Guerard, Jr., 2013-01-04 Forecasting the art and science of predicting future outcomes has become a crucial skill in business and economic analysis. This volume introduces the reader to the tools, methods, and techniques of forecasting specifically as they apply to financial and investing decisions. With an emphasis on earnings per share (EPS), the author presents a data oriented text on financial forecasting, understanding financial data, assessing firm financial strategies such as share buybacks, and introduces the concept of portfolio construction and how movements in the economy influence stock price movements and introduce the reader to the forecasting process including exponential smoothing and time series model estimations. Subsequent chapters examine the composite index of leading economic indicators, LEI, review financial statement analysis and mean variance efficient portfolios and assess the effectiveness of analysts' earnings forecasts. Using data from such firms as Intel, General Electric, and Hitachi, Guerard demonstrates how forecasting tools can be applied to understand the business cycle, evaluate market risk, and demonstrate the impact of global stock selection modeling and portfolio construction. *Investments* Robert W. Klein,2019-07-25 This Festschrift honours Geoffrey H Moore s life long contribution to the study of business cycles After some analysts had concluded that business cycles were dead renewed economic turbulence in the 1970s and 1980s brought new life to the subject The study of business cycles now encompasses the global economic system and this work aims to push back the frontiers of knowledge The Commercialisation of Sport Trevor Slack,2004 Sport has become increasingly commercialised and there are many examples of close links that have developed between sport and business This collection examines five of them in a global context *The Education of a Speculator* Victor Niederhoffer,1998-03-19 Acclaim for *The Education of a Speculator* a provocative and penetrating look into the mind the soul and the strategies of one of the most controversial traders of all time A compelling and an entertaining read *The Wall Street Journal* Victor Niederhoffer gives us page after page of distilled investment wisdom Taken together this is pure nectar to those who aim for consistently superior stock market performance Barron s *The Education of a Speculator* offers plenty of insights into the way markets work but the epiphanies are what a reader might expect from Lao tzu rather than say Graham and Dodd Worth

magazine *The Education of a Speculator* is the first meaningful book on speculating. Successful speculating is as fine an art as chess, checkers, fishing, poker, tennis, painting, and music. Niederhoffer brings forth the best from each of these fields and shows the investor how their principles can enrich one's life and net worth. Martin Edelston, President, Boardroom Inc., publishers of Boardroom Classics and Bottom Line Personal, with an original mind and an eclectic approach, Victor Niederhoffer takes the reader from Brighton Beach to Wall Street, visiting all stops of interest along the way. What emerges is a book full of insights useful to the professional and layman alike. George Soros, Principal Investment Advisor, The Quantum Fund.

*Analyzing Modern Business Cycles* Philip Klein, 2017-10-03. This title was first published in 1990. A collection of essays on Business Cycles celebrating Geoffrey H. Moore on his 75th birthday, who joined the National Bureau of Economic Research in 1939 and was also Professor Emeritus at New York University. He progressed through many levels: research assistant, staff member, associate director of research, director of research, vice president of research, director of business cycle research, and most recently, membership on the Bureau's Board of Directors and its Executive and other Committees. Moore was prominently involved in the creation, development, and continuing improvement of a system of leading, lagging, and coincident indicators, an achievement of greatest importance. Commerce Business Daily, 2000.

**Identifying Patterns in Financial Markets** João Leitão, Rui Ferreira Neves, Nuno C.G. Horta, 2017-12-26. This book describes a new pattern discovery approach based on the combination among rules between Perceptually Important Points (PIPs) and the Symbolic Aggregate approximation (SAX) representation optimized by Genetic Algorithm (GA). The proposed approach was tested with real data from the S&P 500 index, and all the results obtained outperformed the Buy-Hold strategy. Three different case studies are presented by the authors.

**Agent-Based Computational Economics** Shu-Heng Chen, 2017-09-19. This book aims to answer two questions that are fundamental to the study of agent-based economic models: what is agent-based computational economics, and why do we need agent-based economic modelling of the economy? This book provides a review of the development of agent-based computational economics (ACE) from a perspective on how artificial economic agents are designed under the influences of complex sciences: experimental economics, artificial intelligence, evolutionary biology, psychology, anthropology, and neuroscience. This book begins with a historical review of ACE by tracing its origins. From a modelling viewpoint, ACE brings truly decentralized procedures into market analysis, from a single market to the whole economy. This book also reviews how experimental economics and artificial intelligence have shaped the development of ACE. For the former, the book discusses how ACE models can be used to analyse the economic consequences of cognitive capacity, personality, and cultural inheritance. For the latter, the book covers the various tools used to construct artificial adaptive agents, including reinforcement learning, fuzzy decision rules, neural networks, and evolutionary computation. This book will be of interest to graduate students researching computational economics, experimental economics, behavioural economics, and research methodology.
