Existential Psychology for the Prevention of Extremism Alain Ruffion,2025-07-30 Many scientific works and studies have focused on the phenomena of extremism and violent radicalization However very few resources exist to effectively address this issue from an educational perspective The diagnoses are often fragmented and give prominence to geopolitical and socio political factors Yet an interdisciplinary analysis of the processes of extremism and radicalization indicates the central role of biographical psychological or even psychopathological variables and traumas How can we draw deep lessons from this to innovate in education and truly give ourselves the means to prevent these processes of extremism and radicalization This book deliberately choosing positive and existential psychology as a resource proposes to answer this question with the support of scientific and creative resources that finally address and respond to the root causes These resources are adapted to socio educational professions and understandable by parents They finally restore courage ideas and motivating and positive approaches for all those who want to take up this increasingly widespread and threatening challenge within our societies At the same time these resources make it possible to work on the transmission of values strengths and to contribute to the mental health and fulfilment of our youth a capital theme if there ever was one **Evidence-Based**

Revitalizing Victimization Theory Travis C. Pratt, Jillian J. Turanovic, 2021-04-09 Revitalizing Victimization Theory Revisions Applications and New Directions revises some of the major perspectives in victimization theory applies theoretical perspectives to the victimization of vulnerable populations and carves out new theoretical territory that is clearly needed but has yet to be developed With the exception of a handful of isolated works in the mid twentieth century theory and research on victimization did not come into its own until the late 1970s with the articulation of lifestyle and routine activity theories Research conducted within this tradition continues to be an important part of the overall criminological enterprise and a large body of empirical knowledge has been generated Nevertheless theoretical advances in the study of victimization have largely stalled within the field of criminology Indeed little in the way of new theoretical headway has been made in well over a decade This is an ideal time to revitalize victimization theory and this volume does just that It is an ambitious project that will hopefully reignite the kinds of theoretical discussions that once held the attention of the field The work included here will shape the future of victimization theory and research in years to come This volume should be of interest to a wide range of criminologists and have the potential to be used in graduate seminars and upper level undergraduate courses
