Genetic Theory of Reality James Mark Baldwin, Jaan Valsiner, 2017-07-12 James Mark Baldwin left a legacy that has yet to be fully examined one with profound implications for science and the humanities In some sense it paralleled that of his friend Charles Sanders Peirce whose semiotics became understood only a century later Baldwin was trying to make sense of complex biological and social processes that only now have come into the limelight as biological sciences have re emerged in psychology Baldwin s focus on development based on the observation of his own children and extrapolated to his general theoretical scheme is fully in line with where contemporary biological sciences are heading This is exemplified by the bounded flexibility of the work of the genetic system The general principle of persistent exploration of the environment with the result of creating novelty which was the core of Baldwin s theoretical system has since the 1960s become the guiding idea in genetics Contemporary developmental science is rooted in Baldwin s thinking In his new introduction Jaan Valsiner shows that Baldwin s Genetic Theory of Reality demonstrates how human beings are in their nature social beings establishes an alternative conceptualization of evolutionary theory and formulates a system of developmental logic all of which serve as the foundation for developmental psychology as a whole This is a work of social science rediscovery long overdue

Illusion and Reality: A Study of the Sources of Poetry Christopher Caudwell, 2020-07-14 This book contains Christopher Caudwell's 1937 treatise *Illusion and Reality*. It is a work of Marxist literary criticism that develops the idea that each individual era of British poetry stems from a novel economical paradigm in bourgeois society. Christopher St John Sprigg 1907-1937 more commonly known by his pseudonym Christopher Caudwell was a British Marxist poet and thinker. In early life he made his way to Marxism and set about rethinking everything in light of it from poetry to philosophy to physics and became a staunch member of the Communist Party of Great Britain. Many vintage texts such as this are becoming increasingly rare and expensive and it is with this in mind that we are republishing this volume now in an affordable modern high quality edition. It comes complete with a specially commissioned new biography of the author.

The Birth and Death of Literary Theory Galin Tihanov, 2019-07-30 Until the 1940s when awareness of Russian Formalism began to spread, literary theory remained almost exclusively a Russian and Eastern European invention. *The Birth and Death of Literary Theory* tells the story of literary theory by focusing on its formative interwar decades in Russia. Nowhere else did literary theory emerge and peak so early even as it shared space with other modes of reflection on literature. A comprehensive account of every important Russian trend between the world wars, the book traces their wider impact in the West during the 20th and 21st centuries. Ranging from Formalism and Bakhtin to the legacy of classic literary theory in our post-deconstruction world literature era, Galin Tihanov provides answers to two fundamental questions: What does it mean to think about literature theoretically and what happens to literary theory when this option is no longer available? Asserting radical historicity, he offers a time-limited way of reflecting upon literature not in order to write theory's obituary but to examine its continuous presence across successive regimes of relevance. Engaging and insightful, this is a book for anyone interested in theory's origins and in what has happened since its demise.

The Pattern of the Chinese Past Mark Elvin, 1973 A satisfactory comprehensive history of the social and economic development of pre-modern China, the largest country in the world in terms of population and with a documentary record covering three millennia, is still far from possible. The present work is only an attempt to disengage the major themes that seem to be of relevance to our understanding of China today. In particular, this volume studies three questions: Why did the Chinese Empire stay together when the Roman Empire and every other empire of antiquity of the middle ages ultimately collapsed? What were the causes of the medieval revolution which made the Chinese economy after about 1100 the most advanced in the world? And why did China after about 1350 fail to maintain her earlier pace of technological advance while still in many respects advancing economically? The three sections of the book deal with these problems in turn but the division of a subject matter is to some extent only one of convenience. These topics are so interrelated that in the last analysis none of them can be considered in isolation from the others.
