Feminist Perspectives in Medical Ethics Helen B. Holmes, Laura Martha Purdy, 1992. A welcome addition to the literature. Center for Theology and the Natural Sciences. Ideologically diverse selection of readings. *Times Literary Supplement* London. The essays are balanced, challenging, well argued, and well written. They ably and accessibly represent feminist contributions to medical ethics. *Religious Studies Review* fascinating thought provoking. *Nursing Times* A stimulating book for those women and men, feminist and non feminist, interested in medical ethics. Maternal and Child Health landmark event in bioethics. Women's Health. The aim of this volume is to show how a feminist perspective advances biomedical ethics by uncovering inconsistencies in traditional argument and by arguing for the importance of hitherto ignored factors in decision making. These essays include both theory and very specific examples that demonstrate the glaring inadequacy of mainstream medical ethics.

The Prime of Life Steven Mintz, 2015-04-07. Steven Mintz reconstructs the emotional interior of a life stage too often relegated to self-help books and domestic melodramas. He describes the challenges of adulthood today and puts them into perspective by exploring how past generations achieved intimacy and connection, raised children, sought meaning in work, and responded to loss.

Without Children Peggy O'Donnell Heffington, 2023-04-18. A historian explores the complicated relationship between womanhood and motherhood in this timely, refreshingly open-hearted study of the choices women make and the cards they're dealt. Ada Calhoun, author of *Why We Can't Sleep*. In an era of falling births, it's often said that millennials invented the idea of not having kids. But history is full of women without children, some who chose childless lives, others who wanted children but never had them, and still others, the vast majority then and now, who fell somewhere in between. Modern women considering how and if children fit into their lives are products of their political, ecological, and cultural moment. But history also tells them that they are not alone. Drawing on deep research and her own experience as a woman without children, historian Peggy O

Donnell Heffington shows that many of the reasons women are not having children today are ones they share with women in the past a lack of support their jobs or finances environmental concerns infertility and the desire to live different kinds of lives Understanding this history how normal it has always been to not have children and how hard society has worked to make it seem abnormal is key she writes to rebuilding kinship between mothers and non mothers and to building a better world for us all

9781991093356 **Infertility around the Globe** Marcia Inhorn, Frank van Balen, 2002-05-30 This exceptional collection of essays breaks new ground by examining the global impact of infertility as a major reproductive health issue one that has profoundly affected the lives of countless women and men Based on original research by seventeen internationally acclaimed social scientists it is the first book to investigate the use of reproductive technologies in non Western countries Provocative and incisive it is the most substantial work to date on the subject of infertility With infertility as the lens through which a wide range of social issues is explored the contributors address a far reaching array of topics why infertility has been neglected in population studies how the deeply gendered nature of infertility sets the blame squarely on women s shoulders how infertility and its treatment transform family dynamics and relationships and the distribution of medical and marital power The chapters present informed and sophisticated investigations into cultural perceptions of infertility in numerous countries including China India the nations of sub Saharan Africa Vietnam Costa Rica Egypt Israel the United States and the nations of Europe Poised to become the quintessential reference on infertility from an international social science perspective Infertility around the Globe makes a powerful argument that involuntary childlessness is a complex phenomenon that has far reaching significance worldwide **Pronatalism** Sarah Benesch, 2025-06-06 This book addresses a topic that until recently had been underexplored women who voluntarily forgo having and raising children Grounded in a discourse approach it examines reproductive decision making in the context of pronatalist discourses such as maternal instinct biological clock and having it all that encourage procreation in some while discouraging it in others To contextualize pronatalism sociohistorically the book also examines the relationship between pro and anti natalist discourses that emerged during the 20th century eugenics movement in the United States especially its promotion of white middle class women s procreation while discouraging or preventing poor immigrant women and women of color from reproducing Other topics include online communities devoted to childfreedom 20th and 21st century women authors who wrote about their decision not to procreate responses of academic women in the field of applied linguistics to questions about their childlessness and a

personal narrative of the author's childlessness. The author calls for solidarity between mothers and mothers, her term for childless women, to defy the policing of women's bodies worldwide. *Childfree and Happy* Courtney Adams

Wooten, 2023-06-15 *Childfree and Happy* examines how millennia of reproductive beliefs or doxa have positioned women who choose not to have children as deviant or outside the norm. Considering affect and emotion alongside the lived experiences of women who have chosen not to have children, Courtney Adams Wooten offers a new theoretical lens to feminist rhetorical scholars' examinations of reproductive rhetorics and how they circulate through women's lives by paying attention not just to spoken or written beliefs but also to affectual circulations of reproductive doxa. Through interviews with thirty-four childfree women and analysis of childfree rhetorics circulating in historical and contemporary texts and events, this book demonstrates how childfree women individually and collectively try to speak back to common beliefs about their reproductive experiences even as they struggle to make their identities legible in a sociocultural context that centers motherhood. *Childfree and Happy* theorizes how affect and rhetoric work together to circulate reproductive doxa by using Sara Ahmed's theories of gendered happiness scripts to analyze what reproductive doxa is embedded in those scripts and how they influence rhetoric by about and around childfree women. Delving into how childfree women position their decision not to have children and the different types of interactions they have with others about this choice, including family members, friends, colleagues, and medical professionals, *Childfree and Happy* also explores how communities that make space for alternative happiness scripts form between childfree women and those who support them. It will be of interest to scholars in the fields of the rhetoric of motherhood, mothering, as well as feminist rhetorical studies.
