The Central Wales Line:

Railways in South Wales and the Central Wales Line in the Late 20th Century Peter J. Green, 2022-12-01 In the early 1980s I began to visit South Wales on a regular basis to photograph the railway scene At that time the collieries and steelworks were generating a lot of rail traffic with Class 37 diesels being the usual motive power Passenger trains were in the hands of Class 47s and 37s while Peaks and Class 50s would also appear on occasion HSTs DMUs Sprinters and Pacers were of course also common As time went on collieries closed and the coal traffic reduced but there always something new and interesting Rugby Internationals at Cardiff regularly produced a number of special trains which arrived from various parts of the country often bringing interesting motive power to the Welsh capital The Class 37s were slowly replaced by Class 56s and later Class 60s on many duties in South Wales but the Rhymney Valley saw Class 37 diesels working passenger trains into the twenty first century and on Rugby International days privately owned Class 50s were also used on occasion I also visited the Central Wales line a number of times and particularly enjoyed the time I spent at the small country stations before the semaphore signals were replaced This book contains a selection of photographs taken in the latter part of the 20th and in the very early 21st Century covering the railways of South Wales and the Welsh section of the Central Wales line A few photographs of the principal heritage railways in more recent times are also included **The Central Wales Line**

Audrey Doughty, 1997 [The Central Wales Line](#) Audrey Doughty, 1971 [Lost Lines of Wales](#) Jamie Green, 2021-06-24 Having covered the southern section of the Central Wales Line and its branches in Swansea to Llandovery this volume traces the line from Llandovery to Craven Arms where it met the North its country stations signal boxes and heavy goods and express trains largely replaced by simple request stops and single car diesel units **The Central Wales Line** Tom Clift, 1982 *Lost Lines* Tom Ferris, 2020-07-05 The Mid Wales Line ran from 60 miles from Moat Lane Junction near Caersws to Brecon passing through the old counties of Montgomery Radnorshire and Brecknock It followed the river valleys of the Upper Severn the Dulas the Marteg and the Wye serving the towns and villages along its route for just short of 100 years This classic Welsh rural railway is recalled in a delightful selection of nostalgic photographs of its trains and stations

trains into the twenty first century and on Rugby International days privately owned Class 50s were also used on occasion I also visited the Central Wales line a number of times and particularly enjoyed the time I spent at the small country stations before the semaphore signals were replaced This book contains a selection of photographs taken in the latter part of the 20th and in the very early 21st Century covering the railways of South Wales and the Welsh section of the Central Wales line A few photographs of the principal heritage railways in more recent times are also included The Railway Times ... ,1855

The Country Railway Tim Bryan,2013-09-20 Britain s towns and cities were famously transformed in the nineteenth century by the coming of the railways turning their fortunes around and giving urban dwellers new opportunities to travel across the country yet the effect on the rural population was arguably far greater Whilst some of the initial trunk lines were designed to link major cities the network of smaller cross country and branch lines that followed opened up large tracts of previously remote countryside providing new markets for agricultural produce and ending the isolation of many rural communities and such was the pace of development during the Railway Mania period that by the end of the nineteenth century there were few areas of country not served by train This book tells the story of these railways from golden age to decline in the wake of nationalization and the Beeching Report in the mid twentieth century and indeed contemporary efforts to restore and preserve them

The World's First Railway System Mark Casson,2009-09-10 This is the first history of the British railway system written from a modern economic perspective It uses counterfactual analysis to construct an alternative network to represent the most efficient alternative rail network that could have been constructed given what was known at the time the first time this has been done **Bradshaw's Railway Manual, Shareholders' Guide, and Official Directory for ...** ,1866

Lost Lines Tom Ferris,2020-07-05 Take a nostalgic steam powered journey back in time on the long closed line between Aberystwyth and Carmarthen Built by the ill fated Manchester and Milford Railway the fact that it didn t go to either only adds to the romance of this once popular route which fell victim to the Beeching cuts of the 1960s Includes an essay on the history of the line and photographs of its locomotives trains and stations **Railway Times** ,1855

The Railway Magazine ,1927 The Working and Management of an English Railway George Findlay,2020-12-08 In The Working and Management of an English Railway George Findlay presents a meticulous exploration of the operational intricacies and managerial practices of the British railway system during the Victorian era Through detailed case studies and data driven analysis Findlay employs a pragmatic yet engaging literary style that blends technical precision with accessibility His work situates itself within the broader discourse of industrial management literature contributing to the understanding of transportation networks as vital components of economic infrastructure The text not only illuminates the day to day operations of railways but also underscores the socio economic impact of railway systems on 19th century Britain George Findlay a prominent figure in railway management and a noted author draws from his extensive experience in the field to provide a firsthand perspective on railway operations His background in engineering and administration not only informs his

analytical approach but also enhances the authenticity of his observations Having witnessed the rapid expansion of the railway network and the challenges it posed Findlay s insights reflect both the triumphs and tribulations of this transformative period in British history This book is invaluable for readers interested in the fields of industrial history transport economics and engineering management Findlay s authoritative voice and methodical exploration make it an essential resource for scholars students and enthusiasts alike seeking a deeper understanding of the foundational role railways played in shaping modern society

The Working and Management of an English Railway George Findlay,1890 **Railway News, Finance and Joint-stock Companies' Journal** ,1869 Hereford Locomotive Shed Steve Bartlett,2017-10-30 Hereford Locomotive Shed is the first in a series of in depth studies to look closely at the changing engine allocations and operational responsibilities of motive power depots during the latter days of steam In Herefords case this was a varied mixture of main line passenger freight trip working branch line passenger station pilot duties and yard shunting Unusually the latter remained a steam preserve until months before depot closure in November 1964 Not forgotten are the depots small sub sheds which had varying responsibilities over the years as the district boundaries changed at Ledbury Leominster Ross on Wye and Craven Arms Their very different duties were inevitably a reflection of a bygone age and an all too rapidly changing future The author personally recorded the Hereford railway scene from the late 1950s until depot closure He made shed visits several times a week and at other times observed the ever changing locomotive scene from the elevated Bulmers Sidewalk behind the depots coaling stage Details carefully kept from those far off days has proved a valuable cross reference with present day research into Herefords role from official records at The National Archives Kew and other railway research sources Having spent almost forty years working in the industry the author is able to sympathetically unravel and interpret the story of this hard working mixed traffic depot Hereford is strategically located on the North West route from South Wales and the West of England to the North West as well as being an important junction for Worcester the West Midlands Branch lines to Brecon and Gloucester radiated from this Border Counties railway junction and freight trips radiated out to serve the surrounding area All of this made Hereford a fascinating rail centre and a locomotive shed worthy of its story for posterity which is meticulously recorded in this book *Taken as Red, Highs and Lows of the Labour Party, 1924-2019* Richard Temple,2024-07-03 This book comprises tales of the Labour Party in the hundred years since the first Labour government It includes many dramatic episodes not least the seething anger of the Glasgow rent strikes during the Great War the looming danger of Hitler in the 1930s and walkouts over equal pay in the 1960s The book conjures up lost worlds which have profoundly influenced modern Britain Above all this book describes the ways in which the Labour Party has impacted on the lives of ordinary people How does Labour measure up after a century of government and opposition The book is accessible and challenges established narratives It is also original No one else for example has written so specifically about the Labour Party and Nazi rearmament or about the Wilson government s response to the Beeching cuts

The text draws on a wide variety of sources including the testimony of public figures such as John Betjeman Richard Hoggart Friedrich Engels and George Orwell Researched with scholarly rigour this book will appeal to a wide audience **The Red Dragon** ,1883
