*The Plateglass Universities* Michael Beloff, 1970      The plateglass universities London, Selter B. Warburg Michael Beloff,      History of Universities: Volume XXXVII/1-2 Mordechai Feingold, Robin Darwall-Smith, 2024-11-26 History of Universities XXXVII 1 2 contains the customary mix of learned articles and book reviews which makes this publication an indispensable tool for the historian of higher education      **Identities and Social Change in Britain since 1940** Mike Savage, 2010-05-13 Identities and Social Change in Britain since 1940 examines how between 1940 and 1970 British society was marked by the imprint of the academic social sciences in profound ways which have an enduring legacy on how we see ourselves It focuses on how interview methods and sample surveys eclipsed literature and the community study as a means of understanding ordinary life The book shows that these methods were part of a wider remaking of British national identity in the aftermath of decolonisation in which measures of the rational managed nation eclipsed literary and romantic ones It also links the emergence of social science methods to the strengthening of technocratic and scientific identities amongst the educated middle classes and to the rise in masculine authority which challenged feminine expertise This book is the first to draw extensively on archived qualitative social science data from the 1930s to the 1960s which it uses to offer a unique personal and challenging account of post war social change in Britain It also uses this data to conduct a new kind of historical sociology of the social sciences one that emphasises the discontinuities in knowledge forms and which stresses how disciplines and institutions competed with each other for reputation Its emphasis on how social scientific forms of knowing eclipsed those from the arts and humanities during this period offers a radical re thinking of the role of expertise today which will provoke social scientists scholars in the humanities and the general reader alike      **Identities and Social Change in Britain Since 1940** Michael Savage, 2010-05-13 Identities and Social Change in Britain since 1940 examines how between 1940 and 1970 British society was marked by the imprint of the academic social sciences in profound ways which have an enduring legacy on how we see ourselves It focuses on how interview methods and sample surveys eclipsed literature and the community study as a means of understanding ordinary life The book is the first to draw extensively on archived qualitative social science data from the 1930s to the 1960s which it uses to offer a unique personal and challenging account of post war social change in Britain It also uses this data to conduct a new kind of historical sociology of the social sciences one that emphasises the discontinuities in knowledge forms and which stresses how disciplines and institutions competed with each other for reputation Its emphasis on how social scientific forms of knowing eclipsed those from the arts and humanities during this period offers a radical re thinking of the role of expertise today which will provoke social scientists scholars in the humanities and the general reader alike      Geographies of the University Peter Meusbürger, Michael Heffernan, Laura Suarsana, 2018-07-31 This open access volume raises awareness of the histories geographies and practices of universities and analyzes their role as key actors in today's global knowledge economy Universities are centers of research teaching and

expertise with significant economic social and cultural impacts at different geographical scales Scholars from a variety of disciplines and countries offer original analyses and discussions along five main themes historical perspectives on the university as a site of knowledge production cultural encounter and political interest institutional perspectives on university governance and the creation of innovative environments relationships between universities and the city the impact of universities on national and regional economies and cultures and the processes of internationalization through student mobility the creation of education hubs and global regionalism in higher education

History of Universities Mordechai Feingold, 2006-05-11 Volume XXI 1 of History of Universities contains the customary mix of learned articles book reviews conference reports and bibliographical information which makes this publication such an indispensable tool for the historian of higher education Its contributions range widely geographically chronologically and in subject matter The volume is as always a lively combination of original research and invaluable reference material

*The Universities and British Industry* Michael Sanderson, 2018-10-11 Originally published in 1972 The University and British Industry examines the lively and controversial relationship between British industry and the university The book looks at the impact of industry on the development of British universities from the 1850s to the 1970s and with contribution from the universities to industry through scientific research and the supply of graduate skills The book argues that the close involvement of the universities and industry has been one of the chief beneficial forces shaping the British universities movement in the last hundred years It gives an account of the changes which took place within the universities to make them more suitable for industries purposes describing for example the early rise of the English civic universities strongly financed by and closely supporting industry The book also considers how during the two world wars industry became highly reliant on the universities for the war technology and how despite the depression between the wars university research and graduate employment embraced the widening opportunities of the new industries The book also discusses the expansion of the university in the sixties and points out that industrial motives have merged with those of social justice posing dilemmas for present and future relations between universities and industry

**Post-war Architecture between Italy and the UK** Lorenzo Ciccarelli, Clare Melhuish, 2021-10-14 Italy and the UK experienced a radical re organisation of urban space following the devastation of many towns and cities in the Second World War The need to rebuild led to an intellectual and cultural exchange between a wave of talented architects urbanists and architectural historians in the two countries Post war Architecture Between Italy and the UK studies this exchange exploring how the connections and mutual influences contributed to the formation of a distinctive stance towards Internationalism notwithstanding the countries contrasting geographic and climatic conditions levels of economic and industrial development and social structures Topics discussed in the volume include the influence of Italian historic town centres on British modernist and Brutalist architectural approaches to the design of housing and university campuses as public spaces post war planning concepts such as the precinct the tensions between British critics and Italian

architects that paved the way for British postmodernism and the role of architectural education as a melting pot of mutual influence. It draws on a wealth of archival and original materials to present insights into the personal relationships, publications, exhibitions, and events that provided the crucible for the dissemination of ideas and typologies across cultural borders. Offering new insights into the transcultural aspects of European architectural history in the post-war years and its legacy, this volume is vital reading for architectural and urban historians, planners, and students, as well as social historians of the European post-war period.

The Physical University Paul Temple, 2014-03-21

The great universities of the world are to a large extent defined in the public imagination by their physical form. When people think of a university, they usually think of a distinctive place rather than about the teaching or the research that might go on there. This is understandable both because universities usually stay rooted to the same spot over the centuries and because their physical forms may send powerful messages about the kind of places they are. The physical form of the university and how the spaces within it become transformed by their users into places which hold meanings for them has become of increased interest recently from both academic and institutional management perspectives when trying to understand more about how universities work and how they may be made more effective. Yet despite its seemingly obvious importance, the available literature on space and place in higher education internationally is scant when compared to that dealing with, say, teaching and learning methods or with evaluating quality or many other topics. This book brings together a range of academic and professional perspectives on university spaces and places and shows how technical matters of building design, maintenance, and use interact with academic considerations on the goals of the university. Space issues are located at an intellectual crossroads where widely differing conceptual and professional perspectives meet and need to be integrated, and this important book brings together perspectives from around the world to show how design and use issues are changing. Higher Education Globally: higher education is being required to do more things, to teach more students, to be better at research, to engage more with business and communities, and many other things. These pressures are leading universities to reconsider their management processes as well as their academic structures. An often-quoted saying is that we make our buildings and afterwards they make us. At a time when universities and colleges are seeking competitive advantages, ideas and analysis about space, design, and use is much needed and will be well received.
