Religion in the History of the Medieval West John Van Engen, 2023-05-31 These ten essays by John Van Engen situate religion in the history of medieval Western Europe as an unavoidable presence in everyday life as a conceptual framework for social and political life as a force integral to its historical dynamics Four of the essays are bibliographical and retrospective in nature reviewing the field broadly but also pointing toward a more dialectical approach to understanding the interaction of religion and society in the European middle ages Other studies deal with large topics usually subsumed under the abstract term Christianization They grapple with learned sources as well as those associated with popular religion and show what can be gained from an imaginative use of all that lawyers and theologians said about religion in their society The essays finally look for the quality and dynamic of change even inventiveness released by religious action and conviction in medieval European society **Proceedings of the Harvard Celtic Colloquium, 24/25: 2004 And 2005** Samuel Jones, Aled Llion Jones, Jennifer Dukes Knight, Christina Chance, Matthew Knight, 2009 In Volume 24 Manuel Alberro The Celticity of Galicia and the Arrival of the Insular Celts Brenda Gray Reading Aislinge enguso as a Christian Platonist Parable and 6 other articles In Volume 25 Timothy P Bridgman Keltai Galatai Galli Were They All One People Chao Li On Verbal Nouns in Celtic Languages and 6 other articles Journeys of the Mind Peter Brown, 2025-10-28 A beautifully written personal account of the discovery of late antiquity by one of the world's most influential and distinguished historians The end of the ancient world was long regarded by historians as a time of decadence decline and fall In his career long engagement with this era the widely acclaimed and pathbreaking historian Peter Brown has shown however that the neglected half millennium now known as late antiquity was in fact crucial to the development of modern Europe and the Middle East In Journeys of the Mind Brown recounts his life and work describing his efforts to recapture the spirit of an age As he and other scholars opened up the history of the classical world in its last centuries to the wider world of Eurasia and northern Africa they discovered previously overlooked areas of religious and cultural creativity as well as foundational institution building A respect for diversity and outreach to the non European world relatively recent concerns in other fields have been a matter of course for decades among the leading scholars of late antiquity Documenting both his own intellectual development and the emergence of a new and influential field of study Brown describes his childhood and education in Ireland his university and academic training in England and his extensive travels particularly in the eastern Mediterranean and the Middle East He discusses fruitful interactions with the work of scholars and colleagues that include the British anthropologist Mary Douglas and the French theorist Michel Foucault and offers fascinating snapshots of such far flung places as colonial Sudan midcentury Oxford and

prerevolutionary Iran With *Journeys of the Mind* Brown offers an essential account of the grand endeavor to reimagine a decisive historical moment *Facing Each Other (2 Volumes)* Anthony Pagden, 2017-09-08 The perception of Europeans of the world and of the peoples beyond Europe has become in recent years the subject of intense scholarly interest and heated debate both in and outside the academy So too has the concern with how it was that those peoples who were variously discovered and then as often as not colonised understood the strangers in their midst This volume attempts to cover both these topics as well as to provide a number of crucial articles on the difficulties faced by modern historians in understanding the complex relationship between them and us Inevitably such relationships not only changed over time they also varied greatly from culture to culture The articles therefore cover most of the areas with which the European world came into contact from the earliest Portuguese incursions into Africa in the mid fifteenth century until the explorations of Cook and Bougainville in the Pacific in the late eighteenth It ranges too from Brazil to Russia from Tahiti to China *The Revelations of Margery Kempe* John C. Hirsh, 1989-01-01 **Medieval Ethnographies** Joan-Pau Rubies, 2017-05-15 From the twelfth century a growing sense of cultural confidence in the Latin West at the same time that the central lands of Islam suffered from numerous waves of conquest and devastation was accompanied by the increasing importance of the genre of empirical ethnographies From a global perspective what is most distinctive of Europe is the genre's long term impact rather than its mere empirical potential or its ethnocentrism all of which can also be found in China and in Islamic cultures Hence what needs emphasizing is the multiplication of original writings over time their increased circulation and their authoritative status as a scientific discourse The empirical bent was more characteristic of travel accounts than of theological disputations in fact the less elaborate the theological discourse the stronger the ethnographic impulse although many travel writers were clerics This anthology of classic articles in the history of medieval ethnographies illustrates this theme with reference to the contexts and genres of travel writing the transformation of enduring myths ranging from oriental marvels to the virtuous ascetics of India or Prester John the practical expression of particular encounters from the Mongols to the Atlantic and the various attempts to explain cultural differences either through the concept of barbarism or through geography and climate

Attachment and God in Medieval England Juliana Dresvina, 2021-10-25 This book brings together the disciplines of history and psychology It is the first study to apply attachment theory to self narratives of the past namely examples of life writing letters and proto autobiographies from medieval England written in broad religious contexts It examines whether God could appear as an adequate attachment figure in times of high mortality and often inadequate childrearing practices and whether the emphasis on God's proximity to believers benefited their psychological reorganisation The main method of enquiry is discourse analysis based on the Adult Attachment Interview AAI coding **Annual Bibliography of English Language and Literature**, **Studies in the Sermons of Stephen Langton** Phyllis Barzillay Roberts, 1968 *The Monastic Order in England* David Knowles, 2004-01-29 This book was originally published in 1940 and was quickly recognised

The Crisis of the Twelfth Century Thomas N. Bisson,2015-09-22 Medieval civilization came of age in thunderous events like the Norman Conquest and the First Crusade Power fell into the hands of men who imposed coercive new lordships in quest of nobility Rethinking a familiar history Thomas Bisson explores the circumstances that impelled knights emperors nobles and churchmen to infuse lordship with social purpose Bisson traces the origins of European government to a crisis of lordship and its resolution King John of England was only the latest and most conspicuous in a gallery of bad lords who dominated the populace instead of ruling it Yet it was not so much the oppressed people as their tormentors who were in crisis The Crisis of the Twelfth Century suggests what these violent people and the outcries they provoked contributed to the making of governments in kingdoms principalities and towns

The North Atlantic Frontier of Medieval Europe James Muldoon,2017-05-15 Discussion of medieval European expansion tends to focus on expansion eastward and the crusades The selection of studies reprinted here however focuses on the other end of Eurasia where dwelled the warlike Celts and beyond whom lay the north seas and the awesome Atlantic Ocean formidable obstacles to expansion westward This volume looks first at the legacy of the Viking expansion which had briefly created a network stretching across the sea from Britain and Ireland to North America and had demonstrated that the Atlantic could be crossed and land reached The next sections deal with the English expansion in the western and northern British Isles In the 12th century the Normans began the process of subjugating the Celts thus inaugurating for the English an experience which was to prove crucial when colonizing the Americas in the 17th century Medieval Ireland in particular served as a laboratory for the development of imperial institutions attitudes and ideologies that shaped the creation of the British Empire and served as a staging area for further expansion westward
