The Changed Political Thought Of The Negro 1915 194:

Community without Borders: Scots Migrants and the Changing Face of Power in the Dutch Republic, c. 1600-1700

Douglas Catterall, 2021-10-25 This is a valuable book for anyone interested in the cultural meaning of preindustrial migration. Arguing that early modern European migrants could fundamentally influence their fate and their adopted communities, it explores the world of Scots migrants to the Dutch port of Rotterdam c. 1600-1700. The heart of the study is a reconstruction of the social networks that Scots used to establish and sustain themselves in Rotterdam, drawn from unusually rich narrative sources. Through their social ties, Scots also told stories and kept memories as they created complex identities encompassing Rotterdam, Scotland, and places further afield. By shaping their relationships to Rotterdam, Scots had a broad impact on their adopted home. Their actions helped change Rotterdam's political, religious, and legal fabric, and even tied Rotterdam to the wider Atlantic world.

Interpreting the Founding Alan Gibson, 2010-02-02. Now widely regarded as the best available guide to the study of the Founding, the first edition of *Interpreting the Founding* provided summaries and analyses of the leading

interpretive frameworks that have guided the study of the Founding since the publication of Charles Beard's *An Economic Interpretation of the Constitution* in 1913. For this new edition, Gibson has revised and updated his study, including his comprehensive bibliography and also added a new concluding chapter on the Unionist Paradigm or Federalist Interpretation of the Constitution. As in the original work, Gibson argues in the new edition that scholarship on the Founding is no longer steered by a single dominant approach or even by a set of questions that control its direction. He features insightful extended discussions of pioneering works by leading scholars of the Founding, including Louis Hartz, Bernard Bailyn, Gordon Wood, and Garry Wills, that best exemplify different schools of interpretation. He focuses on six approaches that have dominated the modern study of the Founding: Progressive, Lockean, liberal, Republican, Scottish Enlightenment, multicultural, and multiple traditions. Approaches before concluding with the Unionist or Federalist paradigm. For each approach, Gibson traces its fundamental assumptions, revealing deeper ideological and methodological differences between schools of thought that on the surface seem to differ only about the interpretation of historical facts. While previous accounts have treated the study of the Founding as the sequential replacement of one paradigm by another, Gibson argues that all of these interpretations survive as alternative and still viable approaches. By examining the strengths and weaknesses of each approach and showing how each has simultaneously illuminated and masked core truths about the American Founding, he renders a balanced account of the continuing and very vigorous debate over the origins and foundations of the American republic. Brimming with intellectual vigor and based on both a wide and deep reading in the voluminous literature on the subject, Gibson's new edition is sure to reinforce this remarkable book's reputation while winning new converts to his argument.

A Different Vision Thomas D. Boston, 2002-01-04. This work brings together for the first time the ideas, philosophies, and interpretations of North America's leading African American economists, demonstrating that racial inequality has had an immense impact on African Americans' daily lives.
