The Chemical Weapons Convention And Arms Control In The Middle East:

The Chemical Weapons Convention and Arms Control in the Middle East Peter Herby, 1992 **WMD Arms Control in the Middle East** Harald Müller, 2016-02-17 The Middle East is a hot spot of proliferation It contains one state assumed to possess nuclear weapons several states that tried and failed to develop a military nuclear capability one state under suspicion of trying to do so and it is the world region that witnessed the most frequent and severe employment of chemical weapons since the end of World War I Notwithstanding not a single arms control regime concerning weapons of mass destruction WMD covers the region as a whole Instead we have seen several proliferation related military operations which have rather contributed to destabilization than served non proliferation This volume written under the auspices of the EU Consortium for Non Proliferation and Disarmament determines the current state of diplomatic efforts to establish a WMD free zone in the Middle East In doing so it provides insights into central actors conflicting political positions thereby explaining the stalemate of efforts to negotiate a WMD free zone Chapters written by renowned experts from academia and policy oriented think tanks as well as by next generation Middle East and arms control experts introduce the subject to the reader give background information about arms control initiatives provide technical expertise and endeavour to make proposals for arms control measures in support of the creation of a Middle East WMD free zone **The Military Balance in the Middle East** Anthony H. Cordesman, 2004-09-30 Noted Middle East military expert Anthony H Cordesman details the complex trends that come into play in determining the military balance in a region that has become so critical to world peace This ready resource provides a wealth of information on military expenditures and major arms systems as well as qualitative trends by country and by zone However as Cordesman stresses because the greater Middle East is more a matter of rhetoric than military reality mere data summarizing trends in 23 different countries is no substitute for a substantive explanation Using tables graphs and charts this study explores every aspect of the regional military balance with attention to sub regional balances internal civil conflicts and low level border tensions The Middle East is certainly one of the most militarized areas in the world and changes in technology access to weapons of mass destruction and political instability contribute to a situation that has long been in constant flux Some of the regional flashpoints covered in this study include the Maghreb North Africa the Arab Israeli conflict dominated by Israel versus Syria and the Gulf divided into those states that view Iran as the primary threat and those who lived in fear of Iraq Internal conflicts such as those in Mauritania Algeria Libya Egypt Sudan Bahrain Saudi Arabia Iraq and Yemen increasingly dominate regional tensions In addition border conflicts within the region and with neighboring countries could further aggravate the delicate balance *American Foreign Policy*, 1991

Israel's Nuclear Dilemma (Routledge Revivals) Yair Evron, 2014-06-03 Originally published in 1994 Yair Evron opens the book with an account of the development of Israel's nuclear doctrine and the internal disagreements within the Israeli political and strategic elite over how nuclear policy should be conducted There follows an analysis of the reactions from Arab

states and of how with the exception of Iraq they have so far refrained from developing their own nuclear weapons **A Middle East Free of Weapons of Mass Destruction** Seyed Hossein Mousavian, Emad Kiyaei, 2020-04-17 The establishment of a Middle East zone free of nuclear weapons a concept more recently broadened to cover all weapons of mass destruction WMD has been before the international community for decades In this book two experts from the region explore why the matter remains unresolved and outline a comprehensive yet achievable roadmap to a Middle East free of WMD Weapons of mass destruction pose an existential threat to global peace and security But nowhere is it more urgent to stem their spread than in the Middle East a region fraught with mistrust and instability Accounting for these geopolitical realities including the ongoing talks to curb Iran s nuclear program the authors present a practical and innovative strategy to a Middle East free of weapons of mass destructions WMD They outline a phased approach toward disarmament in the region prescribing confidence building measures and verification tools to create trust among the region s governments Their vision also sees the realization of a WMD free zone within a broader regional agenda for security and cooperation to advance socioeconomic and political progress This book will be of great interest to students and scholars of international relations politics and security studies in the Middle East *Israel's Nuclear Dilemma* Yair Evron, 2005-07-28 The development of Israel s nuclear capacity controversy within the military elite implications for Arab Israeli relations and arms control in the region **Realism versus Global Arms Control and Disarmament** Carmen Chas, 2025-07-15 This incisive book explores the limits of international law through arms control and disarmament treaties Carmen Chas critically engages with literature on disarmament and classical realist analysis bridging the divide between international law and international relations scholarship *Middle Eastern Security* Efraim Inbar, Shmuel Sandler, 1995 This collection of studies examines the obstacles to an effective arms control regime in the Middle East and assesses the prospects of overcoming them It examines the role of the extra regional actors the dynamics of the region and the international context of a Middle East arms control regime
