J. Trow,2011-12-01 The author of Jack the Ripper Quest for a Killer examines a different series of grisly unsolved murders in Victorian era London Dismembered corpses are discovered

scattered along the banks of the river Thames a calculating clinical multiple murderer is on the loose and the London police have no inkling of the killer's identity and more than a century later they still don't. In this M J Trow's latest reinvestigation of a bizarre and brutal serial killing he delves deep into the appalling facts of the case into the futile police investigations and into the dark history of late Victorian London. The incredible criminal career of the Thames torso murderer has gripped readers and historians ever since he committed his crimes in the 1870s and 1880s. The case poses as many questions as the even more notorious killings of Jack the Ripper. How over a period of fifteen years did the Thames murderer get away with a succession of monstrous and sensational misdeeds. And what sort of perverted character was he why did he take such risks why did he kill again and again. *The Murders in Praed Street* Cecil John Charles Street, 1928 **Ireland in the**

Fandom is the first long form treatment of serial killer fandom. Fan studies have mostly ignored this most moralized form of fandom as a stigmatized Bad Other in implicit tension with the field's successful campaign to recuperate the broader fan category. Yet serial killer fandom as Judith May Fathallah shows in the book can be usefully studied with many of the field's leading analytic frameworks. After tracing the pre-digital history of fans mediated celebrity and killers Fathallah examines contemporary fandom through the lens of textual poaching affective community subcultural capital and play. With close readings of fan posts comments and mashups on Tumblr TikTok and YouTube alongside documentaries podcasts and a thriving murderabilia industry Killer Fandom argues that this fan culture is in many ways hard to distinguish from more mainstream fandoms. Fan creations around Aileen Wuornos Jeffrey Dahmer Ted Bundy and Richard Ramirez among others demonstrate a complex and shifting stance toward their objects marked by parodic humor and irony in many cases. Killer Fandom ultimately questions given our crime and violence saturated media culture whether it makes sense to set Dahmer and Wuornos fans apart from the rest of us. **Lessons and Legacies XV** Erin McGlothlin, Avinoam Patt, 2024-05-15 The

fifteenth volume in the Lessons Legacies series featuring multidisciplinary research in the Holocaust and Jewish cultural history on the theme of Global Perspectives and National Narratives The fourteen chapters included in this volume manifest three broad categories history literature and memory These chapters continue the recent trend in Holocaust Studies of a focus on local history integrating specific regional and national narratives into a more global approach to the event Newer studies have continued to incorporate what was once termed the periphery into a more global examination of the experiences of Jewish refugees in flight to Latin America Africa and the Soviet Union At the same time very specific local studies deepen our knowledge of the mechanics of genocide along with the experiences of refugees in flight and the subsequent dimensions of Holocaust memory and representation New research on Holocaust literature continues to unearth unexamined texts from the period of the war itself which can shed light on Jewish responses to persecution and strategies for survival The study of Holocaust testimonies continues to grapple with the challenge of language how to convey through the limits of human language the depths of barbarity to an audience that could never fully understand what they had not personally experienced Likewise literary studies continue to incorporate texts that were once considered outside the standard canon of Holocaust literature such as science fiction and children s literature The tension between local and global perspectives can also be seen quite clearly in what the volume s editors understand by the term memory studies or new approaches to research on museums and memorials The very specific nature of collective memory on the national level continues to be the site of the contested politics of memory A number of the chapters in this volume engage with the conflict of monuments and memorials museums attempts to resolve provenance issues questions around the ethics of Holocaust tourism and the inclusion of new technologies and digital survivors into the memorial landscape
