The Children of Africa Confront AIDS Arvind Singhal, W. Stephen Howard, 2003 Their insights suggest possibilities for hope and progress in this alarming African public health crisis **BOOK JACKET** **The African State and the AIDS Crisis** Amy S. Patterson, 2018-01-18 This edited volume analyzes African state responses to the AIDS epidemic Institutionally weak limited in resources and lacking power in the international system the African state has been characterized as inefficient corrupt and illegitimate The volume questions how aspects of the African state have affected policy responses to AIDS It highlights how African states must initiate develop and or implement the long term policy solutions necessary to combat AIDS It employs empirical studies from the international and national arena to illustrate why some African states have been able and willing to address AIDS while others have not Contributions analyze how international actors civil society organizations state ideology patriarchy and state capacity have influenced policies to fight AIDS Examining AIDS policies through the prism of African state development and linkages to domestic and international actors this book provides a nuanced understanding of the variety of responses to AIDS in Africa New Perspectives on African Childhood De-Valera NYM Botchway, Awo Sarpong, Charles Quist-Adade, 2019-09-05 What does it mean to be a child in Africa In the detached Western media narratives of penury wickedness and death have dominated portrayals of African childhood The hegemonic lens of the West has failed to take into account the intricacies of not only what it means to be an African child in local and culturally specific contexts but also African childhood in general Challenging colonial discourses this edited volume guides the reader through different comprehensions and perspectives of childhood in Africa Using a blend of theory empiricism and history the contributors to this volume offer studies from a range of fields including African literature Afro centric psychology and sociology Importantly in its eclectic geographical coverage of Africa this book unashamedly presents the good the bad and the ugly of African childhood The resilience creativity pains and triumphs of African childhood are skilfully woven together to present the myriad of lived experiences and aspirations of children from across Africa As an important contribution to African childhood studies this book has the potential to be used by policymakers to shape sustain or change socio cultural economic and education systems that accommodate African childhood dynamics and experiences at different levels **Journal of Social Development in Africa** , 2005 *African Childhoods* M. Ensor, 2012-09-07 With 70 per cent of its people under the age of 30 Africa is the world s youngest continent African youngsters have been largely characterized as either vulnerable victims of the frequent humanitarian crises that plague their homelands or as violent militarized youth and troubled gang members Young people s contributions to processes of educational provision peace building and participatory human development in Africa are often ignored While acknowledging the profound challenges associated with growing up in an environment of uncertainty and deprivation African Childhoods sheds light on African children s often constructive engagement with a variety of societal conditions adverse or otherwise and their ability to positively influence their own lives

and those of others *Children's Lives in an Era of Children's Rights* Afua Twum-Danso Imoh, Nicola Ansell, 2014-01-03 The Convention on the Rights of the Child CRC which was adopted unanimously by the United Nations General Assembly in 1989 marked a turning point in the perception of children in international law and policy Although it was hoped that the Convention would have a significant and positive impact on the lives of all children this has not happened in many parts of the world This edited volume based on empirical research and Non Governmental Organisation project data explores the progress of the Convention on the Rights of the Child and to a lesser extent the African Charter on the Rights and Welfare of the Child in nine African countries in the 25 years since it was adopted by the UN General Assembly The book considers the implementation of the Convention both in terms of policy and practice and its impact on the lived experiences of children in societies across the continent focusing on specific themes such as HIV AIDS education and disability child labour witchcraft stigmatisation street children parent child relationships and child participation The book breaks new ground in blending legal and social perspectives of the experiences of children and identifies concrete ways forward for the better implementation of the CRC treaty in the various political contexts that exist in Africa *Reconceptualizing Children's Rights in International Development* Karl Hanson, Olga Nieuwenhuys, 2012-11-29 Building on recent human rights scholarship childhood studies and child rights programming this conceptual framework on children s rights proposes three key notions living rights or the lived experiences in which rights take shape social justice or the shared normative beliefs that make rights appear legitimate for those who struggle to get them recognised and translations or the complex flux between different beliefs and perspectives on rights and their codification By exploring the relationships between these three concepts the realities and complexities of children s rights are highlighted The framework is critical of approaches to children as passive targets of good intentions and aims to disclose how children craft their own conceptions and practices of rights The contributions offer important insights into new ways of thinking and research within this emerging field

Pastoral Counseling for Orphans and Vulnerable Children Tuntufye Anangisye Mwenisongole, Elia Shabani Mligo, 2018-04-27 The existence of orphans is as inevitable to most African cities and the world as it is death These orphans are caused by the death of one or both parents due to various reasons including the scourge of HIV and AIDS Being orphans most of them are vulnerable to difficult lives because they have nobody to fend for them and take care of their lives They lack adequate food living expenses school fees and care since their current guardians are also in adverse economic situations In such situations orphans end up living a life of hopelessness and trauma which makes them deeply remember their dead parents and the care they received from them before death Following the vulnerable situation of most orphans this book through a study done in the Tanzanian context challenges churches to extend their counseling and caring ministries to Orphans and Vulnerable Children OVC It purports that the use of narrative approach is the most effective way to enter into the world of vulnerable children in order to provide pastoral counseling to them This approach helps pastoral counselors to

use life stories proverbs biblical narratives plays arts songs riddles poems symbols and images as healing and coping mechanisms for OVC Therefore this book is helpful not only to churches and their ministry to orphans and vulnerable children but also to those who care for orphans in their homes Moreover it will be helpful to children who live in adverse conditions worldwide to find ways to cope with their situations through the stories of children used inside this book HIV in World Cultures Dr Gustavo Subero,2013-12-28 This book analyses the way that HIV AIDS is often narrativised and represented in contemporary world cultures as well as the different strategies of remembrance deployed by different sub cultural groups affected by the illness Through a close study of a variety of cultural texts including cinema literature theatre art and photography amongst others it demonstrates the trajectory that such narratives and representations have undergone since the advent of the discovery of the disease in the 1980s Acknowledging the central yet often overlooked role that cultural products have played in the construction of public opinion towards the condition itself and those who suffer it this ground breaking volume focuses on a variety of narratives as well as strategies of coping with HIV AIDS that have emerged across the globe Bringing together research on the UK North and South America Africa and China it provides rich textual analyses of the ways in which the HIV positive body has been portrayed in contemporary culture with attention to the differences between specific national contexts whilst keeping in view a space of commonality amongst the different experiences reflected in such texts As such it will be of interest to social scientists and scholars of cultural and media studies concerned with cultural production and representations of the body and sickness *Encyclopedia of Adolescence* Roger J.R. Cheney,2017-03-05 The HIV AIDS epidemic in Africa has defined the childhoods of an entire generation Over the past twenty years international NGOs and charities have devoted immense attention to the millions of African children orphaned by the disease But in *Crying for Our Elders* anthropologist Kristen E Cheney argues that these humanitarian groups have misread the orphan crisis She explains how the global humanitarian focus on orphanhood often elides the social and political circumstances that actually present the greatest adversity to vulnerable children in effect deepening the crisis and thereby affecting children s lives as irrevocably as HIV AIDS itself Through ethnographic fieldwork and collaborative research with children in Uganda Cheney traces how the best interest principle that governs children s rights can stigmatize orphans and leave children in the post antiretroviral era even more vulnerable to exploitation She details the dramatic effects this has on traditional family support and child protection and stresses child empowerment over pity *Crying for Our Elders* advances current discussions on humanitarianism children s studies orphanhood and kinship By exploring the unique experience of AIDS orphanhood through the eyes of children caregivers and policymakers Cheney shows that despite the extreme challenges of growing up in the era of HIV AIDS the post ARV generation still holds out hope for the future *Media and Identity in Africa* John Middleton,Kimani Njogu,2010-01-04 What is the role of the media in Africa How do they work How do they interact with global media How do they reflect and express local culture Incorporating both African and international perspectives *Media and Identity in Africa* demonstrates how media outlets are used to perpetuate question or modify the unequal power relations
