Tom Yulsman,2002-12-06 With stunning regularity the search for our cosmic roots has been yielding remarkable new discoveries about the universe and our place in it In his compelling book *Origins The Quest for Our Cosmic Roots* addresses some of the most profound issues humans have ever confronted In his compelling book veteran science journalist Tom Yulsman chronicles the latest discoveries and describes in clear and engaging terms what they mean From the interior of protons to the outer reaches of the universe and from the control room of one of the world s most powerful particle accelerators to an observatory atop the tallest mountain in the Pacific basin Yulsman takes readers on a fantastic voyage at the cutting edge of science     **When the Earth Was Green** Riley Black,2025-02-25 Winner A Friend of Darwin Award 2024 A gorgeously composed look at the longstanding relationship between prehistoric plants and life on Earth Fossils plants allow us to touch the lost worlds from billions of years of evolutionary backstory Each petrified leaf and root show us that dinosaurs saber toothed cats and even humans would not exist without the evolutionary efforts of their leafy counterparts It has been the constant growth of plants that have allowed so many of our favorite fascinating prehistoric creatures to evolve oxygenating the atmosphere coaxing animals onto land and forming the forests that shaped our ancestors anatomy It is impossible to understand our history without them Or our future Using the same scientifically informed narrative technique that readers loved in the award winning *The Last Days of the Dinosaurs* in *When the Earth Was Green* Riley Black brings

readers back in time to prehistoric seas swamps forests and savannas where critical moments in plant evolution unfolded Each chapter stars plants and animals alike underscoring how the interactions between species have helped shape the world we call home As the chapters move upwards in time Black guides readers along the burgeoning trunk of the Tree of Life stopping to appreciate branches of an evolutionary story that links the world we know with one we can only just perceive now through the silent stone from ancient roots to the present Genes Only Defence AJC Green,2019-08-30 At the beginning of time a supernatural being was spawned and she oversaw the creation of the universe A series of environmental disasters and protonic wars have ruined the planet Zula A space station was built to house a select group of survivors The scientists on the space station develop new technologies which are used to build a new spaceship Also developed is D stasis a process for extending hibernation indefinitely which could facilitate travel over intergalactic distances When the space station is attacked by aliens the only way to save a group of children is to launch them in the new spaceship which has been programmed to search for a habitable planet The mysterious spirit Leaffe intervenes After a voyage of 20 000 light years they awaken from D stasis in a solar system consisting of nine planets and a small sun The ship is near an ice planet which is obviously uninhabitable An accident with a 3 D model prompts a plan to blow up a moon which should lead to the planet being moved to a warmer orbit Radio contact through a black hole has enabled the receipt of messages transmitted from the space station Haven and possible transport giving them hope of seeing their families in the future Their system of hibernation allows the travellers to periodically observe the planet s geological and evolutionary changes over long periods without themselves aging The planet is seeded with a variety of life forms whose evolution leads to some interesting and dangerous adventures **Pacific Indigenous Dialogue** ,2007 American Journal of Science ,1879 *The American Journal of Science* ,1879 The American journal of science and arts *American Journal of Science and Arts* ,1879 The American Journal of Science Mrs. Gambold,1879 The American Journal of Science and Arts ,1879
