The Changing World Patricia Fara, Peter Gathercole, Ronald Laskey, 1996-04-18 This book was originally published in 1996 At the time of publication a number of unexpected and far reaching events had transformed the world In rapid succession the disintegration of the Communist bloc reconfigured international relationships while the ending of apartheid symbolised human faith for a better future AIDS ravaged developing countries but it also reshaped scientific research and cultural attitudes towards sexuality The revolution in genetic medicine coincided with increased rights for minorities and women yet a growing sensitivity towards our environment means that millennial celebrations are overshadowed by forecasts of ecological catastrophe In this volume eight famous experts present their energetic commitment to improvement These powerful essays enabled a deeper understanding of the challenges confronting modern society

Power in the Changing Global Order Martin A. Smith, 2013-04-26 Power has been compared to the weather people discuss it all the time but very few really understand it This book seeks to demystify this complex concept by providing students with an incisive and engaging introduction to the shifting configurations of power in the contemporary global order Drawing on the work of leading international relations scholars philosophers and sociologists

the analysis goes beyond simplistic views of power as material capability focusing also on its neglected social dimensions These are developed and explored through a detailed examination of the changing international role status and capacities of the United States Russia and China since the end of the Cold War Far from achieving multipolarity the book concludes that the contemporary world remains essentially unipolar America having moved to correct the mistakes of George W Bush s first term in office while China and Russia have in different ways limited their own abilities to challenge American primacy This book will be essential reading for students of international relations and politics as well as anyone with an interest in the shifting balance of power in the global system
