Private Law in the External Relations of the EU Marise Cremona,Hans-W Micklitz,2016-03-18 Private Law in the External Relations of the EU is an innovative study of the interactions between EU external relations law and private law two unrelated fields of law inverted if private law is understood as regulatory private law the space where regulatory law intersects with private economic activity Here the link between the Internal Market and the global market and thereby international law is much more prominent In this book key questions about the relationship between EU external relations law and private law are answered including in what ways might European private law act as a tool to achieve EU external policy objectives particularly in regulatory fields How might the quickly developing EU external competence over the procedural dimensions of private law including private international law impact on substantive law both externally and internally And how is the legal position of private parties affected by EU external relations In asking these questions this edited collection opens up a field of enquiry into the so far underexplored relationship between these two fields of law In doing so it addresses three different aspects of the relationship i the evolution of the EU competence ii the ways in which EU private law extends its reach beyond the boundaries of the internal market and iii the ways in which the EU contributes to the formation of private regulation at the international level

academics is completed with the contributions of legal experts who have either been involved in the negotiations to establish the European public prosecutor or will be closely linked as public prosecutors to the functioning of the future European public prosecutor's office

The European Private International Law of Employment Uglješa Grušić, 2015-05-28

The European Private International Law of Employment provides a descriptive and normative account of the European rules of jurisdiction and choice of law which frame international employment litigation in the courts of EU Member States. The author outlines the relevant rules of the Brussels I Regulation Recast, the Rome Regulations, the Posted Workers Directive, and the draft of the Posting of Workers Enforcement Directive and assesses those rules in light of the objective of protection of employees. By using the UK as a case study, he also highlights the impact of the Europeanisation of private international law on traditional perceptions and rules in this field of law in individual Member States. For example, the author demonstrates that the private international law of the EU is fundamentally reshaping English conflict of laws by almost completely merging the traditionally perceived contractual, statutory, and tortious claims into one claim for choice of law purposes.

Rulemaking by the European Commission Carl Fredrik Bergström, Dominique Ritleng, 2016-01-21

The last few years have seen major reforms to the delegation of powers and post-delegation supervision of the European Commission. In light of these reforms, Rulemaking by the European Commission: The New System for Delegation of Powers assesses whether the new system has really affected the old doctrine of delegation of powers and if so, how. Specific questions answered include: have the objectives of the reform been achieved and what were these objectives? How does the new system affect the division of functions between the institutions of the EU and the institutional balance? Has this new system affected the relationship between the EU and its Member States and if so, how does it concern its citizens? Presented by an interdisciplinary group of experts who have actively followed or participated in the process of reform, the book is structured in four parts: 1. the political and historical context in which the rule making takes place; 2. the operation and functioning of the system before and after the reform; 3. the legal substance of a new framework for rule making and the emerging case law from the Court of Justice of the EU; and 4. the procedural dimension including the legal preconditions for non-institutional actors to participate.

The New Europe Robert William Seton-Watson, 1920

Republican Europe Anna Kocharov, 2017-06-01

Constitutional orders constitute political communities and international orders deriving from them by managing conflicts that threaten peace. This book explores how a European political community can be advanced through EU constitutional law. The constitutional role of the Union is to ensure peace by addressing two types of conflict. The first are static conflicts of interests between the national polities in the EU. These are avoided by ensuring reciprocal non-interference between Member States in the Union through deregulation in Union law. The second are dynamic conflicts of ideas about positive liberty held by the peoples of Europe. These can be resolved through regulation in a European political space. Here, EU law enables a continuous process of re-negotiating a shared European idea of positive liberty that can be accepted as its own by each national polity in the EU. These

solutions to the two types of conflicts correspond to the liberal and republican models for Europe. The claim of this book is that the constitutional design of Europe presents both liberal and republican features. Taking an innovative approach which draws on arguments from substantive law, constitutional theory, case law, analysis, insights from psychology and philosophy, it identifies how best to strengthen the Union through constitutional law.

EU Powers Under External Pressure Christina Eckes, 2019-01-15. EU external actions have deep constitutional and institutional implications for EU law and practices. The EU's competences in external relations have continuously increased, including with the entry into force of the Treaty of Lisbon. As a result, the EU has become ever more active in external relations. This has in turn increased the internal constitutional and institutional effects of EU external actions. This book traces these legal effects and the broader constitutional implications, including potential integrative forces. EU external actions affect the power division between the EU and its Member States and between the different EU institutions, the unity and autonomy of the EU legal order, the role and position of Member States on the international plane, their autonomy, the relationship between national, international and EU law, and the ability of EU citizens to identify who is responsible for a particular action or policy, as well as their legitimate expectation that the EU takes action on their behalf. The chapters demonstrate the interpretation of organizational principles such as sincere cooperation, subsidiarity, primacy and coherence, changes in the context of external relations, how the choice of an external legal basis rather than an internal legal basis affects the powers of the Union and its Member States, what power shifts happen when policies are determined in international agreements rather than in internal decision making, and how EU participation in international dispute settlement mechanisms affects the autonomy and legitimacy of the EU.

The Constitutional Structure of Europe's Area of 'Freedom, Security and Justice' and the Right to Justification Ester Herlin-Karnell, 2019-04-18. This book explores the implications of freedom as a non-domination oriented view for understanding EU security regulation and its constitutional implications. At a time when the European borders are under pressure and with the refugee and migration crisis which escalated in 2015, the idea of exploring a constitutional theory for the Area of Freedom, Security and Justice (AFSJ) might seem to be a utopian project. This appears especially true in the light of the increased threat of terrorism in Europe and on a global scale, and where the expanding EU security agenda is often advanced through the administrative law path in contrast to the constitutional trajectory. Add to this the prolonged financial crisis which continues to cast a long shadow on the future development of EU integration and which suggests that Europe needs to re-invent itself beyond the sphere of economics. Therefore, it is precisely because of the current uncertainties regarding the progress of the EU and the constitutional law project that a constitutional take on the AFSJ is of particular importance. The book investigates the meaning of non-domination and the idea of justice and justification in the area of EU security regulation. In doing so, it focuses on the development of an AFSJ, what it means and why it represents a fascinating example of contemporary constitutional law with interacting layers of security regulation, human rights law and transnational
