**Treating Child-Abusive Families** Jeffrey A. Kelly, 2013-11-21 During the past ten years the problem of child abuse has been the subject of increased attention both in the professional community and among the general public The reasons for this widespread recognition are clear First professionals of many disciplines deal with child abusive families and do so in a variety of ways Physicians hospital staff and teachers are often the first to assess a child as the victim of abuse social workers and child protective personnel investigate cases of suspected abuse court and legal authorities make determinations concerning the needs of an abused child and mental health professionals including psychologists social workers and family counselors often have responsibility for treating abusive families Few clinical problems have received this kind of widespread interdisciplinary recognition and given the nature and seriousness of child abusive behavior few problems receive such intensive attention within each profession's literature A second factor responsible for increased study of child abuse is the fact that violence directed toward children is probably the most extreme form of family dysfunction seen by counselors therapists and other practitioners While other types of child management and anger control problems occur far more frequently the consequences of child abusive behavior are much more serious than the consequences of other problems seen in child or family clinics It has been estimated that as many as 550 000 children are the targets of parental abuse in the country each year Helfer Kemper 1976

**Ian McEwan** Irena Książopolska, 2024-04-30 This book offers a discussion of seven canonical novels by Ian McEwan *The Cement Garden* *The Comfort of Strangers* *The Child in Time* *The Innocent* *Black Dogs* *Atonement* *On Chesil Beach* introducing radical new readings which are offered not as ultimate and conclusive solutions of the textual puzzles but as possibilities to engage with the text creatively to enrich the critical consensus and restore interpretative freedom to the readers This project formulates a strategy of inclusive reading an approach to the text that does not seek to reduce it to a single interpretation and yet is comprehensively informed through the analysis of the primary text critical discussion authorial comments and the context of the composition Each reading demonstrates the metafictional structure of the texts indicating that McEwan's works may be treated as invitations to roam within their worlds examining the multiple frames of their structure and the meanings generated thereby All the chapters attend to submerged repressed or deliberately masked voices *The Cement Garden* is seen as a multi-layered dream with a shifting hierarchy of dreamers *The Comfort of Strangers* is viewed as an inverted metafiction with insubstantial characters corrupting more complex heroes *The Child in Time* is read as Stephen's book written for his dead daughter *The Innocent* as a memory narrative of Leonard who refuses to notice Maria's role as a spy In *Black Dogs* the over-exposure of unreliability is studied as a screen for personal trauma in the analysis of *Atonement* Briony's claim to authorship is questioned and Cecilia is suggested as an alternative narrative agent Finally examining *On Chesil Beach* both characters' voices are reconstructed in search of the superior narrative power which in the end is seen to be elusive as the text seeks to undermine the hierarchy of voices

Runyon, Esther

Deblinger, 2013-09-19 Violence is an epidemic that negatively impacts children across their lifespan. Reports indicate 2.1 million youth have experienced physical abuse during their lifetimes, disrupting the healthy development of children from the toddler years through adolescence, and most cases involve parents. Some parents lack the skills to effectively parent and use physical discipline as a strategy to control their children's problem behaviors. They may use increasing force if children continue to be noncompliant, which places many children at risk for harm. Combined Parent-Child Cognitive Behavioral Therapy (CPC-CBT), created by Melissa K. Runyon and Esther Deblinger and outlined in this guide, provides an evidence-based intervention aimed at empowering families to develop optimistic outlooks on parenting and peaceful home environments and to decrease stress experienced both by parents and children. CPC-CBT incorporates elements from empirically supported CBT models for families who have experienced physical abuse, sexual abuse, and domestic violence. Additionally, CPC-CBT draws on concepts from developmental theory, learning theory, family systems theory, and motivational interviewing. The target

population includes children ages 3 17 years and their parents caregivers who have already engaged in or are at risk for physically abusive behavior towards their children This manual is for clinicians clinical supervisors administrators and others who are considering the implementation of CPC CBT in their agencies with families at risk for child physical abuse **Who's Raising Whom?** Larry Waldman,2000 Collaborative Home/school Interventions Gretchen Gimpel Peacock,Brent R. Edwin Bixenstine,2014-03-21 In the mid 20th century O Hobart Mowrer was a celebrated academic psychologist owing largely to his experiments with animals and humans that led to breakthrough theories on how we learn His numerous publications in this arena propelled him to the post of President of the American Psychological Association in 1954 His own battles with depression led him to develop a new theory of psychotherapy which he called Integrity Therapy The premise of this modality is that the client s deception with people they care about is the source of conscience pangs but the client resists or represses the prompting of the conscience and this causes his or her psychological symptoms Treatment therefore consists of urging the client to acknowledge his or her hidden behaviors to themselves and to significant others that they might both gain restored community with intimates and the fruits of personal integrity and inner peace to come clean about their deceptions and rewarding the confession with approval This book explores the conceptual underpinnings of Integrity Therapy and Mowrer s unique treatment approach detailing his methods for setting conditions for therapy assessing clinical data rules of engagement for transference and countertransference and handling client resistance Case examples and transcripts are included to demonstrate key points of this technique Mental health professionals interested in Mowrer s ideas or the history of psychotherapy will find this book to be a valuable and interesting resource "Code of Massachusetts regulations, 1994" ,1994 Archival snapshot of entire looseleaf Code of Massachusetts Regulations held by the Social Law Library of Massachusetts as of January 2020 **The Southern Reporter** ,1908
