**The Peace In Between** Astri Suhrke,Mats Berdal,2013-03 This volume examines the causes and purposes of post conflict violence The end of a war is generally expected to be followed by an end to collective violence as the term post conflict that came into general usage in the 1990s signifies In reality however various forms of deadly violence continue and sometimes even increase after the big guns have been silenced and a peace agreement signed Explanations for this and other kinds of violence fall roughly into two broad categories those that stress the legacies of the war and those that focus on the conditions of the peace There are significant gaps in the literature most importantly arising from the common premise that there is one predominant type of post war situation This post war state is often endowed with certain generic features that predispose it towards violence such as a weak state criminal elements generated by the war time economy demobilized but not demilitarized or reintegrated ex combatants impunity and rapid liberalization The premise of this volume differs It argues that features which constrain or encourage violence stack up in ways to create distinct and different types of post war environments Critical factors that shape the post war environment in this respect lie in the war to peace transition itself above all the outcome of the war in terms of military and political power and its relationship to social hierarchies of power normative understandings of the post war order and the international context This book will of much interest to students of war and conflict studies peacebuilding and IR Security Studies in general *College and Research Libraries News* ,2004

#### **China and International Human Rights** Na Jiang,2013-12-12

This book is designed to introduce law students legal actors and human rights activists particularly participants in human rights dialogues with China to the process and reality of a newly confident China s participation in the international human rights system albeit with inherent challenges From an international and comparative perspective one of the key findings of the author s research is that progress towards human rights depends more on judges than on legislators Chinese legislators have enacted a series of reforms in order to better protect human rights Unfortunately these reforms have not led to greater adherence to China s international human rights obligations in practice The reforms failed because they have generally been misunderstood by Chinese judges who often have a limited understanding of international human rights norms Specifically this book will examine how judicial misunderstandings have blocked reforms in one specific area the use of severe punishments based on international human rights theory and case studies and data analyses This examination has several

purposes The first is to suggest that China ratify the ICCPR as the next step for its substantive progress in human rights and as a good preparation for its re applying to be a member of the UN Human Right Council in the future The second is to explain how judges could be better educated in international human rights norms so as to greatly reduce the use of severe punishments and better comply with China s human rights obligations The third is to demonstrate how the international community could better engage with China in a manner that is more conducive to human rights improvements The author s ultimate goal is to enhance dialogue on human rights in China between judges and the Chinese government between Chinese judges and their foreign counterparts and between China s government and the international community Another significant aim of this book is to clarify the controversial question of what obligations China should undertake before its ratification of the ICCPR and to re examine trends in its developing human rights policy after standing down from the Council in late 2012 The tortuous progress of China s criminal law and criminal justice reforms has confirmed that Chinese judges need further instruction on how to apply severe punishments in a manner consistent with international standards Judges should be encouraged to exercise more discretion when sentencing so that penalties reflect the intent of relevant domestic laws as well as the international human rights standards enumerated in the ICCPR In order to better educate and train judges this book contains introductory chapters that examine the severe punishments currently available to Chinese judges from an international human rights perspective To illustrate how Chinese justice currently falls short of international norms this paper also examines several cases that are considered to be indicative of China s progress towards greater respect for human rights and the rule of law These cases demonstrate that China still has a long way to go to achieve its goals at least before abolishing the death penalty forced labor and torture
