Infants and Infants at Risk Johnson-Martin, Nancy Johnson-Martin, Kenneth G. Jens, Susan M. Attermeier, 1986 **The Carolina Curriculum for Infants and Toddlers with Special Needs** Nancy Johnson-Martin, 1991 To meet the recognized importance of intervention during infancy and the preschool years the first edition of this curriculum was developed The Carolina curriculum for handicapped infants and infants at risk This is the revised edition and helps to further develop planning to assist states come into compliance of Public Law 99 457 **At-risk and Handicapped Newborns and Infants** Anne H. Widerstrom, Barbara A. Mowder, Susan Rebecka Sandall, 1991 **National Library of Medicine Current Catalog** National Library of Medicine (U.S.), **Assessment of Young Developmentally Disabled Children** Theodore D.

Wachs, Robert Sheehan, 2013-06-29 Our knowledge of the cognitive and social emotional functioning of developmentally disabled infants and preschoolers derives in large part from our assessment of such children This book has been developed to familiarize readers with the characteristics of developmentally disabled children and to introduce to readers aspects of measurement that are of relevance to the assessment of atypical infants and preschoolers The book has been developed with clinicians and prospective clinicians in mind These are individuals who are committed to the care and education of developmentally disabled infants and preschoolers and the families of those children The book has thus been written to provide support for the use of assessment data in planning early intervention programs Of special note in the development of this edited book is that it is divided into four major parts with interrelated chapters in each part The authors of chapters in Parts II and III had access to the chapters in Part I before writing their chapters The summary chapters found in Part IV were similarly written by authors having access to all chapters in Parts I III This approach to the development of an edited book was chosen as a way of ensuring an integration of major concepts throughout the book This process is also a reflection of our belief that assessment is an interdisciplinary process involving the synthesis of a number of diverse interests

Diagnosis and Assessment in Autism Eric Schopler, Gary B. Mesibov, 2013-11-21 Division TEACCH located in the School of Medicine at the University of North Carolina at Chapel Hill was one of the first programs in the country to understand that autism was an organic rather than a biologic condition We were also one of the earliest programs to recognize the enormous variability in characteristics and behaviors of children described as autistic For these reasons the processes of diagnosis and assessment have always been important and central to our program We are therefore extremely pleased to have a volume representing the most current thinking of the field's leaders in these important areas As with the preceding books in our series Current Issues in Autism this volume is based on one of the annual TEACCH conferences held

in Chapel Hill each May The books are not simply published proceedings of the conference papers however Rather conference participants are asked to develop a full chapter around their presentations Other international experts whose work is beyond the scope of the conference but related to the major theme are asked to contribute chapters as well These volumes are designed to provide the most current knowledge in research and professional practice available on the most important issues defining and clarifying autism

Infant Assessment M. Virginia Wyly, 2018-02-12 Infancy is one of the most fascinating periods in the human life cycle In two short years infants become thinking speaking social beings As this book explains over the past three decades researchers and clinicians have developed an array of assessment methods for measuring infant development and diagnosing infants with developmental delays The field of infant assessment has broadened from a major focus on cognitive development to an emphasis on parent infant interaction play assessment and newer strategies that involve naturalistic observations Because of the need to look at the whole infant assessment often involves multiple disciplines The interdisciplinary approach measures the infant domains of motor skills cognitive abilities and language acquisition and evaluates the infant's psychosocial environment The chapters in this volume provide a solid overview of the current trends in infant assessment measures and procedures The book can be used in undergraduate and graduate infant development courses and for advanced courses in infant assessment
