The Changing Face Of Economics Conversations With Cutting Edge Economists:

The Changing Face of Economics David Colander, Richard P. F. Holt, J. Barkley Rosser, 2004-12-28 Interviews with nine economists working at the forefront of the profession show how it is changing *The Changing Face of Economics* David Colander, Richard P. F. Holt, J. Barkley Rosser, 2009-12-11 The Changing Face of Economics gives the reader a sense of the modern economics profession and how it is changing The volume does so with a set of nine interviews with cutting edge economists followed by interviews with two Nobel Prize winners Paul Samuelson and Kenneth Arrow reflecting on the changes that are occurring What results is a clear picture of today's economics and it is no longer standard neoclassical economics The interviews and commentary together demonstrate that economics is currently undergoing a fundamental shift in method and is moving away from traditional neoclassical economics into a dynamic set of new methods and approaches These new approaches include work in behavioral economics experimental economics evolutionary game theory and ecological approaches complexity and nonlinear dynamics methodological analysis and agent based modeling David E Colander is Professor of Economics Middlebury College J Barkley Rosser Jr is Professor of Economics and Kirby L Kramer Jr Professor of Business Administration James Madison University Richard P F Holt is Professor of Churchill Honors and Economics Southern Oregon University **The Socioeconomics of Economics** Arne Heise, 2020-03 The economic discipline has always been an object of investigation But unlike in former times when methodological and epistemological developments had been the object of historians of economic thought recently the focus of inquiry shifted towards the constitution organisation and performativity of the economic discipline It is the intention of the book to contribute to a better understanding of the working and failures of the market for economic ideas **Full-Spectrum Economics** Christian Arnsperger, 2010-01-08 Economics is essential in today's world and yet mainstream economists are increasingly under criticism for not taking into account sufficiently many dimensions of real life such as political and moral values human development spirituality and people's widely shared aspiration to live more liberated lives This book offers a critical assessment of contemporary mainstream economics by showing that the discipline has become much too narrow and misses out on the full spectrum of human existence The book presents a careful detailed analysis of the limitations of neoclassical economics and of its post neoclassical successors behavioral economics neuroeconomics and experimental economics It offers a deconstruction rooted in the Integral philosophy developed over the past three decades by the contemporary American thinker Ken Wilber Distinguishing between exterior and interior dimensions of human existence it suggests that economics could be made into a more inclusive and more emancipatory science if it started to truly honor the genuinely interior aspects of individuals and communities Instead of remaining stuck in the limitations of post neoclassical theory we should make the move toward a new paradigm that in the name of science promotes objectivity as well as subjectivity and material causality as well as existential awareness The result is a highly expanded sense of relevance for economists

sociologists and social scientists in general Combining methodologies from systems science brain science ethno methodology and existentialism as well as from the great spiritual traditions of humanity Christian Arnsperger delineates the requirements of a genuinely integral economics beyond today's crippling reductionism Profit Power Economics Mia De Kuijper, 2009 A new economy is emerging from the global financial crisis In this groundbreaking book seasoned executive and Harvard trained economist Mia de Kuijper guides readers through the fundamentals of this economy and explains how companies and individuals can create sustainable wealth now The key is wielding one of twelve contemporary sources of profit power Control just one and you are on the road to high returns Turning profit power into sustainable wealth requires new strategies enumerated here for choosing and valuing investments structuring and managing global enterprises confronting competitive threats and navigating markets which may increasingly display power law dynamics and where distributions may have fat tails To derive this book's unique framework for achieving high returns de Kuijper rethought parts of economic theory itself in light of the most transformative force in the new economy dubbed the Transparent Economy by de Kuijper namely the vanishing cost of information and connectivity Based on original research and illustrated with lively lessons from the experiences of the author and other successful investors and leaders Profit Power Economics draws a detailed picture of the new competitive arena and gives readers a step by step approach to build or find exceptionally high return enterprises and to utilize today's shifting market dynamics to influence choice and build wealth *Governing Post-War Britain* Glen O'Hara, 2012-04-11 Glen O'Hara draws a compelling picture of Second World War Britain by investigating relations between people and government the electorate's rising expectations and demands for universally available social services the increasing complexity of the new solutions to these needs and mounting frustration with both among both governors and governed The Palgrave Companion to Harvard Economics Robert A. Cord, 2024-07-05 Harvard University has been and continues to be one of the most important global centres for economics With three chapters on themes in Harvard economics and 41 chapters on the lives and work of Harvard economists these two volumes show how economics became established at the University how it produced some of the world's best known economists including Joseph Schumpeter Wassily Leontief and John Kenneth Galbraith and how it remains a global force for the very best in teaching and research in economics With original contributions from a stellar cast the volumes provide economists especially those interested in macroeconomics and the history of economic thought with an in depth analysis of Harvard economics *American Power and Policy* R. Thornton, 2016-07-22 The discipline of economics has been increasingly criticized for its inability to illuminate the workings of the real world and to provide reliable policy guidance for the major economic and social challenges of our time A central problem in contemporary

economics and a problem from which many of its other failings flow is its lack of plurality By a lack of plurality it is meant that contemporary economics lacks diversity in its methods theories epistemology and methodology It is also meant that economics has become far less interdisciplinary From Economics to Political Economy offers an explanation as to why economics has become so determinedly non pluralistic and also gives considerable attention to exploring and evaluating promising strategies for reform These strategies include developing a pluralist economics under the label of political economy within other social science departments such as departments of politics Along the way the reader will learn about the worldwide student movement seeking greater pluralism in economics encounter some dramatic case studies in intellectual suppression gain a fuller sense of the nature of contemporary economics and explore the relationship between economics and other social sciences This book is of interest to any social scientist particularly those with interests in economics and politics
