The Plastics Architect:

The Plastics Architect Arthur Quarmby, 1974 Plastics for Architects and Builders Albert George Henry Dietz, 1969

Plastics Now Billie Faircloth, 2015 Arguing that architects continued ignorance about plastics has prevented its use as a building material from becoming fully exploited Billie Faircloth draws on a wide range of original data to explore its use and development Essential reading **Plastics in Architecture** Ralph Montella, 1985 **Plastics** Stephan Engelsmann, Valerie Spalding, Stefan Peters, 2012-11-05 Plastics are high performance materials of wide use in the built environment Their versatile technical properties are particularly fascinating A broad range of form giving and finishing processes makes plastic especially interesting for complex geometries in combination with digital planning processes Following the pioneering plastic structures of the 1970s a number of spectacular buildings have in recent years highlighted the outstanding technical and aesthetic potential of the material Until now however there has been no systematic treatment of the use of plastic in architecture This book seeks to fill that gap by providing an introduction to the structural and design possibilities of plastic It introduces the material and its specific characteristics describes various types of plastic in terms of their relevance for building explains processing technologies and presents typical products and components A concise presentation of twenty five international built projects organized by the type of application and the plastic involved documents the broad range of plastic in architecture Finally a look ahead at the future describes the current state of the art in materials research

Permanent Change Michael Bell, Craig Buckley, 2014-04-15 Almost every industry in the world has benefited from the invention of plastics but it is only in the recent past that they have begun to be appreciated as architectural materials in their own right Plastics are quickly becoming one of the most ubiquitous materials in construction and have the potential to reshape the roles of architects and engineers as well as the construction industry at large As a building material plastic allows for easily molded and formed shapes leading to increasingly malleable design processes Despite being the most deeply engineered building materials today plastics are still in the nascent stages of understanding in terms of their potential applications and uses In Permanent Change an interdisciplinary group of architects historians theorists and engineers collectively explore the past present and future possibilities of this innovative building material Transparent Plastics Simone Jeska, 2007-10-05 Recent years have seen the construction of buildings made of plastic structures that are as attractive as they are unusual After initial experiments in the 1970s plastic is currently experiencing a tremendous boom Originally used for temporary structures like the BMW Pavilion in Frankfurt it is now employed in many permanent buildings as well including the recent Catholic church in Radebeul by Staib Behnisch Prominent international avant garde architects such as Shigeru Ban and Herzog de Meuron frequently use transparent plastic for their structures Transparent plastic seems ephemeral and thus captures the spirit of the times Its various qualities between transparent and translucent make it possible to achieve fascinating effects with light and color Projects presented include the Allianz Arena in Munich by Herzog

de Meuron the Rocket Tower in Leicester by Grimshaw Partners the Paper Art Museum by Shigeru Ban in Shizuoka Japan and the public housing development Cit Manfeste in Mulhouse by Lacaton Vassal Seit einigen Jahren entstehen ebenso attraktive wie ungewöhnliche Bauten aus Kunststoff Nach ersten Versuchen in den 1970er Jahren erlebt der Baustoff derzeit einen ungeheuren Boom Zunächst für temporäre Bauten wie dem BMW Pavillon in Frankfurt genutzt entstehen mittlerweile auch zahlreiche bleibende Gebäude wie kürzlich die Katholische Kirche von Staib Behnisch in Radebeul Bekannte Architekten der internationalen Avantgarde wie Shigeru Ban oder Herzog de Meuron verwenden gerne transparenten Kunststoff für ihre Bauten Das Material scheint ephemere transitorisch ohne es zu sein und trifft damit den Nerv der heutigen Zeit Seine unterschiedlichen Qualitäten zwischen transparent und transluzent erlauben faszinierende Licht und Farbeffekte Zu den dargestellten Projekten gehören die Allianz Arena in München von Herzog de Meuron der Rocket Tower in Leicester von Grimshaw Partner das Papiermuseum von Shigeru Ban in Shizuoka Japan und der soziale Wohnungsbau der Cit Manfeste in Mulhouse von Lacaton Vassal

The New Carbon Architecture Bruce King, 2017-12-05 Soak up carbon into beautiful healthy buildings that heal the climate Green buildings that slash energy use and carbon emissions are all the rage but they aren't enough The hidden culprit is embodied carbon the carbon emitted when materials are mined manufactured and transported comprising some 10% of global emissions With the built environment doubling by 2030 buildings are a carbon juggernaut threatening to overwhelm the climate It doesn't have to be this way Like never before in history buildings can become part of the climate solution With biomimicry and innovation we can pull huge amounts of carbon out of the atmosphere and lock it up as walls roofs foundations and insulation We can literally make buildings out of the sky with a massive positive impact The New Carbon Architecture is a paradigm shifting tour of the innovations in architecture and

construction that are making this happen Office towers built from advanced wood products affordable low carbon concrete alternatives plastic cleaned from the oceans and turned into building blocks We can even grow insulation from mycelium A tour de force by the leaders in the field The New Carbon Architecture will fire the imagination of architects engineers builders policy makers and everyone else captivated by the possibility of architecture to heal the climate and produce safer healthier and more beautiful buildings *The Architect* ,1927
