Death Shelly Kagan, 2012-04-24 Examines the myriad of questions that arise when confronting the meaning of mortality challenging many widely held views about death and inviting readers to take a fresh look at the fact that they will die Our Babies, Ourselves Meredith Small, 1999-05-04 A thought provoking combination of practical parenting information and scientific analysis Our Babies Ourselves is the first book to explore why we raise our children the way we do and to suggest that we reconsider our culture s traditional views on parenting New parents are faced with innumerable decisions to make regarding the best way to care for their baby and naturally they often turn for guidance to friends and family members who have already raised children But as scientists are discovering much of the trusted advice that has been passed down through generations needs to be carefully reexamined In this ground breaking book anthropologist Meredith Small reveals her remarkable findings in the new science of ethnopediatrics Professor Small joins pediatricians child development researchers and anthropologists across the country who are studying to what extent the way we parent our infants is based on biological needs and to what extent it is based on culture and how sometimes what is culturally dictated may not be what s best for babies Should an infant be encouraged to sleep alone Is breast feeding better than bottle feeding or is that just a myth of the nineties How much time should pass before a mother picks up her crying infant And how important is it really to a baby s development to talk and sing to him or her These are but a few of the important questions Small addresses and the answers not only are surprising but may even change the way we raise our children **Handbook for Those Who Grieve** Martin M Auz, 2015-02-25 How can I best help someone who has lost a loved one How do I talk to a child about the death of a family

member What do I need to think about before I plan a funeral Confusion bewilderment and a lack of direction commonly surface in the aftermath of a death It s also the time when dealing with the issues and emotions of the experience can lead to making hasty or unwise decisions In this revised edition of *Handbook for Those Who Grieve* Martin M Auz and Maureen Lyons Andrews offer concise practical topic based lists and suggestions to help people immediately after a loss Rather than philosophizing theologizing or rationalizing the authors draw on their research and personal experiences to provide short but solid answers to help grieving people successfully deal with the countless issues and varied emotions that a person s death is sure to thrust upon them

Raised by Animals Jennifer L. Verdolin, 2023-09-22 When it comes to family matters do humans know best Leading animal behaviorist Dr Jennifer Verdolin argues otherwise in this eye opening book Welcome to the wild world of raising a family in the animal kingdom sometimes shocking often ingenious Every species can surprise us Chimps have a knack for minimizing temper tantrums and owl chicks have a remarkable gift for sharing A prairie vole knows exactly when his stressed out partner needs a massage And anyone who considers reptiles cold blooded should consider the caecilian a snakelike animal from Kenya After laying eggs the mother grows a fatty layer of skin which her babies eat after hatching not one of the book s many lessons from the wild to be tried at home Along the way Verdolin challenges our often counterproductive beliefs about what families ought to be like and how we should feel By finding common ground with our furry feathered and even slimy cousins we can gain new insight on what natural parenting really means and perhaps do a better job of forgiving ourselves for those days when we re only human

gifted patients emotional struggles And gifted individuals will realize that others experience similar struggles Sleep and Health Michael A. Grandner, 2019-04-17 Sleep and Health provides an accessible yet comprehensive overview of the relationship between sleep and health at the individual community and population levels as well as a discussion of the implications for public health public policy and interventions Based on a firm foundation in many areas of sleep health research this text further provides introductions to each sub area of the field and a summary of the current research for each area This book serves as a resource for those interested in learning about the growing field of sleep health research including sections on social determinants cardiovascular disease cognitive functioning health behavior theory smoking and more Highlights the important role of sleep across a wide range of topic areas Addresses important topics such as sleep disparities sleep and cardiometabolic disease risk real world effects of sleep deprivation and public policy implications of poor sleep Contains accessible reviews that point to relevant literature in often overlooked areas serving as a helpful guide to all relevant information on this broad topic area Evolution, Early Experience and Human Development Darcia Narváez, 2012-11-29 The field of cognitive psychology has expanded rapidly in recent years with experts in affective and cognitive neuroscience revealing more about mammalian brain function than ever before In contrast psychological problems such as ADHD autism anxiety and depression are on the rise as are medical conditions such as diabetes obesity and autoimmune disorders Why in this era of unprecedented scientific self knowledge does there seem to be so much uncertainty about what human beings need for optimal development Evolution Early Experience and Human Development asserts that human development is being misshaped by government policies social practices and public beliefs that fail to consider basic human needs In this pioneering volume scientists from a range of disciplines theorize that the increase in conditions such as depression and obesity can be partially attributed to a disparity between the environments and conditions under which our mammalian brains currently develop and our evolutionary heritage For example healthy brain and emotional development depends to a significant extent upon caregiver availability and quality of care These include practices such as breastfeeding co sleeping and parental social support which have waned in modern society but nevertheless may be integral to healthy development As the authors argue without a more informed appreciation of the ideal conditions under which human brains minds develop and function human beings will continue to struggle with suboptimal mental and physical health and as problems emerge psychological treatments alone will not be effective The best approach is to recognize these needs at the outset so as to optimize child development Evolution Early Experience and Human Development puts forth a logical empirically based argument regarding human mammalian needs for optimal development based on research from anthropology neurobiology animal science and human development The result is a unique exploration of evolutionary approaches to human behavior that will support the advancement of new policies new attitudes towards health and alterations in childcare practices that will better promote healthy human development **Gender And Ageing: Changing**
