Posner, Adrian Vermeule, 2007-01-04 In *Terror in the Balance* Posner and Vermeule take on civil libertarians of both the left and the right arguing that the government should be given wide latitude to adjust policy and liberties in the times of emergency They emphasize the virtues of unilateral executive actions and argue for making extensive powers available to the executive as warranted At a time when the struggle against violent extremism dominates the United States agenda this important and controversial work will spark discussion in the classroom and intellectual press alike *Terror*

Lett, Donald G Lett Jr, 2008-02 In an age when the supply of gasoline to feed this modern American society has become both more expensive and more scarce questions are being pondered Inquires like How can a modern society scale back its dependence on gasoline as a motive source Are there genuine alternative power sources Are they the answer to a growing crisis Recent announcements of hybrids like those from Honda Toyota and Ford have really brought attention to this issue Hybrids that use both gasoline engines and electric motors Really though alternative power sources have been around for as long as the automobile has been The battle between and among the steam car the electric and the gas car was fought out in the first couple of decades of the twentieth century This book explores the ins and outs of that battle A struggle from which the gasoline car emerged

Sze,2010-01-31 Based on the latest debate on Jean Paul Sartre s works on ethics and politics this book examines the relevancy and importance Sartre holds for contemporary concerns the reactionary nature of terrorism the extremity of counter violence and limitations of democratization efforts in our post 9 11 era all claiming the name of freedom and liberation It presents a different version of the violent Sartre which was presented recently as militant and supportive of terrorism by critics who were concerned with the terrorist nature of his writings Sartre in this project is reconstructed as a philosopher who although gave importance to the notion of violence in his politics was actually more concerned with containing violent means within morally excusable limits He is presented as both a realist who understood the inevitability of dirty hands in political struggles and also an absolutist against terrorism he considered wars that derailed from their purported ends of freedom as morally condemnable Arguing for the need for moral limitations to all violent struggles and the need for seeing others as ends for themselves this project outlines an existential response needed to help us reaffirm our moral compass through the invention of existential humanist ethics **Terrorism in American Cinema** Robert

Cettl,2009-10-21 The American cinema of terrorism although coming to prominence primarily in the 1970s amidst high profile Palestinian terrorist activity actually dates back to the beginnings of the Cold War But this early terrorist cinema was centered largely around the Bomb who had it who would use it when and differs greatly from the terrorist cinema that would follow Changing world events soon broadened the cinema of terrorism to address emerging international conflicts including Black September pre 9 11 Middle Eastern conflicts and the post 9 11 War on Terror This analytical filmography of American terrorist films establishes terrorist cinema as a unique subgenre with distinct thematic narrative and stylistic trends It covers all major American films dealing with terrorism from Otto Preminger s Exodus 1960 to Ridley Scott s Body of Lies 2008

Egyptology occultism sexuality the mythology of werewolves the philosophy of Hegel and many other aspects of the Romantic and Symbolist movements **Indirect Responsibility for Terrorist Acts** Marja Letho, 2009-10-12 The roots of organized crime penetrate deep into the normal operations of society its economic and financial patterns sometimes also its bureaucracy and ideological apparatuses Drug trafficking traffic in persons or terrorist networks could not exist if they did not engage large groups of people and routine patterns of social and economic behaviour Often the indirect actors remain hidden however and beyond the reach of the arm of the law In an analogical way terrorism emerges from and is sustained by a wide network of ideological economic financial and other actors and activities Marja Lehto maps in this work the way in which international legal regulation particularly the new conventions adopted within the UN after 1996 have sought to extend international responsibility beyond the groups of immediate perpetrators to the sources or incitation recruitment and financing of terrorist activities She also deals with some of the thorniest questions in the field along the way from the significance and difficulties in the of efforts to define terrorism to the need for a general part of international criminal law and the role of a political organ the United Nations Security Council in preventing and punishing the crime of terrorism This carefully crafted insightful and hugely relevant study not only fulfils a gap in the existing literature but does so with analytical precision bearing simultaneously in mind the important political and theoretical even philosophical implications of this contentious topic Few topics have generated more international law writing in recent years both scholarly and polemical than terrorism So it is a genuinely welcome surprise when someone brings out a study that has a fresh angle on the topic and all the more so if the writer not only fulfils what appears like an obvious gap in existing literature but does that with analytical precision bearing simultaneously in mind the important political and theoretical even philosophical implications of this contentious topic This is what Marja Lehto does in this carefully crafted insightful and hugely relevant study of what she suggests we call indirect responsibility for terrorist acts Martti Koskeniemi Academy Professor University of Helsinki
