Poussin and Nature Metropolitan Museum of Art (New York, N.Y.), 2008 The work of the great French painter Nicolas Poussin 1594-1665 is most often associated with classically inspired settings and figures depicting solemn scenes from mythology or the Bible Yet he also created some of the most influential landscapes in Western art endowing them with a poetic quality that has been admired by artists as different as Constable Turner and Cézanne As the British critic William Hazlitt noted in 1844 This great and learned man might be said to see nature through the glass of time This beautiful catalogue presents the first in depth examination of Poussin's landscapes Featured here are more than 40 paintings ranging from the artist's early Venetian inspired pastorals to his grandly structured and austere works designed as metaphors or allegories for the processes of nature Also included are approximately 60 drawings and essays by internationally renowned scholars who examine the painter's visual literary and philosophical influences as well as his relationships with his patrons and his place in the art historical canon Publisher description

Caspar David Friedrich: The Soul of Nature Alison Hokanson, Joanna Sheers Seidenstein, 2025-02-03 Caspar David Friedrich 1774-1840 reimagined European landscape painting by portraying nature as a setting for profound spiritual and emotional encounters Working in the vanguard of the German Romantic movement which championed a radical new understanding of the bond between nature and the inner self Friedrich developed pictorial subjects and strategies that emphasize the individuality intimacy open endedness and complexity of our responses to the natural world The vision of the landscape that unfolds in his art meditative mysterious and full of wonder is still vital today Presented in honor of the 250th anniversary of Friedrich's birth in 2024 Caspar David Friedrich The Soul of Nature is the first comprehensive exhibition dedicated to the artist held in the United States Organized in cooperation with the Alte Nationalgalerie of the Staatliche Museen zu Berlin Staatliche Kunstsammlungen Dresden and Hamburger Kunsthalle with unprecedented loans from more than 30 lenders in Europe and North America the exhibition will present approximately 75 works by Friedrich Oil paintings finished drawings and working sketches from every phase of the artist's career along with select examples by his contemporaries will illuminate how Friedrich developed a symbolic vocabulary of landscape motifs to convey the personal and existential meanings that he

discovered in nature The exhibition will situate Friedrich s art within the tumultuous politics and vibrant culture of 19th century German society and by extension highlight the role of German Romanticism in shaping modern perceptions of the natural world
