The Challenge Of Periodization Old Paradigms And New Perspectives:

The Challenge of Periodization Lawrence L. Besserman, 1996 First Published in 1996 Routledge is an imprint of Taylor Francis an informa company [The Challenge of Periodization](#) Lawrence Besserman, 2016 **The Challenge of Periodization** Lawrence Besserman, 2014-02-04 In these essays some of today's leading literary scholars and cultural critics re-examine major writers, genres and themes in relation to their traditional period affiliations. The essays cover a broad range of writers and periods from the Middle Ages to the present, grouped in two main areas: Chaucer and Medieval and Renaissance studies; Larry D Benson, Heiko A Oberman, Lee Patterson and Aldo Scaglione and English and American literary history; Sanford Budick, H M Daleski, Denis Donoghue, Robert J Griffin, Geoffrey Hartman, J Hillis Miller, Jerome McGann and Helen Vendler. In addition to shedding new light on a specific author, each essay also refines or reinvigorates critical approaches to specific periods. The analyses illuminate and clarify our understanding of what are traditionally but problematically called the Medieval, Renaissance, Enlightenment, Romantic, Modern and Postmodern eras in European cultural history.

The Challenge of World Theatre History Steve Tillis, 2020-09-19 The future of theatre history studies requires consideration of theatre as a global phenomenon. The Challenge of World Theatre History offers the first full-scale argument for abandoning an obsolete and parochial Eurocentric approach to theatre history in favor of a more global perspective. This book exposes the fallacies that reinforce the conventional approach and defends the global perspective against possible objections. It moves beyond the conventional nation-based geography of theatre in favor of a regional geography and develops a new way to demarcate the periods of theatre history. Finally, the book outlines a history that recognizes the often connected developments in theatre across Eurasia and around the world. It makes the case that world theatre history is necessary not only for itself but for the powerful comparative and contextual insights it offers to all theatre scholars and students, whatever their special areas of interest.

Presidential Leadership in the Americas since Independence Guy Burton, Ted Goertzel, 2016-10-05 What is presidential leadership and why have some presidents been considered great or rather transformational while others are not? What are the drivers which distinguish these presidents from the rest? Presidential Leadership in the Americas since Independence answers these questions through a systematic study of leadership across the Americas over 200 years from independence to the present day. Having surveyed who the most cited presidents are in the Americas, Guy Burton and Ted Goertzel examine the experience of presidents from across the western hemisphere: the US, Argentina, Brazil, Chile, Colombia, Mexico, Peru and Venezuela. They study the relationship between these men and women's actions within the constraints they faced during four political periods: independence, national consolidation during the nineteenth century, state building from the late nineteenth to mid twentieth centuries, and neoliberalism since the 1970s/80s. The most transformational presidents are found to be those who are not only able to innovate and build new political consensus at a time of crisis but also consolidate them so that the reforms become lasting and extending beyond an

individual president's own political even biological lifetime *Thinking Medieval* M. Bull, 2005-09-27 This book is aimed at students coming to the study of western European medieval history for the first time and also graduate students on interdisciplinary medieval studies programmes It examines the place of the Middle Ages in modern popular culture exploring the roots of the stereotypes that appear in films on television and in the press and asking why they remain so persistent The book also asks whether medieval is indeed a useful category in terms of historical periodization It investigates some of the particular challenges posed by medieval sources and the ways in which they have survived And it concludes with an exploration of the relevance of medieval history in today's world Contemporary Literature: The Basics Suman

Gupta, 2012-03-12 Contemporary Literature is among the most popular areas of literary study but it can be a difficult one to define This book equips readers with the necessary tools to take an analytical and systematic approach to contemporary texts The author provides answers to some of the critical questions in the field What makes a literary text contemporary Is it possible to have a canon of contemporary literature How does a reader's location affect their understanding How do print electronic and audio visual media impact upon contemporary literature Which key concepts and themes are most prevalent Containing diverse illustrative examples and discussing the topics which define our current sense of the contemporary this is an ideal starting point for anyone seeking to engage critically with contemporary literature **Thomas Hardy and**

Paradoxes of Love Hillel Matthew Daleski, 1997 Emphasizing the vast changes in literary criticism that have occurred during the last thirty years H M Daleski reexamines Thomas Hardy's novels in the novelist's own terms presenting a revisionary account of his treatment of gender He also shows that Hardy was not as sexist as is asserted in much feminist criticism and that his female characters are sympathetically portrayed as the centers of his fictional worlds By carefully analyzing the novels Daleski refutes the generally accepted reason for Hardy's abandonment of fiction at the height of his powers claiming that he drove himself to a dead end in *Jude the Obscure* The typical Hardy plot places a female protagonist in a love triangle with two male protagonists who are portrayed as polar opposites The woman contradicting a general view of her as victim is always granted the freedom of choice of a marriage partner She invariably makes the wrong choice which leads to a bad marriage and disastrous sexual relationships As this scenario is played out in most of Hardy's novels the men are presented as distinct types the types being depicted with rich diversity and with steadily greater psychological depth Hardy's rendering of sexuality in both his male and his female characters is marked by its originality and profundity In his intuitions about sexual relations Daleski maintains Hardy was not outdone by writers such as Lawrence and Joyce Daleski studies Hardy within his Victorian context but he also shows that Hardy both in his depiction of sexuality and in his technical innovations was in advance of his time In these respects Hardy deserves to be regarded as a forerunner of the great modernists In *Thomas Hardy and Paradoxes of Love* Daleski offers acute and thoughtful analyses of Hardy's major novels Avoiding critical jargon the author has made his book accessible to all readers with an interest in Hardy and his novels as

well as in the study of gender in English literature

A History of Romantic Literature Frederick Burwick, 2019-08-19

The Critical Attitude and the History of International Law Jean D'Aspremont, 2019-08-26 This book questions the critical attitude that is informing the critical histories that have been flourishing since the historical turn in international law It makes the argument that the historical turn falls short of being radically critical as the abounding critical histories which have come to populate the international literature over the last decades continue to be orchestrated along the very lines set by the linear historical narratives which they seek to question and disrupt thereby repressing the imagination of international lawyers It makes the point that the critical histories that have accompanied the historical turn have contributed to the repression of disciplinary imagination just like other linear disciplinary histories This book argues that the critical histories must move beyond a mere historiographical attitude and promotes radical historical critique in order to unbridle disciplinary imagination

Modernist Empathy Eve Sorum, 2019-06-27 Shows how reading modernist literature gives us fresh insights into tensions within the empathetic imagination and empathy itself

Landscapes of Realism Dirk Göttsche, Rosa Mucignat, Robert Weninger, 2021-04-15 Few literary phenomena are as elusive and yet as persistent as realism While it responds to the perennial impulse to use literature to reflect on experience it also designates a specific set of literary and artistic practices that emerged in response to Western modernity *Landscapes of Realism* is a two volume collaborative interdisciplinary exploration of this vast territory bringing together leading edge new criticism on the realist paradigms that were first articulated in nineteenth century Europe but have since gone on globally to transform the literary landscape Tracing the manifold ways in which these paradigms are developed discussed and contested across time space cultures and media this first volume tackles in its five core essays and twenty five case studies such questions as why realism emerged when it did why and how it developed such a transformative dynamic across languages to what extent realist poetics remain central to art and popular culture after 1900 and how generally to reassess realism from a twenty first century comparative perspective

The Modern Cultural Myth of the Decline and Fall of the Roman Empire Jonathan Theodore, 2016-08-13 This

book investigates the decline and fall of Rome as perceived and imagined in aspects of British and American culture and thought from the late nineteenth through the early twenty first centuries It explores the ways in which writers filmmakers and the media have conceptualized this process and the parallels they have drawn deliberately or unconsciously to their contemporary world Jonathan Theodore argues that the decline and fall of Rome is no straightforward historical fact but a myth in terms coined by Claude L vi Strauss meaning not a falsehood but a complex social and ideological construct Instead it represents the fears of European and American thinkers as they confront the perceived instability and pitfalls of the civilization to which they belonged The material gathered in this book illustrates the value of this idea as a spatiotemporal concept rather than a historical event a narrative with its own unique moral purpose

Reading the Early Republic

Robert A. FERGUSON, Robert A Ferguson, 2009-06-30 Reading the Early Republic focuses attention on the forgotten dynamism of thought in the founding era In every case the documents novels pamphlets sermons journals and slave narratives of the early American nation are richer and more intricate than modern readers have perceived Rebellion slavery and treason the mingled stories of the Revolution still haunt national thought Robert Ferguson shows that the legacy that made the country remains the idea of what it is still trying to become He cuts through the pervading nostalgia about national beginnings to recapture the manic depressive tones of its first expression He also has much to say about the reconfiguration of charity in American life the vital role of the classical ideal in projecting an unthinkable continental republic the first manipulations of the independent American woman and the troubled integration of civic and commercial understandings in the original claims of prosperity as national virtue Reading the Early Republic uses the living textual tradition against history to prove its case The first formative writings are more than sacred artifacts They remain the touchstones of the durable promise and the problems in republican thought

Modernist Literature and Postcolonial Studies

Rajeev S Patke, 2013-05-20 This book provides a fresh account of modernist writing in a perspective based on the reading strategies developed by postcolonial studies

Thomas Hardy's Novel Universe Pamela Gossin, 2017-03-02 In this the first book length study of astronomy in Hardy s writing historian of science and literary scholar Pamela Gossin brings the analytical tools of both disciplines to bear as she offers unexpected and sophisticated readings of seven novels that enrich Darwinian and feminist perspectives on his work extend formalist evaluations of his achievement as a writer and provide fresh interpretations of enigmatic passages and scenes In an elegantly crafted introduction Gossin draws together the shared critical values and methods of literary studies and the history of science to articulate a hybrid model of scholarly interpretation and analysis that promotes cross disciplinary compassion and understanding within the current contention of the science culture wars She then situates Hardy s own deeply interdisciplinary knowledge of astronomy and cosmology within both literary and scientific traditions from the ancient world through the Victorian era Gossin offers insightful new assessments of A Pair of Blue Eyes Far from the Madding Crowd The Return of the Native Two on a Tower The Woodlanders

Tess of the D'Urbervilles and Jude the Obscure arguing that Hardy's personal synthesis of ancient and modern astronomy with mythopoetic and scientific cosmologies enabled him to write as a literary cosmologist for the post-Darwinian world. The profound new myths that comprise Hardy's novel universe can be read as a sustained set of literary thought experiments by which he critiques the possibilities, limitations and dangers of living out the storylines that such imaginative cosmologies project for his time and ours.

World History: The Basics Peter N. Stearns, 2010-11-19 World History has rapidly grown to become one of the most popular and talked about approaches to the study of history. *World History: The Basics* introduces this fast-growing field and addresses key questions such as: What is world history? How do we study a subject with such a broad geographic and chronological range? Why has world history been controversial? Written by one of the founders of the field and addressing all of the major issues including time, place, civilizations, contact, themes and more, this book is both an ideal introduction to world history and an important statement about the past, present and future of the field.

Working Cities Howard Davis, 2019-12-12 Cities have historically supported production, commerce and consumption, all central to urban life. But in the contemporary Western city, production has been hidden or removed and commerce and consumption have dominated. This book is about the importance of production in the life of the city and the relationships between production, architecture and urban form. It answers the question: What will cities be like when they become once again places of production and not only of consumption? Through theoretical arguments, historical analysis and descriptions of new initiatives, *Working Cities: Architecture, Place and Production* argues that contemporary cities can regain their historic role as places of material production, places where food is processed and things are made. The book looks toward a future that builds on this revival, providing architectural and urban examples and current strategies within the framework of a strong set of historically based arguments. The book is illustrated in full colour with archival and contemporary photographs, maps and diagrams, especially developed for the book. The diagrams help illustrate the different variables of architectural space, urban location and production in different historical eras and in different kinds of industries, providing a compelling visual understanding for the reader.
