra Ziegeler, 2000-07-15 This book marks a new development in the field of grammaticalisation studies in that it extends the field of grammaticalisation studies from relatively homogeneous languages to those possessing well established and institutionalised second language varieties In *Hypothetical Modality* special reference is made to Singaporean English a native speaker L2 dialect of considerable importance in the South East Asian region and to the expression in the dialect of hypothetical modality which appears to be indistinguishable from non hypothetical modality in terms of the use of preterite or past forms of modal verbs Within a grammaticalisation framework a number of factors can be seen to be relevant to an explanation including substratum and contact features such as tense aspect marking levels of lexical retention as an individual psychological phenomenon and the fact that such dialects have a discontinuity in their development In addition the book defines pragmatic approaches to the understanding of hypothetical modality in both diachronic and synchronic terms

Circum-Baltic Languages Östen Dahl, Maria Koptjevskaja-Tamm, 2001-12-31 The area around the Baltic Sea has for millennia been a meeting place for people of different origins Among the circum Baltic languages we find three major branches of Indo European Baltic Germanic and Slavic the Baltic Finnic languages from the Uralic phylum and several others The circum Baltic area is an ideal place to study areal and contact phenomena in languages The present set of two volumes look at the circum Baltic languages from a typological areal and historical perspective trying to relate the intricate patterns of similarities and dissimilarities to the societal background In Volume I surveys of dialect areas and language groups bear witness to the immense linguistic diversity in the area with special attention to less well known languages and language varieties and their contacts Grammaticization, Synchronic Variation, and Language Contact Rena Torres

Cacoulios, 2000-08-15 This study of Old Spanish and present day Mexico and New Mexico data develops a grammaticization account of variation in progressive constructions Diachronic changes in cooccurrence patterns show that grammaticization involves reductive change driven by frequency increases Formal reduction results in the emergence of auxiliary plus gerund sequences as fused units Semantically the constructions originate as spatial expressions their grammaticization involves gradual loss of locative features of meaning Semantic generalization among parallel evolutionary paths results in the competition among different constructions in the domain of progressive aspect Patterns of synchronic variation follow from both the retention of meaning differences and the routinization of frequent collocations as well as sociolinguistic factors Register considerations turn out to be crucial in evaluating the effects of language contact Purported changes in Spanish English bilingual varieties are largely a feature of oral informal language rather than a manifestation of convergence

Nominal Determination Elisabeth Stark, Elisabeth Leiss, Werner Abraham, 2007-08-23 The following theoretical empirical points on the DP are discussed Article and its referential anaphoric properties by Abraham Determiners in Centering Theory Bartra On bare NPs in Old Spanish and Catalan identification of all functional nominal categories by Stvan Bare singular count nouns Kupisch J ger History of German indefinite determiners typological comparison of the interaction of nominal and verbal determination by Abraham Discourse functional crystallization of the original demonstrative Leiss Covert in definiteness and aspect in Old Icelandic Gothic Old High German Lohndal Double definiteness during Old Norse emergence of DP in ontogeny phylogeny by Osawa DP TP and aspect in Old English and L1 acquisition Bittner Early functions of definites in L1 acquisition Wood Demonstratives and possessives emergent from Old English Bauer in definite articles in Indo European and Stark Variation in nominal indefiniteness in Romance *Mood in the Languages of Europe* Björn Rothstein, Rolf Thieroff, 2010 This book is the first comprehensive survey of mood in the languages of Europe It gives readers access to a collection of data on mood Each article presents the mood system of a specific European language in a way that readers not familiar with this language are able to understand and to interpret the data The articles contain information on the morphology and semantics of the mood system the possible combinations of tense and mood morphology and the possible uses of the non indicative moods The papers address the explanation of mood from an empirical and descriptive perspective This book is of interest to scholars of mood and modality language contact and areal linguistics and typology

Grammaticalization Katerina Stathi, Elke Gehweiler, Ekkehard König, 2010 This volume contains a selection of papers on grammaticalization from a broad perspective Some of the papers focus on basic concepts in grammaticalization research such as the concept of grammar as the endpoint of grammaticalization processes erosion unidirectionality the relation between grammaticalization and constructions subjectification and the relation between grammaticalization and analogy Other papers shed a critical light on grammaticalization as an explanatory parameter in language change New case studies of micro processes of grammaticalization complete the selection The empirical evidence for and against grammaticalization comes from diverse domains subject control clitics reciprocal markers pronouns and agreement markers gender markers auxiliaries aspectual categories intensifying adjectives and determiners and pragmatic markers The languages covered include English and its varieties German Dutch Italian Spanish French Slavonic languages and Turkish The book will be valuable to scholars working on grammaticalization and language change as well as to those interested in individual languages
