Welch,2011-03-14 A Taste for the Foreign examines foreignness as a crucial aesthetic category for the

development of prose fiction from Jacques Amyot's 1547 translation of *The Ethiopian Story* to Antoine Galland's early eighteenth century version of *The Thousand and One Nights*. While fantastic storylines and elements of magic were increasingly shunned by a neo-classicist literary culture that valued verisimilitude above all else, writers and critics surmised that the depiction of exotic lands could offer a superior source for the novelty, variety and marvelousness that constituted fiction's appeal. In this sense, early modern fiction presents itself as a privileged site for thinking through the literary and cultural stakes of exoticism or the taste for the foreign. Long before the term exoticism came into common parlance in France, fiction writers thus demonstrated their understanding of the special kinds of aesthetic pleasure produced by evocations of foreignness, developing techniques to simulate those delights through imitations of the exotic. As early modern readers eagerly consumed travel narratives, maps and international newsletters, novelists discovered ways to blur the distinction between true and imaginary representations of the foreign, tantalizing readers with an illusion of learning about the faraway lands that captured their imaginations. This book analyzes the creative appropriations of those scientific or documentary forms of writing that claimed to inform the French public about exotic places. Concentrating on the most successful examples of some of the most important sub-genres of prose fiction in the long seventeenth century—heroic romances, shorter urban novels, fictional memoirs and extraordinary voyages—the book examines how these types of fiction creatively appropriate the scientific or documentary forms of writing that claimed to inform the French public about exotic places. Published by University of Delaware Press. Distributed worldwide by Rutgers University Press.

The Invention of 'Folk Music' and 'Art Music'. Matthew Gelbart, 2007-10-11. We tend to take for granted the labels we put to different forms of music. This study considers the origins and implications of the way in which we categorize music. Whereas earlier ways of classifying music were based on its different functions, for the past two hundred years we have been obsessed with creativity and musical origins and classify music along these lines. Matthew Gelbart argues that folk music and art music became meaningful concepts only in the late eighteenth and early nineteenth centuries and only in relation to each other. He examines how cultural nationalism served as the earliest impetus in classifying music by origins and how the notions of folk music and art music followed in

conjunction with changing conceptions of nature and changing ideas about human creativity Through tracing the history of these musical categories the book confronts our assumptions about different kinds of music **The Connoisseur** ,1908
