

CHEROKEE LAND LOTTERY

Oct. 1832 – Apr. 1833

In 1803, Georgia established a lottery as the fairest means of distributing land to common farmers. After gold was discovered in 1828 near Dahlonega, the state ignored federal treaties and asserted its claims on the Cherokee territory (including Cobb County). In 1832, it began disbursing these lands in 40-acre gold lots and 160-acre farm lots. Names of eligible white citizens were drawn from one wheel and matched with lot numbers drawn from another. Some of the Cherokees protested and refused to abandon their properties, so lands were often passed to whites with Indians still present.

Prizes Drawn in the Cherokee Land Lottery, 1833. *Up from Poverty?* Hoyt Bleakley, Joseph P. Ferrie, National Bureau of Economic Research, 2013. The state of Georgia allocated most of its land to the public through a system of lotteries. These episodes provide unusual opportunities to assess the long term impact of large shocks to wealth as winning was uncorrelated with individual characteristics and participation was nearly universal among the eligible population of adult white male Georgians. We use this episode to examine the idea that the lower tail of the wealth distribution reflects in part a wealth based poverty trap because of limited access to capital. Using wealth measured in the 1850 Census manuscripts we follow up on a sample of men eligible to win in the 1832 Cherokee Land Lottery. We assess the impact of lottery winning on the distribution of wealth 18 years after the fact. Winners are on average richer by an amount close to the median of 1850 wealth but mainly due to a net shifting of mass from the middle to the upper tail of the wealth distribution. The lower tail is largely unaffected. **The Southern Colonial Backcountry** David Colin Crass, 1998. This book brings a variety of fresh perspectives to bear on the diverse people and settlements of the eighteenth and early nineteenth century southern backcountry. Reflecting the growth of interdisciplinary studies in addressing the backcountry, the volume specifically points to the use of history, archaeology, geography, and material culture studies in examining communities on the southern frontier. Through a series of case studies and overviews, the contributors use cross disciplinary analysis to look at community formation and maintenance in the backcountry areas of Virginia, North Carolina, South Carolina, and Tennessee. These essays demonstrate how various combinations of research strategies, conceptual frameworks, and data can afford a new look at a geographical area and its settlement. The contributors offer views on the evolution of backcountry communities by addressing such topics as migration, kinship, public institutions, transportation, and communications networks, land markets, and real estate claims, and the role of agricultural development in the emergence of a regional economy. In their discussions of individuals in the backcountry, they also explore the multiracial and multiethnic character of southern frontier society. Yielding new insights unlikely to emerge under a single disciplinary analysis, *The Southern Colonial Backcountry* is a unique volume that highlights the need for interdisciplinary approaches to the backcountry while identifying common research problems in the field.
