Barrett,1899 **The History of England from the Accession of James 2. by Thomas Babington Macaulay** ,1849 The Origin of the Family. Private Property and the State Friedrich Engels,2001 Since civilisation is founded on the exploitation of one class by another class its whole development proceeds in a constant contradiction Every step forward in production is at the same time a step backward in the position of the oppressed class that is of the great majority First published in 1884 The Origin of the Family is one of the most important works of Marxist theory Basing himself on the research of anthropologist Lewis Henry Morgan Friedrich Engels builds on his revolutionary discovery that the family structure has passed through multiple stages throughout history He shows that ultimately the determining factor in these changes is the economic mode of production

Using the method of historical materialism Engels also demonstrates that the oppression of women has not always existed and is not the product of inherent traits Rather it emerged historically with the production of a surplus and the division of society into classes He also shows that the state far from being a neutral arbiter in society arose with the emergence of class society It is ultimately armed bodies of men in defence of the ruling class To commemorate 200 years since Engels birth we are proud to republish this extraordinarily relevant work of scientific socialism This new edition includes an introduction by Rob Sewell placing the text in its historical context and defending the fundamental ideas and method of Marxism which has stood the test of time This book is a must read for all socialists
