The Chicago Board Of Trade 1859 1905 The Dynamics Of Self Regulation:

The Chicago Board of Trade, 1859-1905 Jonathan Lurie,1979 **Pragmatism and the Political Economy of Cultural Revolution, 1850-1940** James Livingston,2000-11-09 The rise of corporate capitalism was a cultural revolution as well as an economic event according to James Livingston That revolution resides he argues in the fundamental reconstruction of selfhood or subjectivity that attends the advent of an age of surplus under corporate auspices From this standpoint consumer culture represents a transition to a society in which identities as well as incomes are not necessarily derived from the possession of productive labor or property From the same standpoint pragmatism and literary naturalism become ways of accommodating the new forms of solidarity and subjectivity enabled by the emergence of corporate capitalism So conceived they become ways of articulating alternatives to modern possessive individualism Livingston argues accordingly that the flight from pragmatism led by Lewis Mumford was an attempt to refurbish a romantic version of modern possessive individualism This attempt still shapes our reading of pragmatism Livingston claims and will continue to do so until we understand that William James was not merely a well meaning middleman between Charles Peirce and John Dewey and that James s pragmatism was both a working model of postmodern subjectivity and a novel critique of capitalism Only in Australia William Coleman,2016-06-17 This edited volume is about the Australian difference and how Australia s economic and social policy has diverged from the approach of other countries Australia seems to be following a special path of its own that it laid down more than a century ago Australia s distinctive bent is manifested in a tightly regulated labour market a heavy reliance on means testing and income taxation a geographical centralization of political power combined with its dispersal amongst autonomous authorities and electoral singularities such as compulsory and preferential voting In seeking to explain this Australian Exceptionalism the book covers a diverse range of issues the strength and weakness of religion democratic and undemocratic tendencies the poverty of public debate the role of elites the exploitation of Australian sports stars the politics of railways the backwardness of agriculture deviation from the Westminster system the original encounter between European and Aboriginal cultures and the heavy taxation of tobacco Bringing together contributions from economists economic historians and political scientists the volume seeks to understand why Australia is different It offers a range of explanations from the historical legacy to material factors historical chance and personalities *The Political Economy of International Capital Mobility* M. Watson,2007-07-03 Matthew Watson draws a distinction between the spatial and the functional mobility of capital allowing fresh insights into existing work on the subject whilst repoliticizing the very idea of capital being in motion The dynamics of capital mobility and the patterns of risk exposure are illustrated through four detailed global case studies Horse Racing the Chicago Way Steven A. Riess,2022-06-08 Chicago may seem a surprising choice for studying thoroughbred racing especially since it was originally a famous harness racing town and did not get heavily into thoroughbred racing until the 1880s However Chicago in the late nineteenth and early twentieth centuries was

second only to New York as a center of both thoroughbred racing and off track gambling Horse Racing the Chicago Way shines a light on this fascinating complicated history exploring the role of political influence and class in the rise and fall of thoroughbred racing the business of racing the cultural and social significance of racing and the impact widespread opposition to gambling in Illinois had on the sport Riess also draws attention to the nexus that existed between horse racing politics and syndicate crime as well as the emergence of neighborhood bookmaking and the role of the national racing wire in Chicago Taking readers from the grandstands of Chicago s finest tracks to the underworld of crime syndicates and downtown poolrooms Riess brings to life this understudied era of sports history

Framing Finance Alex Preda, 2009-08-01 As the banking crisis and its effects on the world economy have made plain the stock market is of colossal importance to our livelihoods In Framing Finance Alex Preda looks at the history of the market to figure out how we arrived at a point where investing is not only commonplace but critical as market fluctuations threaten our plans to send our children to college or retire comfortably As Preda discovers through extensive research the public was once much more skeptical For investing to become accepted a deep seated prejudice against speculation had to be overcome and Preda reveals that over the course of the eighteenth and nineteenth centuries groups associated with stock exchanges in New York London and Paris managed to redefine finance as a scientific pursuit grounded in observational technology But Preda also notes that as the financial data in which they trafficked became ever more difficult to understand charismatic speculators emerged whose manipulations of the market undermined the benefits of widespread investment And so Framing Finance ends with an eye on the future proposing a system of public financial education to counter the irrational elements that still animate the appeal of finance

The Rise of the Midwestern Meat Packing Industry Margaret Walsh, 2021-09-15 The history of the meat packing industry of the Midwest offers an excellent illustration of the growth and development of the economy of that major industrial region In the course of one generation meat packing matured from a small scale part time activity to a specialized manufacturing operation Margaret Walsh's pioneering study traces the course of that development shedding light on an unexamined aspect of America's economic history As the Midwest emerged from the frontier period during the 1840s and 1850s the growing urban demand for meat products led to the development of a seasonal industry conducted by general merchants during the winter months In this early stage the activity was widely dispersed but centered mainly along rivers which provided ready transportation to markets The growth of the railroads in the 1850s coupled with the westward expansion of population created sharp changes in the shape and structure of the industry The distinct advantages of good rail connections led to the concentration of the industry primarily in Chicago but also in St

Louis and Milwaukee The closing of the Mississippi River during the Civil War insured the final dominance of rail transport and spelled the relative decline of such formerly important packing points as Cincinnati and Louisville By the 1870s large and efficient centralized stockyards were being developed in the major centers and improved technology particularly ice packing favored those who had the capital resources to invest in expansion and modernization By 1880 the use of the refrigerated car made way for the chilled beef trade and the foundations of the giant meat packing industry of today had been firmly established Margaret Walsh has located an impressive array of primary materials to document the rise of this important early industry the predecessor and in many ways the precursor of the great industrial complex that still dominates today's midwestern economy
