Haakenson,2017-07-06 Originally published in 1990 The stories of the homesteaders ranchers and farm women included in this anthology describe both the ordinary and the extraordinary The writers discuss many different aspects of rural life such as farming techniques religious beliefs and politics They also explore such situations as near starvation during a blizzard the destruction of crops and the dispossession of a farm family during a drought This title will be of interest to students of history and rural studies      **They Were Just People** Bill Tammus,Jacques Cukierkorn,2009-09-01 Hitler s attempt to murder all of

Europe s Jews almost succeeded One reason it fell short of its nefarious goal was the work of brave non Jews who sheltered their fellow citizens In most countries under German control those who rescued Jews risked imprisonment and death In Poland home to more Jews than any other country at the start of World War II and location of six German built death camps the punishment was immediate execution This book tells the stories of Polish Holocaust survivors and their rescuers The

authors traveled extensively in the United States and Poland to interview some of the few remaining participants before their generation is gone. Tammus and Cukierkorn unfold many stories that have never before been made public: gripping narratives of Jews who survived against all odds and courageous non-Jews who risked their own lives to provide shelter. These are harrowing accounts of survival and bravery. Maria Devinski lived for more than two years under the floors of barns. Felix Zandman sought refuge from Anna Puchalska for a night but she pledged to hide him for the whole war if necessary and eventually hid several Jews for seventeen months in a pit dug beneath her house. And when teenage brothers Zygie and Sol Allweiss hid behind hay bales in the Dudzik family's barn one day when the Germans came they were alarmed to learn the soldiers weren't there searching for Jews but to seize hay. But Zofia Dudzik successfully distracted them and she and her husband insisted the boys stay despite the danger to their own family. Through some twenty stories like these Tammus and Cukierkorn show that even in an atmosphere of unimaginable malevolence individuals can decide to act in civilized ways. Some rescuers had antisemitic feelings but acted because they knew and liked individual Jews. In many cases the rescuers were simply helping friends or business associates. The accounts include the perspectives of men and women, city and rural residents, clergy and laypersons, even children who witnessed their parents' efforts. These stories show that assistance from non-Jews was crucial but also that Jews needed ingenuity, sometimes money and most often what some survivors called simple good luck. Sixty years later they invite each of us to ask what we might do today if we were at risk or were asked to risk our lives to save others.

**Story in Children's Lives: Contributions of the Narrative Mode to Early Childhood Development, Literacy, and Learning** Kelli Jo Kerry-Moran, Juli-Anna Aerila, 2019-09-27 This book is based on the power of stories to support children in all areas of their lives. It examines the role narratives can play in encouraging growth in contexts and domains such as personal and family identity, creative movement, memory and self-concept, social relationships or developing a sense of humor. Each chapter describes innovative and research-based applications of narratives such as movement stories, visual narratives to develop historical thinking, multimodal storytelling, bibliotherapy, mathematics stories, family stories and social narratives. The chapters elaborate on the strength of narratives in supporting the whole child in diverse contexts from young children on the autism spectrum improving their social skills at school to four and five year olds developing historical thinking to children who are refugees or asylum seekers dealing with uncertainty and loss. Written by accomplished teachers, researchers, specialists, teaching artists and teacher educators from several countries and backgrounds, the book fills a gap in the literature on narratives. This work delves into the topic of narratives in young children's lives with a breadth of topics and depth of study not found elsewhere. Collectively the insights of the contributors build a convincing case for emphasizing story across the various disciplines and developmental domains of the early childhood years. The writing style is scholarly yet accessible. Authors used a wide array of visual material to make their points clearer and show the reader what meaningful uses of story look like.
