The Centerless Corporation Transforming Your Organization For Growth And Prosperity:

The Centerless Corporation Bruce A. Pasternack, Albert J. Viscio, Asch Frank, 1999-09-07 In today's fast paced global business environment the conventional model of the corporation and its management principles no longer deliver results. Economic upheaval, changing demographics and technological revolution have forever altered the requirements for running a business today. Now in response, The Centerless Corporation presents a radical new corporate model designed for your organization's survival, growth and prosperity. Drawing on groundbreaking research they conducted at Booz Allen Hamilton, Bruce A. Pasternack and Albert J. Viscio offer a comprehensive strategy for managing in turbulent times. To deal with increasing complexity, they contend, leaders must abandon their command and control mentality and establish a model in which responsibility and accountability are distributed throughout the organization; employees are regarded as valued resources and knowledge flows freely. Illustrating their ideas with invaluable real life examples, Pasternack and Viscio explain how to attract and develop leaders, build coherence to unite all parts of an organization and restructure business units and corporate roles to add value rather than overhead. *Handbook of Organizational Change and Innovation* Marshall Scott Poole, Andrew H. Van de Ven, 2004-08-26 In a world of organizations that are in constant change, scholars have long sought to understand and explain how they change. This book introduces research methods that are specifically designed to support the development and evaluation of organizational process theories. The authors are a group of highly regarded experts who have been doing collaborative research on change and development for many years. **Improving Leadership in Nonprofit Organizations** Ronald E. Riggio, Sarah Smith Orr, 2004 This title addresses the unique challenges of leading nonprofit organisations, including a unique focus on the personal development of the nonprofit leader. This important resource covers board governance, motivating and evaluating employees and volunteers, and meeting funding challenges. *PROMOTING CAPABILITIES TO MANAGE POSTTRAUMATIC STRESS* Douglas Paton, John M. Violanti, Leigh M. Smith, 2003-01-01 This book provides a systematic review of the variables and mechanisms that underpin resilience and growth in professions who face a high risk of regular and repetitive exposure to adverse or hazardous events. Given the inevitability of this exposure, promoting the acceptance and practice of this paradigm is essential for facilitating the capability of emergency responders to adapt to and, if possible, to grow from adverse and hazardous experience. By identifying salient dispositional, cognitive, group, organizational and environmental predictors of resilience and articulating the mechanisms that link them to adaptive and growth outcomes, emergency organizations will have the capacity to intervene prior to exposure to adverse events rather than waiting until after the event, as is currently the norm. This book thus adopts an approach that is fundamentally preventative in nature and offers practical suggestions to support the development of resilient capabilities. By describing influences on this capability that cover the person, the organization and factors external to the workplace, it offers a more ecologically comprehensive approach to those working in this area. In addition, it offers a more comprehensive framework for

this work by drawing on constructs e.g. trust, empowerment that would ordinarily lie outside mainstream traumatic stress research. The contents of this book provide a theoretically and empirically rigorous knowledge base and intervention framework capable of mitigating negative reactions, facilitating adaptation in the face of adversity and enhancing the likelihood that adverse and traumatic work experiences will enrich the personal and professional lives of those who dedicate themselves to protecting and safeguarding others. It will be of interest to emergency worker counselors, police counselors, disaster workers, mental health professionals and individuals that work with people exposed to trauma.

Organizational Survival in the New World Alex Bennet, David Bennet, 2004-02-18 In this book David and Alex Bennet propose a new model for organizations that enables them to react more quickly and fluidly to today's fast changing dynamic business environment: the Intelligent Complex Adaptive System (ICAS). ICAS is a new organic model of the firm based on recent research in complexity and neuroscience and incorporating networking theory and knowledge management and turns the living system metaphor into a reality for organizations. This book synthesizes new thinking about organizational structure from the fields listed above into ICAS, a new systems model for the successful organization of the future designed to help leaders and managers of knowledge organizations succeed in a non-linear, complex, fast changing and turbulent environment. Technology enables connectivity and the ICAS model takes advantage of that connectivity by fostering the development of dynamic, effective and trusting relationships in a new organizational structure. This book outlines the model in chapter four and then breaks down the model into its components in the next two chapters. This is a benefit to readers since different components of the model can be implemented at different times so the book can guide implementation of one or all of the components as a manager sees fit. There are eight characteristics of the ICAS organizational intelligence: unity and shared purpose, optimum complexity, selectivity, knowledge centricity, flow, permeable boundaries and multi-dimensionality.

Global Business and Corporate Governance John Thanopoulos, 2014-04-15 This book presents a new era where the main force for social change, research, education, economic betterment and even employee happiness is the global enterprise. So many businesses today are global though often with conflicting priorities and potential civilization clashes. Companies may operate in a practically borderless world seeking ideas and talents globally but without proper knowledge and preparation it is one endless struggle. Inside you'll learn many global business related issues ranging from historical matters to the realities of the 21st century from local cultures to global organizations and from political, legal and economic topics to accounting, finance, marketing and management perspectives. This book directs your attention to critical business challenges in addition to the need of corporate governance at all levels. These issues include how it all relates to the environment and the structure of the corporation. Whether you're already out in the CEO world or a student in upper level undergraduate or graduate study or executive education, this book gives you numerous combinations of how to do projects with philosophical perspectives of a new and challenging era.
