The Cassandra Prophecy Armageddon Approaches:

The Cassandra Prophecy - Armageddon Approaches Ian Gurney, 2001-05 The Cassandra Prophecy Armageddon Approaches written by Ian Gurney could become one of the century's most controversial books. It will turn the theological world upside down claiming that for over one thousand years theologians, academics, and scholars have completely missed the point in their interpretations of the book of Daniel the Old Testament prophet and the book of the Revelation of St John the Divine. The Cassandra Prophecy will change the way people think about their future. For the first time it reveals the Bible's greatest secret: Judgement Day in less than twenty-five years and comes to an incredible conclusion: Mankind's destiny has already been decided. *The Cassandra Prophecy* Ian Gurney, 1999 Using the secrets of numerology contained in the books of Daniel the Old Testament prophet and the Revelation of St John the Divine, this work reveals the Bible's greatest secret: Judgement Day. The conclusion of this revelation is that mankind's destiny has already been decided. The author examines ancient prophecies from many other sources and compares them with events taking place right now on earth. It predicts the death of Pope John Paul II, the Californian earthquake, world-wide famine, and natural and environmental catastrophes the earth will face as we move into the 21st century. It also sees the beginning of a nuclear war, global economic collapse, and the fall of the Roman Catholic Church.

Beyond the Cassandra Prophecy - The Road to Hell Ian Gurney, 2010 Climate change, global warming, rising sea levels, lack of fresh water, diminishing energy resources, economic collapse, famine, disease, natural disasters, and nuclear war are what await us over the next fifteen years. In the book I describe why our days are numbered and the terrible calamity that will explode upon the face of the Earth sooner than anyone expects. No one will escape, and mankind will be overwhelmed by the speed with which events exceed even our own worst nightmares. Global warming and climate change now represent, according to the majority of scientists, a far far greater threat to the population of the planet than any terrorist attack. As the ice caps melt, water levels over the next ten years will rise to such an extent that the world's great coastal cities, many islands, and some countries will simply disappear. As parts of the world situated around the equator reach temperatures that render huge areas of the planet uninhabitable, there will be migration on a massive scale never before seen, with perhaps three billion people seeking to move to more hospitable parts of the planet. If you wish to know a little more about your future, read this book.
