Practice in Modern Japan Roger Goodman, Kirsten Refsing, 2002-09-11 The issue of how Japanese society operates and in particular why it has succeeded has generated a wide variety of explanatory models including the Confucian ethic classlessness group consciousness and uniqueness in areas as diverse as body images and language patterns In *Ideology and Practice in Modern Japan* the contributors examine these models and the ways in which they have sometimes been used to create a sense of Japaneseness that obscures the fact that Japan is actually an extremely complex and heterogeneous society In particular practice at the micro level of society is explored to illuminate or express a broader ideology The contributors investigate a wide variety of subjects from attitudes to death to the role of education from film making to gender segregation to see what can be said about the phenomenon in particular what it tells us about Japan in general and what conclusions can be drawn for our understanding of society in the broadest sense *Masterpieces on Japan by Foreign Authors* Shōichi Saeki, Tōru Haga, 2023-03-23 This open access book includes forty one chapters about foreign observers discourses on Japan These include a wide range of perspectives from the travelogues of curious visitors to academic theses by scholars which offer us a broad spectrum of contents reflecting a variety of attitudes toward Japan The works were written during the period from the 1850s to the 1980s a timespan during which Japan became in stages more open to the outside world after a long isolation under the Tokugawa shogunate From the perspective of Japanology one can discern three distinct periods of rising interest in the country from abroad The first tide of such interest came shortly after the opening of Japan when various foreign travelers including those who could not be included in this book came over and wrote down their impressions of the country which was for them a land of mystery and mystique which had just opened its doors to them The second wave arose at the beginning of the twentieth century just after the Russo Japanese War when Japan again generated a remarkable surge of interest as a miracle in Asia that had pulled off the wondrous feat of defeating a white superpower The third wave was more recent which took place from the late 1960s to the 1980s a period of high economic growth when the miracle of Japan's remarkable economic recovery from the defeat of World War II attracted enthusiastic and curious attention from the outside world once again It is not the intention of this book to directly highlight such historical transitions but these forty two

brilliant mirrors forty one chapters including forty two discourses even when looked in casually provide us with unexpected insights and various perspectives Sh ichi Saeki 1922 2016 was Professor Emeritus the University of Tokyo T ru Haga 1931 2020 was Professor Emeritus International Research Center for Japanese Studies **New Essays in Japanese Aesthetics** A. series of detailed ethnographic and historical case studies It addresses a question about why the West has had such a fascination for the adeptness with which the Japanese apparently assimilate all things foreign and at the same time such a fear of their skill at artificially remaking and automating the world around them Countering the idea of a Japan that deviously or ingenuously copies others it elucidates the history of creative exchanges with the outside world and the particular myths philosophies and concepts which are emblematic of the origins and originality of copying in Japan The volume demonstrates the diversity and creativity of copying in the Japanese context through the translation of a series of otherwise loosely related ideas and concepts into objects images texts and practices of reproduction which include shamanic theatre puppetry tea utensils Kyoto town houses architectural models genres of painting calligraphy and poetry sample food displays and the fashion and car industries
