Barentine,2015-10-23 Casual stargazers are familiar with many classical figures and asterisms composed of bright stars e g Orion and the Plough but this book reveals not just the constellations of today but those of yesteryear The history of the human identification of constellations among the stars is explored through the stories of some influential celestial cartographers whose works determined whether new inventions survived The history of how the modern set of 88 constellations was defined by the professional astronomy community is recounted explaining how the constellations described in the book became permanently extinct Dr Barentine addresses why some figures were tried and discarded and also directs observers to how those figures can still be picked out on a clear night if one knows where to look These lost constellations are described in great detail using historical references enabling observers to rediscover them on their own surveys of the sky Treatment of the obsolete constellations as extant features of the night sky adds a new dimension to stargazing that merges history with the accessibility and immediacy of the night sky A Cat's Tale Baba the Cat,Paul Koudounaris,2020-11-10 A fun fanciful and even informative history of felines as revealed by a very learned tabby with a knack for hunting down facts People Since the dawn of civilization felines have prowled alongside mankind as they expanded their territory and spread the myth of human greatness And today cats are peddled on social media as silly creatures here to amuse humans with their antics But this is an absurd self centered fantasy The true history of felines is one of heroism love tragedy sacrifice and gravitas Not entirely convinced Well get ready because Baba the Cat is here to set the record straight Spanning almost every continent and thousands yes thousands of years Baba s complex story of feline survival presents readers with a diverse cast of cats long forgotten from her prehistoric feline ancestors and the ancient Egyptian cat goddess Bastet to the daring mariners at the height of oceanic discovery key intellectuals in the

Enlightenment period revered heroes from World Wars I and II and the infamous American tabbies Baba a talented model in addition to a scholar goes beyond surface level scratches pairing her freshly unearthed research with a series of stunning costume portraits to bring history to life A paws on journey through the feline hall of fame with in depth research and four legged testaments that will make you rethink who defines history A Cat s Tale is a one of a kind chronicle that introduces readers to the illustrious ancestors of their closest companions and shows once and for all that cats know exactly what they re doing Almost certainly the most unique cat history book ever published Smithsonian Magazine Man and Animals David Anthony,1984-01-29 Through ancient artifacts and modern science this richly illustrated handbook traces the development of four domesticated animals the horse dog cow and cat important to the human community as pets major food producers and powerful work animals **The Cat** Sarah Brown,2020-03-24 A comprehensive richly illustrated introduction to the behavior and qualities of the cat Of all the domesticated species cats have enjoyed the most complex relationship with people one that still leads to arguments about whether you can truly call the cat asleep by your fire tame The Cat is a comprehensive richly illustrated exploration of the natural and cultural history of this much loved pet Chapters on Evolution Development Anatomy Biology Society Behavior and Cats Humans take different angles on matters feline offering rich information and insights about kitten development the hierarchy of cats how cats think communication between cats and people historic and extinct breeds the challenges facing cats today and how we can help and much much more The book also features a visually stunning photographic directory of more than forty popular breeds with essential information about each Filled with surprising facts The Cat will enchant anyone with an interest in or a love for these animals Provides a comprehensive richly illustrated introduction to the natural and cultural history of the cat Offers an in depth discussion of behavior including social organization communication courtship and learning Covers anatomy and physiology including mobility predation skills and the genetics of coat colors Features clear and accessible text plus infographics diagrams and some 250 stunning color photographs Includes a beautiful photographic directory to more than forty breeds **Cats Are Not Peas** Laura Gould,2008-02-08 The Vets Turn Pale George a male calico was a genetic anomaly a manifestation of something that isn t supposed to happen a creature so rare that even most veterinarians have never seen one His curious existence sparked Laura Gould s long search through the archives of genetics to unearth the charming and valiant roles played by early cat Cats are not Peas Laura L. Gould,2012-12-06 After she accidentally adopted a calico cat that turned out to be a male Laura Gould was seized by curiosity For there to be no male calicos at all would be understandable it was their extreme rarity that was the puzzle Gould an expert in linguistics with no previous training in genetics decided to learn how this could be Her researches took her through the great discoveries in genetics from Mendel s studies of inheritance in peas through the discovery of the chromosome and the role of DNA all seen from the little known and unheralded viewpoint of the pivotal role played by cats as experimental subjects in this epic drama Narrated with inimitable grace and wit this is the story of an

unrecognized chapter in the history of science Play It Again, Tom Augustus Brown, 2011-10-31 Dogs can smell electricity Cats can heal bones by purring Kittens can contact their mothers via a secret ultra sonic language Dogs can understand a vocabulary of 200 human words Every day it seems new scientific discoveries are fuelling the age old argument about which of man s two best friends really is the superior species Augustus Brown fans the flames further with this collection of the weirdest most wonderful and downright incredible of these truths about cats and dogs Did you know for instance that dogs can see moving objects 900 yards away and that cats can sense earthquakes coming Or that dogs prefer Bach to Britney while cats prefer drugs to chocolate Fascinating funny and provocative his book may not settle the debate once and for all But it is certain to set cat and dog lovers arguing like well you know what **Cats to the Rescue** Marilyn Singer, 2006-09-19 True stories of cats who have exhibited heroic or unusual behavior **Animals and why They Matter** Mary Midgley, 1984 *Animals and Why They Matter* examines the barriers that our philosophical traditions have erected between human beings and animals and reveals that the too often ridiculed subject of animal rights is an issue crucially related to such problems within the human community as racism sexism and age discrimination Mary Midgley s profound and clearly written narrative is a thought provoking study of the way in which the opposition between reason and emotion has shaped our moral and political ideas and the problems it has raised Whether considering vegetarianism women s rights or the humanity of pets this book goes to the heart of the question of why all animals matter The Cat-a-logue Janice Anderson, 1989 **Cats** Rebecca Stefoff, 2004 Describes the evolution body structure and behavior of cats and discusses their interaction with people Classical Cats Donald W. Engels, 2018-10-03 This is the definitive book on classical cats The cat has played a significant role in history from the earliest times Well known is its role in the religion and art of ancient Egypt no less than its association with witchcraft in the Middle Ages But when did the cat become a domestic companion and worker as well There has been much debate about the position of the cat in ancient Greece and Rome Artistic representations are sometimes ambiguous and its role as a mouse catcher seems often to have been carried out by weasels Yet other evidence clearly suggests that the cat was as important to Greeks and Romans as it is to many modern people This book is the first comprehensive survey of the evidence for cats in Greece and Rome and of their functions and representations in art Donald Engels draws on authors from Aesop to Aristotle on vase painting inscriptions and the plastic arts and on a thorough knowledge of zoology of the cat He also sets the ancient evidence in the wider context of the Egyptian period that preceded it as well as the views of the Church fathers who ushered antiquity into the Middle Ages **Research Awards Index** , 1987 **Descended from Darwin** Joe Cain, Michael Ruse, 2009 This vol has its origins in a conference held October 22 23 2004 at the Amer Philosophical Society APS Library Phila The main focus was on evolutionary studies in America before during and after the famous synthesis period of the 1930s and 1940s The synthesis period has been the focus of substantial new research and important new thinking This vol brings together 15 specialists to explore these developments

and to press further Questions shaping these essays focus on the following broad themes Continuity and breaks across generations Emerging narratives for the period New research opportunities at the APS New ideas from the research front Placing evolutionists in the broader context of biology and Future directions Also includes a thoughtful intro by Michael Ruse
