Progress in the Balance Daniel R. Reichman, 2023-08-15 Through a historical ethnography of Santos Brazil *Progress in the Balance* addresses and assesses an anthropological theory of progress Observing that anthropology is a progressive discipline with a pessimistic attitude towards progress Daniel Reichman explains the contested meanings of progress in Brazil and explores how anthropologists and others can define this concept more generally He investigates how any society can separate progress from plain old change and if change is constantly happening all around us how and why certain events get lifted out of a normal timeframe and into a mythic narrative of progress Each chapter outlines a particular episode in the history of Santos a city undergoing an unprecedented period of economic and political turmoil as it is represented in public culture mainly through museums monuments art and public events Drawing on the anthropology of myth Reichman proposes a model that he refers to as a clash of timescapes *Progress in the Balance* shows how this concept of progress requires a different temporal structure that separates sacralized social change from mundane historical events

Idea Transmission Mira Donnelly, AI, 2025-05-05 *Idea Transmission* explores how written ideas spread and evolve across societies and generations a crucial aspect of social science and intellectual history It examines the journey of ideas from their initial encoding to their eventual interpretation and adaptation noting that an idea's success isn't solely based on its merit but also on the social political and technological environments it encounters For instance the book delves into how print culture and digital media platforms act as conduits for knowledge propagation The book uniquely emphasizes the active role of individuals and communities in shaping the meaning of ideas challenging simple models of idea diffusion It's structured in three parts beginning with the formation of written arguments progressing to an analysis of social institutions and media platforms and concluding with the interpretive processes that reshape ideas to fit cultural contexts Ultimately it demonstrates how these processes influence political discourse media studies and drive cultural evolution by providing a novel framework for understanding cultural evolution and social change **Research in Education**, 1972

Capital Punishment C. Cliff, 2003 The issue of capital punishment is a continually debated issue because it calls into question the values and direction of society How is a civilisation supposed to handle lawbreakers Are some crimes so heinous and some people so dangerous that the death penalty is the only appropriate response The United States Constitution prohibits cruel and unusual punishment but opinions on whether that includes capital punishment are vehement on both sides Many states have some form of death penalty and public opinion seems to indicate support of it in principle However many firestorms have erupted recently over the application of the penalty including the topics of its use on minors and those with mental disabilities There are also questions raised about how much of a factor race plays in a capital sentence Internationally several countries have foresworn the death penalty with certain countries in Europe and the Americas refusing to extradite criminal suspects including suspected terrorists to the US if capital punishment is a possible sentence With such politically flammable and ethically challenging issues hanging over it capital punishment is a vitally important issue to understand To help facilitate that study this book assembles a carefully selected and substantial listing of literature focussing on the death penalty Anyone researching this area of criminal justice will find this book an important tool as it offers easy access to the most relevant works about capital punishment Following the bibliography further access is provided with author title and subject indexes
